E-Learning Platform

The Vi e-learning platform delivers a variety of veterinary educational material in an engaging and interactive format.

Whether you are a Veterinary Surgeon, a Veterinary Nurse, a Student VN or an Animal Care Auxiliary, you should find modules and content that are clinically relevant to you. With CPD certificates available, our e-learning content can help you to fulfil your annual CPD requirements, at the click of a button and from the comfort and convenience of your home or workplace. The e-learning platform also allows access to recordings of all Vi webinars, and new content is added periodically, so make sure you log in regularly to see what's new!

Scan to register for e-learning today!

Practical Courses

Continuing Professional Development is one of our core company values.

Vi supported the delivery of 155 courses in 2024, both within the UK and Internationally, investing over £60,000 per annum to ensure the facilitation of successful training courses and development of Veterinary healthcare professionals.

Scan to see our CPD course calendar!

Webinars

Since 2021, Vi have been delivering bimonthly KOL-led webinars. These live, interactive, free-to-attend sessions continue to soar in popularity with our audience, old and new! In 2024, we welcomed more than 1800 live attendees! An attendance certificate is provided to all live attendees, so these clinically relevant and engaging sessions are the ideal way to help fulfil your annual CPD requirements.

Vi Orthopaedic Starter Kit - Standard

The Standard Kit Contains:

001000	Adjustable Bone Saw With 5 Blades	x1	090003	Bone Pin Trochar 7/64 2.8mm Diam 300mm Long	x1
001004	Orthopaedic Stainless Steel Hard Back Saw 0.4mm Cut	x1	090004	Bone Pin Trochar 1/8 3.2mm Diam 300mm Long	x1
001010	Excision Arthroplasty Rasp	x1	090005	Bone Pin Trochar 9/64 3.50mm Diam 300mm Long	x1
001048	Mini Hohman Retractor 8mm Short Tip	x1	090006	Bone Pin Trochar 5/32 4.0mm Diam 300mm Long	x1
001090	Disarticulator Small	x1	090007	Bone Pin Trochar 3/16" 4.8mm Diam 300mm Long	x1
001116	Meniscus Surgery Set	x1	090008	Bone Pin Trochar 1/4 6.35mm Diam 300mm Long	x1
001221	Standard Jacobs Chuck & Handle 1/4" 6mm Capacity	x1	090021ART	1.1mm Arthrodesis Wire 125mm Long Pack of 10	x1
001234	Implant Cutter S/Steel Cuts To 4.0mm 370mm Long TC Inserts	x1	090024ART	1.4mm Arthrodesis Wire 125mm Long Pack of 10	x1
001237/I	Implant Cutter S/Steel Simple Action 2.0mm Max 255mm Long	x1	090022ART	1.6mm Arthrodesis Wire 125mm Long Pack of 10	x1
001250	Wire Passer Double Ended 145mm	x1	090023ART	2.0mm Arthrodesis Wire 125mm Long Pack of 10	x1
001260	Wire Twister & Shear Cutter 165mm	x1	090038	Bone Pin Roll	x1
001271	Periosteal Elevator CVD AO Type 180mm 6mm End PTFE Handle	x1	090039E	K/A Wire Storage Tube & Dispenser 125mm 0.9/1.1/1.6/2.0	x1
001300	Small Curved Rongeurs 4mm Bite	x1	091151	CCL Kit - Crimpers H/Duty Needleholders & 2 of Each Nylon	x1
001310	Small Angled Cutter 15mm Blade	x1	623850	15mm Osteotome Swedish Pattern 205mm	x1
001320	Mallet 300g	x1	782600	Volkman Scoop Double Ended 4mm & 6mm 200mm Long	x1
001362	Kirschner & Arthrodesis Wire Bender 140mm	x1	H090104	2.7mm Round Shank Drill Hard	x1
001600	Variable Speed Orthopaedic Drill Kit	x1	H090106S	3.5mm Round Shank Drill Hard	x1
090000	Bone Pin Trochar 1/16 1.6mm Diam 300mm Long	x1	OW0810	Reel of Orthopaedic Wire 0.8mm/21g Diameter	x1
090001	Bone Pin Trochar 5/64 2.0mm Diam 300mm Long	x1	OW1010	Reel of Orthopaedic Wire 1.0mm/20g Diameter	x1
090002	Bone Pin Trochar 3/32 2.4mm Diam 300mm Long	x1	XRAYMARK1	Left And Right Hand X-Ray Markers	x1

ORTHOKITI Vi Orthopaedic Starter Kit

ORTHOKITINP Vi Orthopaedic Starter Kit Standard - No Power Tools
Contains list above but does not include power tools.

Vi Orthopaedic Starter Kit - Enhanced

The Enhanced Kit Contains:

001000	Adjustable Bone Saw With 5 Blades	x1	090022ART	1.6mm Arthrodesis Wire 125mm Long Pack of 10	x1
001004	Orthopaedic Stainless Steel Hard Back Saw 0.4mm Cut	x1	090023ART	2.0mm Arthrodesis Wire 125mm Long Pack of 10	x1
001010	Excision Arthroplasty Rasp	x1	090039E	K/A Wire Storage Tube & Dispenser 125mm 0.9/1.1/1.6/2.0mm	x1
001021	Universal Sulcoplasty Rasp 210mm Long	x1	623850	15mm Osteotome Swedish Pattern 205mm	x1
001041	Hohman Retractor 18mm Short Narrow Tip	x2	782600	Volkman Scoop Double Ended 4mm & 6mm 200mm Long	x1
001042	Hohman Retractor 12mm Short Narrow Tip	x2	AR-17-02	Stifle Lever PTFE Handle 280mm VSTL	x1
00109SET	Hatt Spoon Set Set Of 3	x1	H090102	2.0mm Round Shank Drill Hard	x1
001117	Meniscus Surgery Set - Enhanced	x1	H090104	2.7mm Round Shank Drill Hard	x1
001221	Standard Jacobs Chuck & Handle 1/4" 6mm Capacity	x1	H090106S	3.5mm Round Shank Drill Hard	x1
001234	Implant Cutter S/Steel Cuts To 4.0mm 370mm Long TC Inserts	x1	H090112	2.5mm Round Shank Drill Hard	x1
001237/1	Implant Cutter S/Steel Simple Action 2.0mm Max 255mm Long	x1	HIPTOGKITLF	LigaFiba 3.0mm Tog Introducer 3.5 & 4.5mm Drills & Guide	x1
001250	Wire Passer Double Ended 145mm	x1	IMPBOXTRO	IM Pin Box Complete With Steinman Pins Trochar Tips 30 Total	x1
001260	Wire Twister & Shear Cutter 165mm	x1	LFILSCRSTARTER	LigaFiba Lateral Suture + Crimp Starter Kit	x1
001271	Periosteal Elevator CVD AO Type 180mm 6mm End PTFE Handle	x1	OW0710	Reel of Orthopaedic Wire 0.71mm/ 22g Diameter	x1
001300	Small Curved Rongeurs 4mm Bite	x1	OW0810	Reel of Orthopaedic Wire 0.8mm/ 21g Diameter	x1
001310	Small Angled Cutter 15mm Blade	x1	OW0910	Reel of Orthopaedic Wire 0.9mm/ 20.5g Diameter	x1
001311	Large Angled Cutters 19mm Blade 230mm Long	x1	OW1010	Reel of Orthopaedic Wire 1.0mm/ 20g Diameter	x2
001320	Mallet 300g	x1	SAP2.5	Suture Anchor Pin 2.5mm Diameter 1.0mm Hole	x1
001323	TTA Mallet 140g	x1	SAP3	Suture Anchor Pin 3mm Diameter 1.0mm Hole	x1
001343	10mm Osteotome Light 140mm	x1	SAP4	Suture Anchor Pin 4mm Diameter 2.0mm Hole	x1
001362	Kirschner & Arthrodesis Wire Bender 140mm	x1	XRAYMARK1	Left And Right Hand X-Ray Markers	x2
001363	Stubby Punch 50mm	x1	BLACKKIT	Vi Black Series Drill and Saw Set	x1
001380	Modular Osteotome With Seven Blades - 4,6,8,10,12,15 & 20mm	x1	BLACKSW451207B	Vi Black Saw Blade 45mm x 12mm	x1

090024ART	1.4mm Arthrodesis Wire 125mm Long Pack of 10	x1			

ORTHOKITTWO Vi Orthopaedic Starter Kit Enhanced With Battery Power

ORTHOKITTWO-NP Vi Orthopaedic Starter Kit Enhanced No Power Tools
Contains list above but does not include power tools.

Fragment Forceps

Pointed Reduction Forceps

Ideal for fragment reduction, these forceps gently hold fragments in position whilst permanent fixation is being applied. Particularly useful in the repair of fractures of the distal femur, acetabulum and distal tibia.

The smaller sizes are useful in the repair of the long bones of the miniature dog and cat as well as the smaller bones of the distal limbs in larger patients.

- 001200** Fragment Forceps 160mm Long
- 001201** Small Fragment Forceps 135mm Long
- 001208** Very Small Fragment Forceps 100mm Long
- 001208M** Miniature Fragment Forceps 135mm Long
- 001200SET** Fragment Forceps Set of 4 (as above)

Pointed Reduction Forceps With Spinlock

Useful for delicate reduction of fragments. Initial reduction is performed with the spinlock flipped out, to give maximum control. Once placed, the spinlock is flipped back in and gently tightened.

- 001200SL** Pointed Reduction Forceps With Spinlock 180mm Long
- 001201SL** Small Fragment Forceps With Spinlock 135mm Long
- 001245SL** Large Fragment Forceps With Spinlock 180mm Long

Very Large Fragment Forceps

Use where a wide gape is required or where the instrument needs to be further out of the surgical field. Spinlock version is very useful during CrCl surgery for repositioning the stifle prior to placement of a lateral suture, or holding osteotomies during closing wedge type procedures.

- 001202** Very Large Fragment Forceps 205mm Long
- 001203** Very Large Fragment Forceps With Spinlock 215mm Long

Reduction Forceps With Hard Wire Guide

Standard pattern fragment forceps with an added wire guide, to allow placement of a temporary or permanent wire as close as possible to the point of reduction.

Guide capacity up to 1.6mm

- 001201W** Reduction Forceps With Wire Guide 140mm Long. Gape 10-25mm
- 001200W** Reduction Forceps With Wire Guide 170mm Long. Gape 15-40mm
- 001202W** Reduction Forceps With Wire Guide 200mm Long. Gape 25-65mm

Twin Point Fragment Forceps

Twin point fragment forceps hold securely while allowing placement of implants such as screws at the point of maximum reduction between the points.

Particularly useful for humeral condyle repairs, and repairs in the small bones distal to the carpus and tarsus.

- 001205** Twin Point Fragment Forceps Straight 170mm Long
- 001206** Twin Point Fragment Forceps Curved 165mm Long

Ikuta Bone Clamps

Ikuta slotted clamps are designed to allow the passage of wires or screws at the point of maximum pressure. For bones up to 20mm diameter. The smaller sizes are for wires, the larger for small screws. Consider Twin Point Fragment Forceps above for larger screws, or a 001219 Long Ratchet Schroeder, for more spring.

- 001207A** Straight For Wires To 2.0mm 125mm Long
- 001207B** Curved For Wires To 2.0mm 125mm Long
- 001207C** Straight For Screws & Wires To 3.0mm 125mm Long
- 001207D** Curved For Screws & Wires To 3.0mm 125mm Long
- 001207SET** Ikuta Bone Forceps Set of 4 (As above)

Long Ratchet Schroeder Tenaculum

A larger, springier version of the straight Twin Point Fragment Forceps. Useful for reduction of small fragments prior to drilling and screwing. Longer ratchet than a standard Schroeder increases usefulness.

001219 Long Ratchet Schroeder Tenaculum Str 240mm Long

Large Twin Point Reduction Forceps With Spinlock

Accessing the point of maximum compression to insert a screw is made easier by the use of twin point forceps. This size is useful for most elbows where accuracy of placement is essential, including Spaniels which are most likely to be affected by HIF.

001204 Twin Point Reduction Forceps With Spinlock 215mm Long

Bone Holding Forceps

There is no universal bone holder. Both the dimensions of the bones involved and the degree of force needed to manipulate or clamp the bone vary immensely. Select the most appropriate forcep for the procedure.

Vi Bone Holding Forceps

Useful general purpose bone holder for maintaining reduction during I/M pinning. Can also be used during plating procedures, passing drills and screws through the jaw centre.

001210 Bone Holding Forceps 155mm Long

Reduction Forceps Serrated Jaws

These reduction forceps have serrated jaws and spinlock which provides secure incremental control.

001217 Reduction Forceps Serrated Jaws Spinlock 190mm Long
001217/L Reduction Forceps Serrated Jaws Spinlock 240mm Long

Small Serrated Bone Holding Forceps

Manipulation of the long bones of cats and small dogs is difficult without crushing. The serrated jaws of this forcep are contoured to maximise grip and support. The tips are sharp. They may be used as small fragment forceps.

001218XS X Small Serrated Bone Holding Forceps 3mm Grasp 140mm
001218S X Small Serrated Bone Holding Forceps 5mm Grasp 140mm
001218 Small Serrated Bone Holding Forceps 7mm Grasp 140mm
001218L Large Serrated Bone Holding Forceps Ratchet 12mm Grasp 180mm
001218SET Serrated Bone Holding Forceps Set of 4 (As above)
001218LG Small Serrated Bone Holding Forceps Spinlock 12mm Grasp 180mm

Small Curved Serrated Reduction Forceps

A nice forcep for the manipulation of small bones or small bone fragments.

001996 Small Curved Serrated Reduction Forceps 145mm Long

Dingmans Forceps

Useful for manipulation of bone fragments.

001470 Dingmans Forceps Long Ratchet 215mm Long

Lowman Bone Clamp Veterinary Pattern

Re-worked traditional human clamp, in sizes suitable for cats and small dogs:

- Lightweight
- Requires minimal exposure
- Use to reduce oblique fractures
- Secures plate to fracture prior to screw placement

- 001991 Lowman Bone Clamp Cat Size 63mm Long
- 001993 Lowman Bone Clamp Large 220mm Long

Kern Bone Holding Forceps

Kerns give a very firm controllable grip, aiding manipulation and reduction of fragments. A quick release ratchet locks the jaws. Useful in general orthopaedics and for surgery around the hip, in particular:

- Femoral shaft fractures
- Triple pelvic osteotomy
- Hip toggle
- Fractures of the acetabulum

- 001216 Kern Bone Holding Forceps Mini 125mm Long
- 001213 Kern Bone Holding Forceps Small 170mm Long
- 001214 Kern Bone Holding Forceps Large 215mm Long
- 001213SET Kern Bone Holding Forceps Set of 3 (As above)

Self Centering Bone Holding Forceps

Some fracture reductions require that the bone forceps jaws be angled from the handles. Such forceps require:

- A sophisticated hinge mechanism to allow the jaws to maintain alignment as they open and close.
 - A special locking device which can cope with the laxity at the hinge.
- The spinlock and the special jaw makes the instrument very nice to use. The veterinary pattern stands up from the bone in use, where the human pattern sits down and falls away which is generally less appropriate in veterinary patients.

- 001209 Self Centering Bone Holding Forceps Very Small 150mm Long
- 001211 Self Centering Bone Holding Forceps Small 190mm Long
- 001212 Self Centering Bone Holding Forceps Large 240mm Long
- 001209V Self Centering Bone Holding Forceps Very Small 150mm Vet Pattern
- 001211V Self Centering Bone Holding Forceps Small 190mm Vet Pattern
- 001212V Self Centering Bone Holding Forceps Large 240mm Vet Pattern

Plate Holding/Drill Guide Forceps

Combination bone holder and drill guide. Allows temporary fixation of the plate to the bone whilst a hole is drilled. The ball shape of the tip engages the plate hole, while the tip of the drill guide engages the bone. Tips are offset slightly to avoid the drill bit hitting the opposite bone holder tip.

- 001225 1.5mm/2.0mm Plate Holding and Drill Guide Forceps 140mm Long
- 001226 2.4mm/2.7mm Plate Holding and Drill Guide Forceps 145mm Long
- 001227 3.5mm Plate Holding and Drill Guide Forceps 150mm Long
- 0012SET Plate Holding and Drill Guide Forceps Set of 3 (as above)

Plate Holding Forceps

Use to hold a plate in position on the bone. Ball tips engage the plate holes. Also useful as a fragment forcep in young, soft bone, as the balls prevent over penetration.

001215 Plate Holding Forceps 160mm Long

Left Handed Fragment Forceps

Left handed fragment forceps are modified specifically to make use easier. One black handle identifies left handed instruments.

001201SL-L Small Fragment Forceps With Spinlock 135mm Left Handed
001203-L Very Large Fragment Forceps With Spinlock 210mm Left Handed

Rongeurs

Rongeurs vary with respect to bite size and jaw angle. Where a rongeur has a specific function, it is indicated in the description.

Simple Action Rongeurs

Typically simple action rongeurs offer a wide bite but rely on the physical strength of the surgeon. Most small rongeurs have a simple action.

Vi Small Curved Rongeurs

A good general purpose rongeur for small bone nibbling procedures, e.g. excision arthroplasty, arthrodesis, sequestrum removal.

001300 Small Curved Rongeur 4mm Bite 170mm Long

Mini-Friedman

Useful in bulla osteotomy.

142501 Mini-Friedman Rongeur Curved 3mm Bite 160mm Long

Micro-Friedman

A small spine rongeur.

142502 Micro-Friedman Rongeur Curved 2.2mm Bite 155mm Long

Lempert Straight

Useful for spines and bulla osteotomy.

6730/10 Lempert Rongeurs Straight 3mm Bite 190mm Long

Compound Action Rongeurs

The compound action give a mechanical advantage to the surgeon but reduces the bite width.

Jansen

Compound action, powerful but small bite.

I42200 Jansen Rongeur Curved 4mm Bite 190mm Long

Ruskin

A heavy duty compound action rongeur.

I42270 Ruskin (Liston) Rongeur Compound Action Curved 6mm Bite 230mm Long

Stille-Luer

A very large rongeur.

I42305 Stille-Luer Heavy Compound Action Curved 8mm Bite 225mm

Duck-Billed Daniel Rongeurs

Designed by Simon Wheeler BVSc PhD, these Rongeurs can remove full thickness laminal bone in small dogs.

They are, however, best used to remove the layer of deep cortical bone overlying the spinal cord once the superficial cortex and cancellous bone have been removed using power tools; this is particularly true of the medium and large dog.

001400 Duck-Billed Daniel Rongeurs 3mm Bite 177mm Long

Micro Spine Rongeur Set

Very fine Rongeurs with a 1.75mm (width) bite. Set contains three variations: straight, curved and angled.

I42600 Micro Spine Rongeurs Set of 3

Daniel Rongeur

The jaws of this instrument are straight and the bite is small. Also suitable for bulla osteotomy.

001402 Daniels Rongeur Curved 4mm Bite 130mm Long

Compound Action Spinal Rongeurs

Much more powerful than the Daniels, this instrument can nibble through full thickness lamina. The jaws are very fine and angled to allow the surgeon to enlarge the inter-vertebral foramen.

Available in 2mm, 3mm, and 4mm jaw widths. Length 190mm.

- 001429 Compound Action Spinal Rongeurs 2mm
- 001430 Compound Action Spinal Rongeurs 3mm
- 001431 Compound Action Spinal Rongeurs 4mm

40 Degree Bone Punch Forceps - Low Profile

Designed for use where a high speed bur has removed the outer cortical layer and the underlying cancellous layer, the powerful nibbling action of this device allows very controlled removal of the final layer of cortical bone. The wedge-shaped foot of this device is designed to allow good access whilst still retaining strength, and is polished to minimise friction and potential trauma. Overall length 21cm.

- 001438 Batemans Spine Punch 40 Degree Upward Cut 2mm
- 001439 Batemans Spine Punch 40 Degree Upward Cut 3mm
- 001441 Batemans Spine Punch 40 Degree Upward Cut 4mm

Smith-Kerrison Punch Forceps

This is a traditional design with a 40 degree upward cutting jaw. Robust spine forceps. 185mm shaft.

- 001445 Smith-Kerrison Punch Forceps 2mm
- 001446 Smith-Kerrison Punch Forceps 3mm

Training & Education

Our e-learning platform delivers a variety of technical and clinical educational material, in an engaging and interactive format.

With a CPD certificate awarded upon successful completion of each module, the e-learning platform from Vi will help you to fulfil your annual CPD requirements.

Sign up today by scanning the QR code below.

Bone Cutters

Small Angled Cutters

A very useful small cutter. The jaw is angled to allow cutting where access is restricted, e.g. excision arthroplasty in cats and small dogs and tibial crest transposition. The design allows for transection of the tibial crest while retaining distal periosteal attachments. Also useful for articular cartilage removal in arthrodesis, digit and tail amputations.

001310 Small Angled Cutter 15mm Jaw 170mm Long

Compound Action Bone Cutters

All three following designs are similar but vary according to size of bite.

McIndoe

Compound jointed action gives power but reduces bite size.

141900 McIndoe Bone Cutter 15mm Blade Aof 170mm Long

Large Angled Cutters

Similar style to the Small Angled Cutters, but more powerful and more robust due to their size. The simple action allows a wider jaw opening. The angled jaws, more slender than similar sized Liston's, serves to further improve visibility and access into tight spots. The notch in the jaws serves to improve visibility further and make accurate cuts more achievable.

001311 Large Angled Cutters 19mm Jaw 230mm Long

Ruskin

Similar in design to McIndoe but larger.

141940 Ruskin (Liston) 25mm Blade Str 190mm Long
141960 Ruskin (Liston) 25mm Blade Aof 190mm Long

Liston

A widely used bone cutter with straight and angled jaw options.

141700 Liston Bone Cutters 25mm Blade Str 140mm Long
141710 Liston Bone Cutters 20mm Blade Aof 140mm Long
141730 Liston Bone Cutters 25mm Blade Str 170mm Long
141740 Liston Bone Cutters 25mm Blade Aof 190mm Long
141745 Liston Bone Cutters 30mm Blade Str 220mm Long
141755 Liston Bone Cutters 30mm Blade Str 190mm Long
141764 Liston Bone Cutters 30mm Blade Aof 200mm Long

Horsley

Heavy duty compound action cutters.

141660 Horsley Cutter 35mm Blade Aof 260mm Long
141660S Horsley Cutter 35mm Blade Str 260mm Long

Periosteal Elevators

Periosteal Elevator/Bone Lever

One end of this instrument is bent for use as a hook for retrieving and manipulating bone fragments. The other end is a periosteal elevator useful for clearing soft tissue from bone prior to plating, drilling or burring.

001270 Periosteal Elevator/ Bone Lever 4mm/7mm Tips 195mm

Periosteal Elevator Very Fine

001272 Periosteal Elevator Very Fine 2mm/3mm 180mm Long

Freer Periosteal Elevator

The Freer Elevator is a fine instrument which is particularly useful in spinal work.

7350/05 Freer Periosteal Elevator 5mm 180mm Long

Molt Periosteal Elevator

The Molt is a double ended Periosteal Elevator. The tips are round and dished. 4mm and 6mm diameters.

001275 Molt Periosteal Elevator 200mm

Howarth Dissector

Developed by Richard Whitelock specifically to clear soft tissues from the proximal tibia in the TPLO procedure. It is also useful as a general purpose periosteal elevator. One end acts as a curved periosteal elevator and the other end is straight.

001273 Howarth Dissector 225mm Long

MIPO Minimally Invasive Plate Osteosynthesis Elevator

This instrument is not so much a periosteal elevator, more a dissecting probe to clear a tunnel under muscle layers for the plate. The periosteum is, in fact, left intact.

001276 MIPO Elevator 280mm Long

AO Type Periosteal Elevator

The AO type instrument is the archetypal 'periosteal elevator'. Available in curved and square 6mm tip.

001271 AO Type Periosteal Elevator PTFE Handle Curved Tip 6mm 180mm

001274 AO Type Periosteal Elevator PTFE Handle Square Tip 6mm 190mm

K/A Wire/Small Pin Punch

The cut ends of K wires, arthrodesis wires and small pins used for fragment fixation e.g. distal femoral fractures, should be buried beneath the bone or articular surface to minimise soft tissue irritation. The tip of the punch is concave to locate onto the pin end. The other end is struck with a mallet.

- 001360 K/A Wire & Small Pin Punch 135mm Long
- 001361 K/A Wire & Very Small Pin Punch 1.6mm Tip 135mm Long

IM Pin Punch

IM Pin Punch with a larger diameter tip for driving larger pins.

- 001374 IM Pin Punch 6mm Tip 135mm Long

Stubby Punch

The reduced working length allows the stubby punch to be held between thumb and forefinger much closer to the patient for increased control. This is especially useful when working without an assistant. 50mm long.

- 001363 Stubby Punch 50mm Long

K Wire Bender

Used to bend K and A wires prior to rotation and seating onto the bone. This instrument is designed to slip over the wire concentrating all the bending forces at the pin/bone interface. The instrument is double ended, the small end is for 0.9mm and 1.1mm wires, the large end is for 1.4mm, 1.6mm and 2.0mm wires.

- 001362 Kirschner and Arthrodesis Wire Bender 140mm Long

Offset Wire Bender

A robust design for the accurate and reliable creation of bends close to the bone surface. The three cannulations (1.1mm, 1.6mm and 2.0 mm) cater for the full range of our arthrodesis wires. The short length of each cannulation makes these easy to clean.

- 001373 Offset Wire Bender

Offset K/A Wire Punch For Bent Pins

The bigger, angled foot of this punch is designed to allow bent-over arthrodesis or K wires to be driven home onto the bone surface. May also be used for Rush pins.

- 001364 Offset K/A Wire Punch For Bent Pins 135mm Long

Orthopaedic Hard Back Saw

Made from stainless steel. The stiff back helps to guide the saw.

- 001004 Orthopaedic Hard Back Saw

Adjustable Bone Saw

Useful for completing/squaring off the osteotomy, this saw comes complete with five, fine chrome plated blades. Blade length is adjustable from 40mm to 100mm. Handle length 130mm. Blade length 155mm.

- 001000 Adjustable Bone Saw With 5 Fine Blades
- 001001-A Spare Fine Blades Pack of 5 Chrome Plated
- 001000SS-A Adjustable Saw Blade Single Sterile
- 001002 Coarse Stainless Blade 140mm Long

Patella Saw

With standard sawblade including 1.5mm Allen Wrench.

- LE123100590 Patella Saw
- LE123100520 Patella Saw Replacement Blade
- LE123100521 Patella Saw Allen Wrench

This product is only available in selected countries. Please check with Vi for availability.

Osteotomes

Modular Osteotome

PTFE osteotome handle which accepts a good range of blades plus a diamond rasp (not included in set). Blades are 1.1mm thick, allowing fine cuts and reducing the incidence of breaking the block during block sulcoplasty procedures.

Replacement T wrench and retaining screw are also available.

001380	Modular Osteotome With 7 Blades
001382	Modular Osteotome Replacement Blade 4mm
001390	Modular Osteotome Replacement Blade 5mm
001383	Modular Osteotome Replacement Blade 6mm
001384	Modular Osteotome Replacement Blade 8mm
001385	Modular Osteotome Replacement Blade 10mm
001386	Modular Osteotome Replacement Blade 12mm
001387	Modular Osteotome Replacement Blade 15mm
001388	Modular Osteotome Replacement Blade 20mm
001389	Modular Diamond Rasp 6mm
TBHEX40	4.0mm T Bar Hex Driver
001380SCREW	Spare Screw For Modular Osteotome Handle

Osteotomes - Swedish Pattern

Use an osteotome to make a precise elective cut, e.g. trochanteric osteotomy, excision arthroplasty.

623880	Osteotome Swedish 30mm 205mm Long
623870	Osteotome Swedish 25mm 205mm Long
623860	Osteotome Swedish 20mm 205mm Long
623850	Osteotome Swedish 15mm 205mm Long
623840	Osteotome Swedish 12mm 205mm Long

Osteotomes - Light Pattern

Use an osteotome to make a precise elective cut, e.g. trochanteric osteotomy, excision arthroplasty.

001341	Osteotome Light 15mm 140mm Long
001342	Osteotome Light 12mm 140mm Long
001343	Osteotome Light 10mm 140mm Long
001344	Osteotome Light 8mm 140mm Long
001345	Osteotome Light 6mm 140mm Long
001346	Osteotome Light 4mm 140mm Long

Stubby Osteotome

Available from 3mm to 14mm and as a set. 70mm long.

001366	Stubby Osteotome 3mm 70mm Long
001367	Stubby Osteotome 4mm 70mm Long
001368	Stubby Osteotome 6mm 70mm Long
001369	Stubby Osteotome 8mm 70mm Long
001370	Stubby Osteotome 10mm 70mm Long
001371	Stubby Osteotome 12mm 70mm Long
001372	Stubby Osteotome 14mm 70mm Long
0013SET	Stubby Osteotome Set of 7 (As above)

Chisels

Chisels Swedish Pattern

Use a chisel where heavier bone removal is required, e.g. sequestrum removal.

- 162340** Chisel Swedish Pattern 12mm 205mm Long
- 162350** Chisel Swedish Pattern 15mm 205mm Long
- 162360** Chisel Swedish Pattern 20mm 205mm Long

Orthopaedic Mallet

For use with osteotomes, chisels, gouges and staples. Different weights are available according to surgeon preference and patient size.

- 001323** Mallet 140g 155mm Long
- 001320** Mallet 300g 220mm Long
- 001321** Mallet 500g 240mm Long
- 001325** Nylon Faced Mallet 500g 240mm Long
- 001326** Nylon Faced Mallet 300g 205mm Long

Chisels Light Pattern

Use a chisel where heavier bone removal is required, e.g. sequestrum removal.

- 001350** Chisel 12mm 140mm Long
- 001351** Chisel 10mm 140mm Long
- 001352** Chisel 8mm 140mm Long
- 001353** Chisel 6mm 140mm Long
- 001354** Chisel 4mm 140mm Long

Volkman Bone Scoop

Useful for heavy curettage and collection of cancellous bone grafts.

- 782205** Volkman Single Ended Scoop 3mm 170mm Long
- 782200** Volkman Single Ended Scoop 4mm 170mm Long
- 782210** Volkman Single Ended Scoop 5mm 170mm Long
- 782220** Volkman Single Ended Scoop 6mm 170mm Long
- 782600** Volkman Double Ended Scoop Small 4mm/6mm 200mm Long
- 782610** Volkman Double Ended Scoop Medium 5mm/6mm 200mm Long
- 782620** Volkman Double Ended Scoop Large 6mm/8mm 200mm Long

Gouges

Use a gouge where bone contouring is essential.

- 001355S** Gouge 12mm 140mm Long
- 001355** Gouge 12mm 205mm Long
- 001356** Gouge 10mm 140mm Long
- 001357** Gouge 8mm 140mm Long
- 001358** Gouge 6mm 140mm Long
- 001359** Gouge 4mm 140mm Long

Trephine

Stainless steel and re-usable with a retractable stylet. Extend the stylet to provide secure location at the trephine site until trephine teeth bite. Withdraw the stylet to harvest the bone. Push the bone core out using the stylet. Where a very long core is required the stylet may be removed completely.

- Creation of window for bone graft harvest.
- Cortical bone biopsy.

001425 Trephine 8mm o/d 6mm Core 170mm Long

001426 Trephine 6mm o/d 4mm Core 115mm Long

001427 Trephine 5mm o/d 3mm Core 115mm Long

Small Distractor With Ratchet

The Small Ratcheted Distractor uses 1.5 or 1.6 K or A wires as distraction pins. The pins are driven into place through the tubes on the distractor arm. Threaded pins may be used for additional security. Squeezing the arms of the distractor separates the pins and thus the bone fragments and the ratchet holds them in the new position. Range of distraction 12mm - 60mm.

001503 Small Distractor With Ratchet 185mm Long

Vi Pattern Orthopaedic Distractor

Application and Features:

- Overcoming muscle contraction prior to fracture reduction.
- Accurate alignment of bone fragments prior to plating.
- Locking wing nuts fix the distractor as a scaffold for the bone fragments to facilitate plating.
- Three joints maximise flexibility.
- Use with external fixation pins 3.2mm to 4.0mm.

001500 Vi Pattern Orthopaedic Distractor 330mm Long

Bone Scribe

A very sharp marking point with an easy-to-hold handle enables the surgeon to mark bone prior to creation of an osteotomy. One end is pointed and the other is sharpened as a blade.

001494 Bone Scribe Double Ended 200mm Long

Measuring Devices

Vernier Caliper

Useful for very accurate measurement of screws and drill bits. Accurate to 0.1mm.

001490 Vernier Caliper Stainless Steel

001490D Digital Vernier (Non Autoclavable)

Drill & Screw Gauge

Measures screws up to 60mm and drills from 1.1mm to 3.5mm.

001496 Drill & Screw Gauge 60mm Long

Vi Metric Ruler

Metric ruler covering the more common drill, screw and wire sizes.

001504 Metric Ruler - Vi

Imperial Ruler

Used to measure pins, wires, drills and screw sizes.

001498 Orthopaedic Ruler Imperial 175mm Long

Radiographic Aids Xray Marker With Scale

A reliable scale is very important, regardless of the system used. Left/right markers are essential. A flexible stand is also available allowing this combined marker to be positioned at the same level as the area of interest to improve accuracy.

XRAYMARK I Xray Marker With Scale Set Left & Right
XRAYHOLD I Xray Marker Stand

Radiographic Reference Ball

Reduce scaling errors when templating for implants or examining structures, using digital or analogue systems. Using a spherical object as a reference eliminates errors created by ruler orientation which might not be quite parallel with the plate.

Supplied on a stable base with a flexible neck, allowing positioning at the same level as the area of interest.

XRAY25MM Radiographic Reference Ball 25mm Diameter
XRAY10MM Radiographic Reference Ball 10mm Diameter
XRAYBALLSET Xray Ball Set 25mm & 10mm

Implant Cutters

Select implant cutters to suit the type and size of implant to be cut, and the position of the implant. Using hacksaws is best avoided as far as possible – due to the work hardening characteristic of stainless steel and titanium, the harder you work the harder it is to cut. Intramedullary pins and K/A wires are already hardened during production so are even tougher.

Designs and finish of cutter:

Surgical finish stainless steel with TC inserts – suitable for appropriate sizes of hard wires. Can be used for appropriate sizes of cuttable plate.

Also for cutting fish hooks!

Side cutting – standard pattern straight cutters.

Close cut – end cutting. For smaller pins only. Harder to cut long sections but allow cutting close to the bone.

Safety cutters – leave a blunt end with no snags, but leave a longer stub. Best for ex fix pins.

Compound action – more expensive but make cutting pins easier.

Prolong the life of your pin cutter by not cutting at the tip – as tungsten carbide is brittle, it is prone to break when cutting at the very tip, where it is less well supported by the stainless jaw.

Implant Cutter Selection Chart

Maximum Pin Size	Code	Description
1.5mm	001230	Implant Cutter to 1.5mm
	001238	Implant Cutter to 1.5mm Close Cut
2.0mm	001237/1	Implant Cutter to 2.0mm 255mm
2.2mm	001246	Implant Cutter to 2.2mm Oblique jaw
	001237	Implant Cutter to 2.2mm
	001236	Implant Cutter to 2.2mm Close Cut
3.0mm	001228	Implant Cutter to 3.0mm
	001234	Implant Cutter to 4.0mm
4.0mm	001231/A	Implant Cutter to 4.0mm Detachable Handles
	001229	Safety Cutter to 4.0mm
6.0mm	001231VL	Implant Cutter to 6.0mm Compound

Implant Cutter Surgical Finish To 1.5mm Capacity

Implant Cutter Surgical Finish to 1.5mm Capacity, 150mm Long.

001238 Implant Cutter Stainless To 1.5mm Capacity Close Cut 150mm Long

Implant Cutter Surgical Finish To 1.5mm Capacity

Small lightweight implant cutter. Max capacity 1.5mm. Also suitable for 1mm cuttable plate range. For light use only.

001230 Implant Cutter Stainless To 1.5mm Capacity 170mm Long

Implant Cutter Surgical Finish To 2.0mm Capacity

Implant Cutter Stainless Steel Cuts To 2.0mm Capacity 255mm Long Simple Action.

001237/1 Implant Cutter Stainless Steel Cuts To 2.0mm Capacity 255mm Long Simple Action

Implant Cutter Surgical Finish To 2.2mm Capacity

Implant cutter surgical finish with TC jaws. End cut to 2.2mm capacity. Sprung compound action. 230mm long.

001236 Implant Cutter Stainless Steel Cuts To 2.2mm Capacity 230mm Long End Cut

Implant Cutter Surgical Finish To 2.2mm Capacity

Similar to 001237, but with oblique jaws favoured by many surgeons. Tungsten Carbide jaws.

001246 Implant Cutter Stainless Steel Cuts To 2.2mm Capacity 255mm Long

Implant Cutter Surgical Finish To 3mm Capacity

Implant Cutter Surgical Finish to 3mm Capacity, TC Jaws, 255mm Long.

001228 Implant Cutter Stainless To 3mm Capacity 255mm Long

Implant Cutter Surgical Finish To 2.2mm Capacity

Implant Cutter Surgical Finish to 2.2mm Capacity, TC Jaws, Sprung Compound Action, 230mm Long.

Very useful for A and K wires, and cuttable plates.

001237 Implant Cutter Stainless Steel Cuts To 2.2mm Capacity 230mm Long

Implant Cutter Surgical Finish To 4mm Capacity Detachable Handles

Overall length with handles in situ is 485mm. Strips down to 270mm long when handles are detached to fit many smaller autoclaves.

001231/A Implant Cutter Stainless To 4mm Capacity Detachable Handles

Safety Cutter Surgical Finish To 4mm Capacity

Safety implant cutter which leaves a smoother cut end than a conventional cutter. Very useful for external fixation pins. Cut end is temporarily retained within the head rather than flying off.

Maximum capacity 4mm. Cuts 5mm below the face of the cutter.

Telescopic handles reduce the overall length from 470mm to 340mm to fit most autoclaves. Head strips for cleaning.

001229 Safety Cutter Stainless Steel Cuts To 4.0mm Capacity 340mm Long

Implant Cutter Surgical Finish To 6mm Capacity

Highest capacity implant cutter stocked. Will not fit most autoclaves as they are 560mm long – suggested to use chemical sterilant on the jaws and operate by an unscrubbed assistant.

001231VL Implant Cutter Stainless Steel Cuts To 6mm Capacity TC Jaws 560mm Long

Implant Cutter Surgical Finish To 4mm Capacity

001234 Implant Cutter Stainless Steel Cuts To 4mm Capacity TC Jaws 370mm Long

Pin & Wire Extraction Pin Grip

For the removal of temporary fixation pins. Narrow jaws allow access via a small incision, with a groove in the jaw to locate the pin. Jaws can be locked in position once the pin is located, to aid removal.

001241 Pin Grip Stainless Steel Modified Jaw 175mm Long

Dental Forceps For Pin & Wire Extraction

For pin, wire and screw extraction. Grooved tips come to a point, allowing work in confined spaces and close to bone with a reduced surgical approach. Anatomical handles and cranked jaws for ease of use.

001248 Dental Forceps for Pin & Wire Extraction

Parallel Action Pliers

Useful for bending, holding and cutting small pins and wires. Used in conjunction with bone plate benders for contouring smaller plates. Will cut arthrodesis and K wires to a maximum of 2.0mm with care.

001290 Parallel Action Pliers Stainless Steel 170mm

Wire Contouring Pliers

Use to contour both soft and hard wires. The jaw design has multiple anvil shapes and a pair of soft wire cutters.

001245 Wire Contouring Pliers 150mm Long

Kirschner and Arthrodesis Wire Remover

Designed to firmly grip wires 0.9mm to 2.0mm. Tungsten Carbide jaws maximise grip, fine nose minimises trauma to surrounding tissue.

001244 Kirschner and Arthrodesis Wire Remover 140mm Long

Small Pin Vice

This Small Pin Vice holds pins and wires up to a diameter of 1.0mm. Particularly useful for fingertip control over insertion of Arthrodesis and K Wires.

001223 Small Pin Vice 100mm Long

Jacobs Chuck

Standard instrument for for hand insertion of intramedullary pins.

Pin capacity Standard Chuck up to 1/4" (6mm)

Small Chuck up to 5/32" (4mm)

Standard chuck will grip small pins, but is heavier in use.

Clean thoroughly and lubricate well, opening and closing jaws fully during cleaning procedure to maintain in good condition.

001220	Small Jacobs Chuck with Handle 5/32" Capacity 260mm
001605S	Replacement 5/32" Chuck & Key Only - No Handle
001606S	Spare Key For 5/32" Chuck
001221	Standard Jacobs Chuck with Handle 1/4" Capacity
001605	Replacement 1/4" Chuck & Key Only - No Handle
001606	Spare Key For 1/4" Chuck

Wire Passers

Wire passers are designed to direct cerclage wire around long bones with minimal trauma, helping reduce devascularisation of fragments. Soft tissue attachments should be preserved as far as possible.

001250	Wire Passer Double-Ended 145mm
001252	Wire Passer Single-Ended 20mm Diameter 205mm
001253	Wire Passer Single-Ended 30mm Diameter 220mm
001254	Wire Passer Single-Ended 40mm Diameter 250mm
001256	Wire Passers Single-Ended Set of 3 (As Above)

Strong Cerclage Wire Passers

Low profile open channel wire passers, designed to allow easier passage around and between bones. Can be left in situ as wire is tightened, reducing risk of slippage. Wire can be passed from tip or handle. With a flat internal tip to assist close passage around the bone.

Designed by David Strong MRCVS.

CWPSM	Strong Cerclage Wire Passer Small 12.5mm/15mm
CWPM D	Strong Cerclage Wire Passer Medium 20mm/25mm
CWPLG	Strong Cerclage Wire Passer Large 30mm/40mm
CWPSET	Strong Cerclage Wire Passer Set of 3

Lesser Wire Passer/Retrieval Forceps

Really useful forceps which combine the function of a tissue protector drill guide with a method of capturing the wire on the blind side of the procedure. The open sided guide tube is toothed to minimise drill skate.

Most common applications include hemi-cerclage and passage of lateral sutures through the tibial crest.

Original design by Arnie Lesser.

001268	Lesser Wire Passer/Retrieval Forceps 150mm Long
001269	Lesser Wire Passer/Retrieval Forceps Large 190mm Long

Orthopaedic Wire

Cerclage wire is an extremely useful method of fragment fixation. Use as thick a wire as seems possible. Twist evenly under tension. The best instrument is our Wire Twister/Cutter 001260. Minimise wire movement on periosteum. Tension wire banding should be performed where muscular forces must be transferred beyond a fracture or osteotomy, e.g. Tibial crest avulsion or trochanteric osteotomy. 1.0mm wire is the most useful for mid-sized dogs. All are supplied in 10 metre rolls.

- OW0210** 32g Reel of Orthopaedic Wire 0.20mm
- OW0310** 30g Reel of Orthopaedic Wire 0.30mm
- OW0410** 27g Reel of Orthopaedic Wire 0.40mm
- OW0510** 25g Reel of Orthopaedic Wire 0.5mm
- OW0610** 24g Reel of Orthopaedic Wire 0.6mm
- OW0710** 22g Reel of Orthopaedic Wire 0.71mm
- OW0810** 21g Reel of Orthopaedic Wire 0.8mm
- OW0910** 20.5g Reel of Orthopaedic Wire 0.9mm
- OW1010** 20g Reel of Orthopaedic Wire 1.0mm
- OW1012** 18g Reel of Orthopaedic Wire 1.2mm
- OW1015** 16g Reel of Orthopaedic Wire 1.5mm

Orthopaedic Wire Kit

Cerclage wire can be a very useful means of fragment fixation. Kit containing our most popular cerclage instruments and a roll of wire, discounted over component price.

Kit contains:

- | | | |
|--------|------------------------------------|----|
| 001260 | Wire Twister | x1 |
| 001256 | Set of 3 Single Ended Wire Passers | x1 |
| OW1010 | 10m Roll of 1.0mm Orthopaedic Wire | x1 |

OWKIT Orthopaedic Wire Kit

Wire Twister and Shear Cutter

- Jaws lock onto wire to enable easy twisting under tension for kink-free cerclage. The wire must be twisted under tension to create an even spiral.
- Long life shear action cutter will cut 18 gauge (1.2mm) wire twisted double.
- Serrated jaws grip and turn cut ends.
- 001260 have fenestrated jaws. Not Tungsten Carbide.
- 001261 have Tungsten Carbide jaws for extra grip. Not fenestrated.
- Not designed to cut A + K Wires, Pins or fish hooks.

- 001260** Wire Twister and Shear Cutter 165mm Long
- 001261** Wire Twister and Shear Cutter - Tungsten Carbide Jaws 165mm Long

Wires With Eyelet

The free end of the wire is threaded through the eye. The cerclage is tightened using the special tightener. Requires a device for tightening Eyed Wires, see 001262 and 001264.

- CWWE22** Orthopaedic Wire With Eyelet 22g x 12" Pack of 6
- CWWE20** Orthopaedic Wire With Eyelet 20g x 12" Pack of 6
- CWWE18** Orthopaedic Wire With Eyelet 18g x 12" Pack of 6

Wire Tightener For Eyed Wires

Used to tension eyed wires very tightly. The cerclage is finished by kinking the wire back against the eye.

- 001262** Wire Loop Tightener 125mm Long

Wire Tightener With Two Cranks

Use with single crank for eyelet wires. Use both cranks to tighten double loops.

- 001264** Wire Tightener With Two Cranks 240mm Long

Plaster Cutting

Simple action serrated jaw. Very robust and comfortable to use. Very efficient for removing bandages.

161405 Plaster Shears Bruns/Bohler 245mm Long

Plaster Spreaders

Cast spreader scaled to veterinary patients, to expand the initial cut made to remove a cast.

161410 Plaster Spreaders 230mm

Plaster Shears Stille

Very powerful compound action.

161406 Plaster Shears Stille 245mm Long

Biopsy Needles

Biopsy Needle	Patient Body Weight	Needle Gauge
Bone Marrow	<5kg	18g
	5-15kg	15/16g
	15-30kg	13g
	30-50kg	11g
	>50kg	8g
Cortical Bone	<5kg	11g
	5-15kg	8g
	>50kg	Trephine

Trephines can be found on page 17

Bone Marrow Biopsy - Jamshidi Type

In the Jamshidi Type Needle the integral stylet locks into the lumen of the needle preventing obstruction by debris. When the needle tip is in the desired location the stylet is removed and the sample aspirated.

The 11 gauge needle with the stylet removed may be used to take a 1.5mm approx. core of bone from tumours for typing.

XS15030-00 15g Disposable Illinois Style Bone Marrow Biopsy Needle

VI Jamshidi Type Range

Drive into a suitable site (wing of ilium, tuber ischium, proximal femur), pull back a little, withdraw stylet and aspirate. If there is no aspirate, replace stylet, push in further and repeat.

- BMBJV16** VI Jamshidi Type Disposable 16g
- BMBJV13** VI Jamshidi Type Disposable 13g
- BMBJV11** VI Jamshidi Type Disposable 11g
- BMBJV8** VI Jamshidi Type Disposable 8g

Bone Marrow Biopsy - Rosenthal

Stylet does not lock into position.

012509 Bone Marrow Biopsy Rosenthal 16g x 35mm

Intraosseous Infusion Needle 18g

Where vascular access is difficult, fluids and most drugs can be administered via this intraosseous infusion needle. This process is particularly useful in neonates and birds where blood vessels are very small.

The most common site is the proximal femur via the trochanteric fossa. An IV catheter should be placed as soon as practical. Also used as a small bone marrow aspiration needle in the Jamshidi style.

BMBJV18 Intraosseous Infusion Needle 18g

Table Top Stand For Hanging Limb Preparation

Suspension of a limb can provide significant benefits in both arthroscopy and other orthopaedic procedures. The shoulder joint is distracted and 360 degree access becomes available. Height 1.2m (48"). Great table-top stability and a cleat for tying of limb suspension ropes. The shaft can be dismantled for storage.

R463 Tabletop Stand For Hanging Limb Preparation

Multi Arm With Limb Brace Attachment

Safety need not be compromised to obtain accurately positioned radiographs. The Multi Arm can replace the human hand in the positioning and holding of limbs for both radiography, surgery and arthroscopy. Also useful for hands-free positioning of bronchoscopes and gastroscopes.

- Use cohesive bandage to attach limb.
- Three joints allow positioning at any angle.
- A single knob locks all three joints rigid.
- Clamp fixes device to virtually any operating or X-ray table.
- Double limb support for hip radiographs available as an option.
- As described by Kurt Schulz in Veterinary Surgery.

026000 Multi Arm - Includes Single Limb Support

020062 Double Limb Support for MultiArm

020065 Limb Brace Attachment For Multi Arm

MULTIARMSET Multi Arm Set - Contains 026000, 020062 and 020065

Veterinary Tissue Bank

Veterinary Tissue Bank is Europe's first tissue bank providing allograft tissues for companion animals. Bone allografts are available in various presentations & have many applications for use during procedures such as from TTA Rapid & joint arthrodesis to dealing with difficult non-union case.

Bone allografts are prepared from natural bone which has been processed to remove soft tissues, cells and bone marrow elements, and are freeze dried & irradiation sterilised after packing for sterility. The products are rehydrated with isotonic solution at the time of use to make like wet sand for better handling. The product is available off the shelf, ambient temperature storage and carries a few years of shelf life.

All products are subject to availability.

VTB products are only available in selected countries. Please check with Vi for availability.

Cancellous Chips

Cancellous Chips, prepared from trabecular bone, offer structural to a graft as well as providing a scaffold for osteoconduction. They are available in 3 different chip sizes for closer matching to defect size.

Useful in TTA Rapid, filling corrective osteotomies, fracture repair among other procedures. It is also useful for extending an autograft where harvesting has not produced sufficient quantity.

- C0101** Cancellous Chips Canine 2-4mm Chip Size Coarse 1cc
- C0103** Cancellous Chips Canine 2-4mm Chip Size Coarse 3cc
- C0105** Cancellous Chips Canine 2-4mm Chip Size Coarse 5cc

- C0201** Cancellous Chips Canine 1-2mm Chip Size Medium 1cc
- C0203** Cancellous Chips Canine 1-2mm Chip Size Medium 3cc
- C0205** Cancellous Chips Canine 1-2mm Chip Size Medium 5cc

- C0301** Cancellous Chips Canine <1mm Chip Size Fine 1cc
- C0303** Cancellous Chips Canine <1mm Chip Size Fine 3cc
- C0305** Cancellous Chips Canine <1mm Chip Size Fine 5cc
- FL105** Cancellous Chips Feline <2mm Chip Size Fine 1cc

DBM Products

Demineralised Bone Matrix (DBM), prepared from cortex, contains endogenous Bone Morphogenic Proteins (BMPs). Osteoinduction which is attributed to the presence of BMPs refers to the capability of inducing new bone formation when implanted in heterogenous site. DBM is used in procedures where fusion of bone or joint is needed such as in arthrodesis, spinal fusion and fracture repair.

DBM is available in 2 different particle sizes.

Graft Selection

Osteoinduction	—————>	DBM
Osteoconduction	—————>	Cancellous Chips
Osteoconduction and osteoinduction	—————>	DBM Putty/Fibres

Canine DBM 0.1 - 0.5mm

- FL205** DBM Feline 1.0mm 0.5cc

DBM putty in syringe

Ready to use, premix DBM which is injectable as well as mouldable.

- DBMPUTC1101** VTB DBM Putty 1cc (Premixed)

DBM Fibres

DBM fibres product, prepared from cortex, contains endogenous BMPS, hence, is osteogenic. In addition, the scaffold matrix offers superior osteoconduction for cell migration. The product is easy to rehydrate.

- CI201** Canine VTB DBM Fibres 1cc
- CI203** Canine VTB DBM Fibres 3cc
- CI205** Canine VTB DBM Fibres 5cc

NanoPaste Bone Substitute

Use to save time harvesting autograft or when the quality of the autograft is poor. NanoPaste will extend autograft.

The sterile presentation is an aqueous paste supplied in a syringe (2.5ml or 5.0ml). The paste may be injected directly into a defect where it conforms to fill the space. The paste is readily colonised by bone cells and acts as a scaffold encouraging penetration of host bone. The putty-like consistency means that the paste may be pressed onto bone where it sticks until resorbed.

Nano HA paste conforms to ENISO 13779-1:200 and ASTM F1185-88 for medical grade HA.

Applications include: joint arthrodesis, TTA Rapid, non-unions, delayed unions and filling spine cages.

- PAS2.5** NanoPaste Syringe 2.5ml
- PAS5** NanoPaste Syringe 5ml

Did you know Vi offers free online CPD?

The Vi website has you covered with a comprehensive range of CPD services and resources, all in one convenient location!

SURGERY GUIDES

You can find the following surgery guides on the Vi website:

- LigaFiba® Isotoggle
- LigaFiba® Lateral Button Suture
- Lateral Suture
- The Essentials of Fracture Management
- Fixation of Long Bone (Diaphyseal) Fractures Using Locking Plates and Screws
- Fixation of Long Bone (Diaphyseal) Fractures Using Non-Locking Plates and Screws
- Patellar Luxation
- TPLO (Tibial Plateau Levelling Osteotomy)
- TTA (Tibial Tuberosity Advancement)
- TTO (Triple Tibial Osteotomy)
- Linear External Skeletal Fixation
- BOAS Surgery

Vi Locking TPLO Starter Kit

Our range of TPLO kits are an excellent way to obtain the appropriate equipment which enables you to complete the TPLO procedure. Available with or without our battery powered TPLO saw.

Vi TPLO Starter Kit contains:

VILTPLOSAW	Vi Battery Powered TPLO Saw W/ Charger & Batteries	x1
001492	Slocum Type Rotation Gauges 5mm To 15mm	x1
001494	Bone Scribe (200mm Long)	x1
TPLOROT	TPLO Rotation Chart	x1
TPLO32	Slocum Guide 3.2mm (1/8") x 125mm Pins For TPLO 25mm Thread	x10
TPLOJIG	TPLO Basic Jig	x1
TPLOVI18	TPLO Blade Vi Pattern 18mm	x1
TPLOVI21	TPLO Blade Vi Pattern 21mm	x1
TPLOVI24	TPLO Blade Vi Pattern 24mm	x1
VILTPLO27L3	Locking TPLO Plate For 2.7mm Screws 3 Holes Proximal Left	x1
VILTPLO27R3	Locking TPLO Plate For 2.7mm Screws 3 Holes Proximal Right	x1
VILTPLO35BL4	Locking TPLO Broad Plate For 3.5mm Screws 4 Holes Proximal Left	x1
VILTPLO35BR4	Locking TPLO Broad Plate For 3.5mm Screws 4 Holes Proximal Right	x1
VILTPLO35L3	Locking TPLO Plate For 3.5mm Screws 3 Holes Proximal Left	x2
VILTPLO35R3	Locking TPLO Plate For 3.5mm Screws 3 Holes Proximal Right	x2

VILTPLOKITBAT Vi TPLO Locking Starter Kit With Battery Saw Power

VILTPLOKITNP Vi TPLO Locking Starter Kit has the same components as the kit list above excluding the VILTPLOSAW.

VILTPLOKITNP Vi TPLO Locking Starter Kit With No Power Equipment

Vi TPLO Starter Kit in Modular Plating Box contains:
Modular Plating Box and 3 Instrument Trays.

UDG27	Universal Drill Guide for 2.7mm Screws	x1
UDG35	Universal Drill Guide for 3.5mm Screws	x1
LSDG2724XL	Locking Screw Drill Guide For 2.7mm Screws XL	x1
LSDG35XL	Locking Screw Drill Guide For 3.5mm Screws XL	x1
TPLOJIG	TPLO Basic Jig	x1
TPLO32	Slocum Guide 2.3x125mm Pins F/ TPLO 25mm Thread	x3
001529	1.6mm Ellis Pin 85mm	x2
001492	Slocum Rotation Gauges 5-15mm	x1
001494	Bone Scribe 200mm	x1

VILTPLOKIT-2 Vi Locking TPLO Kit 2.0/2.4 No Power

VILTPO Locking TPLO Plates

Key design features:

- Contoured to the shape of the post TPLO proximal tibia.
- The most proximal screw is placed just below the stifle joint but the locking hole is angled distally by 3° for the 3.5mm plate, 2.0° for the 3.5mm broad plate, 1.5° for the 2.7mm plate and 2.3° for the 2.4mm and 2.0mm plate, avoiding intra-articular placement.
- 3-4 proximal locking screws provide maximal screw security in soft cancellous bone of the tibial plateau.
- Medial buttress removal is not necessary because of the anatomic contour of the plate and locking screws proximally.
- Distal segment allows placement of:
 - two non-locking screws including one for axial compression and maximal osteotomy stability.
 - then choice of one or two locking/non-locking compression screws per plate hole.
- Full range of plate sizes.
- Fully compatible with Vi /AO style twin-start screw locking thread profile.

VILTPO15L3	Locking TPLO Plate For 1.5mm Screws 3 Holes Left
VILTPO15R3	Locking TPLO Plate For 1.5mm Screws 3 Holes Right
VILTPO20L	Locking TPLO Plate For 2.0mm Screws 3 Holes Left
VILTPO20R	Locking TPLO Plate For 2.0mm Screws 3 Holes Right
VILTPO24L	Locking TPLO Plate For 2.4mm Screws 3 Holes Left
VILTPO24R	Locking TPLO Plate For 2.4mm Screws 3 Holes Right
VILTPO27L3	Locking TPLO Plate For 2.7mm Screws 3 Holes Left
VILTPO27R3	Locking TPLO Plate For 2.7mm Screws 3 Holes Right
VILTPO35SL3	Locking TPLO Plate Small For 3.5mm Screws 3 Holes Left
VILTPO35SR3	Locking TPLO Plate Small For 3.5mm Screws 3 Holes Right
VILTPO35L3	Locking TPLO Plate For 3.5mm 3 Holes Left
VILTPO35R3	Locking TPLO Plate For 3.5mm 3 Holes Right
VILTPO35BL4	Locking TPLO Plate Broad For 3.5mm Screws 4 Holes Left
VILTPO35BR4	Locking TPLO Plate Broad For 3.5mm Screws 4 Holes Right

Vi Locking TPLO Plates

These TPLO plates are available in 2.7mm, 3.5mm and 3.5mm broad, covering the vast majority of TPLO patients.

The locking holes are both convergent and divergent to maximise pull-out resistance and angled to avoid articular surfaces.

TPLO27LPCL	TPLO Plate Locking 2.7mm Left
TPLO27LPCR	TPLO Plate Locking 2.7mm Right
TPLO35LPCL	TPLO Plate Locking 3.5mm Left
TPLO35LPCR	TPLO Plate Locking 3.5mm Right
TPLO35BLPCL	TPLO Plate Broad Locking 3.5mm Left
TPLO35BLPCR	TPLO Plate Broad Locking 3.5mm Right
TPLO35MLPCR	TPLO Narrow Head Broad Locking Plate Right 3.5mm
TPLO35MLPCL	TPLO Narrow Head Broad Locking Plate Left 3.5mm

TPLO353555 Locking Plates

Right and left pre-contoured locking versions of the original TPLO353555 clover leaf plate developed by Phil Moses (Brisbane). All the screws are set to avoid the joint space and allow for optimal load sharing. Locking holes are all stacked so will accept a cortical screw if necessary, and there are two compression holes in the plate shaft.

TPLO353555RL	3.5mm DCP 55mm Length Locking Right
TPLO353555LL	3.5mm DCP 55mm Length Locking Left

TPLO Saw Blades Vi Pattern

Vi's updated TPLO Blade has been redesigned to further reduce friction and improve cut characteristics in all sizes.

TPLOVI12	TPLO Blade Vi Pattern 12mm
TPLOVI13.5	TPLO Blade Vi Pattern 13.5mm
TPLOVI15	TPLO Blade Vi Pattern 15mm
TPLOVI18	TPLO Blade Vi Pattern 18mm
TPLOVI21	TPLO Blade Vi Pattern 21mm
TPLOVI24	TPLO Blade Vi Pattern 24mm
TPLOVI27	TPLO Blade Vi Pattern 27mm
TPLOVI30	TPLO Blade Vi Pattern 30mm
TPLOVI34	TPLO Blade Vi Pattern 34mm

TPLO Saw Blade 9mm

Vi are pleased to offer a 9mm radial cut TPLO blade by Rita Leibinger. Standard triangular mount fitting.

TPLOBLEI09	Rita Leibinger 9mm TPLO Saw Blade
-------------------	-----------------------------------

Products are only available in selected countries. Please check with Vi for availability.

- TPLOS35BL** TPLO Plate Broad Slocum Style 3.5mm Left
- TPLOS35BR** TPLO Plate Broad Slocum Style 3.5mm Right

Pre-Contoured Slocum Style TPLO plates

Pre-contoured version of the standard 3.5mm Slocum Style plate. Pre-bent and polished to leave no stress riser. May need a final intra-operative tweak in some cases.

- TPLOS35RPC** 3.5mm Right Slocum Style Pre-Contoured Plate
- TPLOS35LPC** 3.5mm Left Slocum Style Pre-Contoured Plate

TPLO Instrumentation

XSTPLO Jig

Smallest TPLO Jig available from Vi. Design allows greater range of arm movement without causing intra-operative obstruction, with a single hinge to reduce bulk. Accepts 1.6mm and 2.0mm pins. 2.0mm Allen key included. Main body 60mm long.

- TPLOJIGXS.** XS TPLO Jig 60mm
- GRUBM4L4** Grub Screw M4 x 4mm

TPLO Jig

Basic TPLO jig, uses 3.2mm pins. Supplied with 2.5mm Allen key.

- TPLOJIG** TPLO Jig 120mm
- GRUBM5L5** Grub Screw M5 x 5mm

Standard Slocum Style TPLO Jig

Standard Slocum style TPLO jig. Pair of Alignment Bars and Allen key included.

Large Jig takes 3.2 pins, small Jig takes 2.4 pins. Pins not included.

- TPLOJIG/S.** Slocum Style Jig Standard (3.2mm Pin)
- TPLOJIG/SS.** Slocum Style Jig Small (2.4mm Pin)
- TPLOJIG/ROD35** Replacement Alignment Bars (Set of 2) Standard
- TPLOJIG/ROD27** Replacement Alignment Bars (Set of 2) Small
- ALLEN25** Allen Key Stainless Finish 2.5mm
- GRUBM5L5** Grub Screw M5 x 5mm

Slocum TPLO Guide Pin

End threaded negative pin. Drive directly into the tibia for jig attachment.

- TPLO32** Slocum Guide Pin 3.2mm Thread 25mm
- BCNET24** 2.4mm Bicortical Negative End Thread Pin 100mm Long

Slocum Rotation Gauges

The rotation gauges simplify the rotation procedure. The correct measurement, in millimetres, is read from the table and the appropriate gauge selected. The bone is marked using a bone scribe or an osteotome.

- 001492** Slocum Rotation Gauges

TPLO Rotation Gauge Divider Type

Alternative to the feeler gauge type measuring system. Spring loaded, adjusting the set screw fixes the points at any predetermined distance.

The tibial plateau may then be rotated the distance between the points.

- 001499** TPLO Rotation Gauge Divider Type 0-20mm
- 001499L** TPLO Rotation Gauge Divider Type Large to 40mm

TPLO Saw Blade Protractor

Use to accurately measure the tibial plateau slope. In addition the protractor is marked with blade outline to further assist in the planning of the TPLO procedure.

- TPLOPRO** TPLO Protractor

TPLO Rotation Chart

The rotation data for blades 12mm, 15mm, 18mm, 21mm, 24mm, 27mm, 30mm and 34mm are displayed on this double sided, laser marked, stainless steel gauge.

Also incorporates a drill gauge and a ruler for measuring screws and rotation.

TPLOROT TPLO Rotation Chart

Wedge Osteotomy Gauge Set 9° To 30°

Wedge gauges simplify the marking and cutting of the appropriate wedge. Using the parallel marking allows the surgeon to mark and cut a wedge with equal length borders, creating a better closure.

001493 Wedge Osteotomy Gauge Set

TPLO Reduction Forceps With Wire Guide

TPLO reduction forceps are designed to stabilise and compress across the osteotomy site. At the tip is a wire guide tube which allows a stabilising wire to be driven across the osteotomy at exactly the correct position without skidding or slippage at start up. The spin-lock allows full flexibility on positioning and compression. Available with the wire guide positioned on left or right side.

TPLORFR TPLO Reduction Forceps With Wire Guide Right

TPLORFL TPLO Reduction Forceps With Wire Guide Left

TPLORFSET TPLO Reduction Forceps With Wire Guide Set (As above)

Plate Holding/Drill Guide Forceps

Temporary fixation of the head of TPLO plates aids in positioning, while screws are placed. The spherical ball tip of these forceps seats well in the round holes of the plate, as well as in conventional DCP holes, whilst allowing drilling through the hole. Also very useful for plate osteosynthesis in fracture repair.

001225 1.5mm/2.0mm Plate Holding/Drill Guide Forceps 140mm Long

001226 2.4mm/2.7mm Plate Holding/Drill Guide Forceps 145mm Long

001227 3.5mm Plate Holding/Drill Guide Forceps 150mm Long

0012SET Plate Holding & Drill Guide Forceps Set of 3 (As above)

Very Large Fragment Forceps

Use where a wide gape is required or where the instrument needs to be further out of the surgical field. Spinlock version is very useful during CrCl surgery for repositioning the stifle prior to placement of a lateral suture, or holding osteotomies during closing wedge type procedures.

001202 Very Large Fragment Forceps 205mm Long

001203 Very Large Fragment Forceps With Spinlock 215mm Long

001203-L Very Large Fragment Forceps With Spinlock Left Handed

Extra Long Bending Levers

Longer plate benders (240mm) with 4mm and 6mm slots are designed with TPLO plates in mind to make bending and twisting much easier.

001288L 3.5mm/4.5mm Extra Long Bending Levers 240mm Long

LeiLOX CBLO Locking System

Combines the advantages of TPLO and TTA

CBLO (CORA Based Levelling Osteotomy) is a modern osteotomy technique to level the tibia plateau, similar to TPLO. However, CBLO addresses further challenges such as secondary (late) meniscal damage, overload of the caudal cruciate ligament, reduction of proximal anatomic axis shift and secondary translation as well as misalignment of the joint.

Multiaxial Locking and Titanium

The screws can be locked in 90° angle with a 12° deviation in any direction. This allows you to angle the screws away from vital structures. The robust star-drive screw head can be locked firmly into the plate.

All LeiLOX CBLO Implant are made of Titanium by Rita Leibinger for the best biocompatibility.

Anatomically Shaped Limited Contact Dynamic Compression Plates

The LeiLOX CBLO plates are contoured to match the anatomic shape of the bone. This makes it easier to place the plate in an optimal position.

The plate features limited contact dynamic compression to minimize vascular damage to the plated bone segment.

Double Compression

Two precisely designed compression holes enable a very tight compression of the osteotomy. This allows you to use a standard cortical screw as the cranio-caudal holding screw (instead of a headless compression screw).

Interchangeable 2.7 and 3.5mm Screws

Because the screwheads are identical, all CBLO plate sizes work with both the 2.7mm and the 3.5mm titanium CBLO screws. This offers flexibility and saves on inventory cost.

TPLO/CBLO Instrument Set

The TPLO/CBLO Instrument Set contains:

- 1x CBLO Instrument Tray
- 2x Drills (2.0 & 2.5mm)
- 3x 2 K-Wires (1.0, 2.5 & 3.0mm)
- 2x 2 Locking Drill Guides
- 2x TPLO Jigs
- 1x Screwdriver Handle
- 1x Screwdriver Shaft
- 1x Depth Gauge
- 1x Castroviejo Caliper
- 2x Compression Drill Guides

CBLO142010001 TPLO/CBLO Instrument Set

This product is only available in selected countries. Please check with Vi for availability.

The products on this page are only available in selected countries. Please check with Vi for availability.

Tibial Tuberosity Advancement (TTA)

To view our Surgery Guide on TTA, please scan the QR code below.

The TTA procedure developed by Tepic and Montavon is designed to bring the tibial plateau to sit at 90° to the straight patella ligament. This effectively neutralises the shear forces within the stifle under loading, making the stifle stable.

This is achieved by advancing the tibial tuberosity and stabilising the created defect using a titanium cage and plate. The cage is selected for both thickness and width. The implants are secured using titanium screws.

Titanium is very osteoconductive resulting in rapid healing. The use of stainless steel implants is not recommended.

Premium TTA Case

Storage and autoclave case for TTA equipment and implants.

TTABOX Premium TTA Case (Box & Insert only)

TTA Starter Kit with Forkless Plates

An alternative to the traditional forked plates. Secured using 2.4mm screws in the tibial crest, after the osteotomy and advancement have been made. Distal plate holes are secured using screws as appropriate. The rest of the technique is as per standard TTA.

Advantages:

- Position of the plate on the tibial crest and tibial diaphysis not fixed until after the osteotomy and advancement have been made – avoids difficult diaphyseal screw placement where the distal screws are too caudal on the tibia. Problem in small breeds and if this is missed in planning
- Tibial crest screws can be angled if needed
- Screw length of tibial crest screws can be individually selected for better fit
- Fewer screw holes in tibial crest than fork holes, helping reduce risk of tibial crest fracture

Full kit list is available upon request.

TTAFLPREM TTA Forkless Starter Kit

TTA Starter Kit

Full kit list is available upon request.

TTAPREM TTA Starter Kit in a Premium Aluminium Box

TTA Implants

TTA Cages

All cage sizes are secured using 2.4mm titanium screws.

- TTAC310** Titanium TTA Cage 3 x 10mm
- TTAC313** Titanium TTA Cage 3 x 13mm
- TTAC316** Titanium TTA Cage 3 x 16mm

Screwbox For Titanium TTA Screws

SHTTA242735 TTA Screwbox For 2.4mm, 2.7mm & 3.5mm Titanium Screws

Drill Bits - Standard Length - Round Shank

	Diameter	Overall length	Flute length
H090208	1.8mm	110mm	25mm
H090102	2.0mm	110mm	30mm
H090112	2.5mm	120mm	30mm

TTA Washers

Stackable titanium washers. Permit adjustments in 1mm increments.

PW24TI 2.4mm TTA Washer - Titanium

TTA Spacers

Placed under either cranial or caudal cage lugs to help re-align the quadriceps mechanism in cases of concurrent patellar luxation while performing the TTA procedure. Suggested maximum tibial tuberosity movement is 50%.

TTASP2	TTA Spacer Titanium 2mm
TTASP4	TTA Spacer Titanium 4mm
TTASP6	TTA Spacer Titanium 6mm
TTASP8	TTA Spacer Titanium 8mm

TTA Instrumentation

The TTA procedure does require some essential instruments. Positioning of the fork and cage is impossible without the following instruments.

TTA554	TTA Drill Guide (4 Hole)
TTA555	TTA Drill Guide (8 Hole)
TTA666	TTA Fork Holder
TTA444	TTA Spreader & 3mm, 6mm, 9mm, 12mm & 15mm Inserts
TTA333	TTA Plate Bender
TTA777	1.9mm Pins (Set of Two)
TTAPFO	TTA Plate & Fork Overlay
TTATAN	Common Tangent TTA/MMT Advancement Overlay
DG242735	Depth Gauge for 2.4/ 2.7 /3.5mm Screws

TTA Cage Forceps

Manipulating the TTA cage into the correct position can be an awkward part of the procedure, particularly the smaller sizes.

The TTA cage forceps grasp the cage firmly along the spine allowing it to be extracted from the case and placed into the tibial crest osteotomy.

TTAFCP TTA Cage Forceps

Forkless Plate Forceps

Holds the plate in position allowing the pilot hole to be drilled through the guide in the correct position, even after the osteotomy has been made.

TTAXFCP Forkless TTA Plate Forceps (145mm)

TTA Cuttable Cage Cutters

TTA cage cutters, which have narrow jaws designed to fit between the fins of cuttable cages. These cutters are only for TTA cages – not suitable for other implants due to the specially designed slim jaws.

TTACACUT TTA Cuttable Cage Cutter

TTA Mallet

The TTA Fork needs to be gently tapped home for maximum stability. The 140 gram Mallet is the ideal weight.

001323 Mallet 140g 155mm Long

TTA Spinlock Reduction Forceps

Increasing repair stability and reducing healing times can be achieved by compression of the distal tibial tubercle to the tibial shaft.

The spinlock reduction forceps are the right size and have the correct degree of spread for most TTA procedures.

001245SL TTA Spinlock Reduction Forceps 180mm

TTA Saw Guide

The TTA saw guide is useful where the surgeon would prefer to use a guide which can be positioned correctly to maintain the position and plane of the cut, allowing concentration on the saw. Secured in place with standard fragment forceps, the guide is removed for the final freehand curve at the distal end of the osteotomy.

Suitable for both right and left leg.

TTA999 TTA Saw Guide

TTA Rapid

TTA Rapid Starter Kit

Instrument and selected implant set, supplied in basket-type containers with dedicated racks. Implant set contains commonly used sizes as listed below.

TTA Rapid Starter Kit contains:

TTARNEWPREMINST contents as listed below, plus:

Implant Tray containing

6mm x 16mm Cage x1	10.5mm x 22mm Cage x1
7.5mm x 16mm Cage x1	10.5mm x 25mm Cage x1
7.5mm x 19mm Cage x1	12mm x 22mm Cage x1 (8 cages in total)
9mm x 19mm Cage x1	
9mm x 22mm Cage x1	

Screws

1x 8mm	4x 22mm	2x 34mm
2x 10mm	4x 24mm	2x 36mm
4x 12mm	4x 26mm	2x 38mm
4x 14mm	4x 28mm	1x 40mm
4x 16mm	4x 30mm	(54 Screws in total)
4x 20mm	4x 32mm	

2x 2.5ml Nanopaste

TTA Rapid - Instrumentation

TTA Rapid Bending Iron

This is used for contouring the cage ears for accurate placement and is common to the original and modified techniques. The use of other devices to create this contour is likely to result in damage to the cage ears.

TTARI32402000 TTA Rapid Bending Iron

TTA Rapid L-Shaped Guide

L-Shaped saw guide for the TTA Rapid technique.

TTARI32404000. TTA Rapid L-Shaped Saw Guide With Pin
TTARI32403010 TTA Rapid Saw Guide Pin

TTA Rapid Lever Spreader

These are used to open the osteotomy incrementally to the required width. The spreaders measure 1mm wider than their stated size to permit insertion of a cage beneath them.

- TTARI32400013 TTA Rapid Lever Spreader Double-Ended 3mm & 9mm Broad
- TTARI32401013 TTA Rapid Lever Spreader Double-Ended 6mm & 12mm Broad
- TTARI32401513 TTA Rapid Lever Spreader Double-Ended 13.5mm & 15mm Broad

TTA Rapid Universal Spreader

Permits incremental opening of the osteotomy in a very controlled manner. 160mm length.

- TTARI32408016 TTA Rapid Universal Spreader

TTA Rapid Screwdriver Handle

- TTAR247010300 2mm TTA Rapid Screwdriver Handle AO Coupling

TTA Rapid Screwdriver Inserts

- TTAR20342420 TTA Rapid Screwdriver Insert For 2.4mm Hex Screws AO Fitting 100mm Long
- TTAR20346424 TTA Rapid Screw Holding Sleeve For 2.4mm Hex Screws

TTA Rapid Plate Holding Forceps - Angled

Used to remove cages from implant trays.

- TTARI64005016 Plate Holding Forceps - Angled - 160mm Long

TTA Rapid Depth Gauge

- TTARI64273560 Depth Gauge For 2.4mm Screws 150mm Long - Reads To 40mm

- 001245SL Large Fragment Forceps With Spinlock 180mm Long

Plate Holding/Drill Guide Forceps

Used to snug the TTA Rapid cage ears against the medial cortex prior to drilling pilot holes.

- 001225 1.5mm/2.0mm Plate Holding/Drill Guide Forceps 140mm Long
- 001226 2.4mm/2.7mm Plate Holding/Drill Guide Forceps 145mm Long

The products on this page are only available in selected countries. Please check with Vi for availability.

TTA Rapid Petite

Petite uses 2mm screws, and has dedicated instrumentation including saw guide. Petite is designed for smaller patients such as cats and smaller dogs, where 3mm advancement is sufficient but 2.4mm screws in the tibial tubercle are not appropriate.

TTA Rapid Cages - Petite

For use with 2.0mm TTA Rapid Screws.

- TTARI32002308** TTA Rapid Cage Titanium 3/08
- TTARI32002310** TTA Rapid Cage Titanium 3/10
- TTARI32002313** TTA Rapid Cage Titanium 3/13

TTA Rapid Screws 2.0mm Titanium - Hex Head

Pilot drill - 1.5mm

- TTARSC2006** TTA Rapid 2.0mm Screw Titanium 6mm
- TTARSC2008** TTA Rapid 2.0mm Screw Titanium 8mm
- TTARSC2010** TTA Rapid 2.0mm Screw Titanium 10mm

Tiny TTA Rapid

Tiny TTA Rapid is designed for tiny animals – especially cats, toy dogs and dogs with short legs needing a wide advancement. The Tiny sawguide allows short osteotomies.

Tiny TTA Rapid Set

The Tiny TTA Rapid Set contains:

- 1 Sterilisation Tray with Lid
- 1 of each Tiny TTA Rapid Cage (12 total)
- 1 of each 2, 3 & 4mm Patella Spacer (6 total)
- 1 Rapid Luxation Plate Petite
- 5 of each 1.5mm Screw (6-20mm 40 total)
- 5 of each 2.0mm Screw (6-26mm 55 total)
- 1 Tibia Tappet Petite
- 1 Plate Holding Forceps
- 1 Tiny Sawguide with Pin & K-Wire
- 1 Depth Gauge
- 2 Drills (1.1 & 1.5mm)
- 2 Screwdriver Shafts (T6 & T8)
- 1 Screwdriver Handle
- 1 Drill Guide

TTARI32650000 Tiny TTA Rapid Set

Tiny TTA Rapid Cages

2.0mm cages use 1.5mm screws. 3.0mm cages use 1.5 or 2.0mm screws. 4.5 and 6mm cages use 2.0mm screws.

TTAR2/6	Tiny TTA Rapid Cage 2/6 Titanium

Rapid Luxation Plating System

This technique is suitable for dogs which do not have a cruciate ligament rupture but suffer from a patella luxation. Surgical protocol available on request.

Rapid Luxation Set

Set supplied with hex head screws.

The Rapid Luxation Set contains:

- Sterilisation Tray with Lid x1
- Each 2.0mm Screw (6-20mm) (24 in total) x3
- Each 2.4mm Screw (6-40mm) (54 in total) x3
- Each Rapid Luxation Plate (3 pieces in total) x1
- Each Patellar Spacers (18 pieces in total) x1
- Large Sawguide with Pin & K-Wire x1
- Petite Sawguide with Pin & K-Wire x1
- Tibia Tappet - Petite x1
- Tibia Tappet - Standard x1
- Screwdriver Handle x1
- Screw Driver Shaft 2.4 + 2.0 with Holding Sleeve x1
- Plate Holding Forceps x1
- Depth Gauge x1
- Drill Guide x1
- Drills 1.5 & 1.8 x1

TTARI32800000 Rapid Luxation Set

Patellar Luxation Plate - Titanium

- I32-8200-01** Rapid Luxation Plate 6 Hole Titanium 1.5mm Thick for 2.4mm Screws
- I32-8200-02** Rapid Luxation Plate 4 Hole Titanium 1mm Thick for 2.4mm Screws
- I32-8200-03** Rapid Luxation Plate Petite 4 Hole Titanium 1mm Thick for 2mm Screws

TTA Rapid Tibial Tappet & Patellar Luxation Spacers

Patellar Luxation in combination with TTA Rapid

When a dog suffers from a cranial cruciate ligament rupture with a simultaneous patellar luxation, this can be addressed by using the Rita Leibinger Tibial Tappet and Patella Luxation Spacers during a modified TTA rapid procedure. Surgical protocol available on request.

TTA Rapid Patellar Luxation Spacers

Patella luxation spacers are made from titanium.

- TTARI32801002L** TTA Rapid Patellar Luxation Spacer 3 Holes 2mm Height Left
- TTARI32801002R** TTA Rapid Patellar Luxation Spacer 3 Holes 2mm Height Right
- TTARI32801004L** TTA Rapid Patellar Luxation Spacer 3 Holes 4mm Height Left

- TTARI32803002R** TTA Rapid Petite Tiny Pat Lux Spacer 2 Holes 2mm Height Right
- TTARI32803003L** TTA Rapid Petite Tiny Pat Lux Spacer 2 Holes 3mm Height Left
- TTARI32803003R** TTA Rapid Petite Tiny Pat Lux Spacer 2 Holes 3mm Height Right
- TTARI32803004L** TTA Rapid Petite Tiny Pat Lux Spacer 2 Holes 4mm Height Left
- TTARI32803004R** TTA Rapid Petite Tiny Pat Lux Spacer 2 Holes 4mm Height Right

TTA Rapid Tibial Tappet

The uniquely-designed tibial tappet allows you to move the tibial tuberosity very accurately and test functionality of the new position during surgery, before fixating the screws. Once in the desired position you can fixate the patella spacers and screws.

- TTARI32407000** TTA Rapid Tibial Tappet Standard 2.4mm
- TTARI32407100** TTA Rapid Petite/Tiny Tibial Tappet 2.0mm

The products on this page are only available in selected countries. Please check with Vi for availability.

Triple Tibial Osteotomy (TTO) Instrumentation

To view our Surgery Guide on TTO, please scan the QR code below.

Dedicated instrumentation as designed by Warrick Bruce is required to make the procedure easier and to minimise errors.

Original TTO Instrumentation

- TTO006** Basic Osteometer
- TTO004** Saw Cutting Guide (Standard 62mm)
- TTO002** Wedgie Segment Manipulator

Revised TTO Instrumentation

- TTO011** Combination Osteometer/Sawguide
- TTO014** TTO Clasper
- TTO002** Wedgie Segment Manipulator
- TTO009** Enhanced TTO Instrument Set (All of above)

TTO Plates

The Standard TTO Plate is a cloverleaf TPLO Plate. Being positioned over the caudal 2/3 of the tibia the plate selected is typically a little smaller than is the case with a wedge TPLO. Use the free plate overlay for the final selection. Thicker plates are harder to contour and a selection of pre-contoured plates are available.

Lateral Suture Using LigaFiba®

LigaFiba® Lateral Sutures

Extreme strength, minimal stretch and good abrasion-resistance characteristics make LigaFiba® an ideal material for lateral sutures. The loop may be either tied or crimped at the end of the procedure. LigaFiba® for any given diameter is more than twice as strong as monofilament nylon. Lateral sutures are supplied with size-appropriate cruciate needle on one end and a straight round bodied needle at the other. Supplied sterile.

- LFLS75** 75 LigaFiba® Lateral Suture (300mm)
- LFLS150** 150 LigaFiba® Lateral Suture (500mm)
- LFLS250** 250 LigaFiba® Lateral Suture (500mm)
- LFLS500** 500 LigaFiba® Lateral Suture (600mm)

Double LigaFiba® Lateral Suture

Double strand presentation with no crimps. Supplied sterile.

- LFLS250D** Double 250 LigaFiba® Lateral Suture (500mm)

LigaFiba® Lateral Sutures With Crimp

LigaFiba® does knot securely but for maximum security requires 6 throws which creates a rather bulky knot. Crimping creates a secure, low profile, radio-dense join between the free ends of LigaFiba®. To make passing the LigaFiba® through the crimp a simple process the 25mm of LigaFiba® nearest the needle has been processed to minimise fraying. Always cut the lateral suture near the needle. Supplied sterile.

- LFLSCR75** 75 LigaFiba® Lateral Suture (300mm) + Crimp
- LFLSCR150** 150 LigaFiba® Lateral Suture (500mm) + Crimp
- LFLSCR250** 250 LigaFiba® Lateral Suture (500mm) + Crimp
- LFLSCR250D** Double 250 LigaFiba® Lateral Suture (500mm) with 2 Crimps
- LFLSCR500** 500 LigaFiba® Lateral Suture (600mm) + Crimp

LigaFiba® Scissors

LigaFiba® is so tough it is difficult to cut and will damage standard scissors. Use our special T.C. Scissors with a custom cutting edge.

- LFS140TC** LigaFiba® Scissors T.C. 145mm

Compound Action Crimpers For LigaFiba®

The compound action crimper delivers a pre-measured crimp with minimal effort. The jaw cut-outs prevent over crimping. These crimpers require the least effort of any Vi crimper available. The compound action crimper is suitable for all crimps apart from the thin-walled 10mm crimp for 50lb nylon which suits the standard simple action crimper.

- 091135M** LigaFiba® Compound Action Crimpers 245mm

LigaFiba® Crimps

Spare crimps for LigaFiba®. Please note that only the LigaFiba® Crimper is powerful enough for LigaFiba® Crimps.

- LFCRIMP75** Crimp for 75 LigaFiba®
- LFCRIMP150** Crimp for 150 LigaFiba®
- LFCRIMP250** Crimp for 250 LigaFiba®
- LFCRIMP500** Crimp for 500 LigaFiba®

Lateral Suture Using Nylon

Sterile CCL Packs

Monofilament line used as a lateral suture (De Angelis style) is an accepted CCL treatment method. Crimping is strongly recommended as the knots formed tend to be large, often causing seroma reactions and pain due to soft tissue irritation.

Packs are supplied sterile. Re-autoclaving is not recommended as this reduces the strength and increases the elasticity of the material.

Double sutures are supplied swaged on as a loop for use of the self-locking McKee/Miller knot (VCOT 1999;12:78-80) or with 2 crimps. One needle passes around the fabella allows two lines to be placed with less peri-fabellar damage.

Sterile Leader Line + Crimp + Needle

Procedure packs containing suture, swaged on needle and crimp.

- 091155** 50lb Nylon Line x 500mm On Swaged-On V. Small Fabella Needle + 10mm Crimp (Sterile)
- 091156** 80lb Nylon Line x 800mm On Swaged-On Small Fabella Needle + 12mm Crimp (Sterile)
- 091157** 100lb Nylon Line x 800mm On Swaged-On Medium Fabella Needle + 12mm Crimp (Sterile)

Double Leader Line + Needle + Crimps

For the application of double lines with the single pass of a needle.

- 091165** 50lb Double Line (500mm x 2 As Loop) On V Small Fabella Needle Plus 2 x 10mm Crimps (Sterile)
- 091166** 80lb Double Line (800mm x 2 As Loop) On Small Fabella Needle Plus 2 x 12mm Crimps (Sterile)
- 091167** 100lb Double Line (800mm x 2 As Loop) On Medium Fabella Needle Plus 2 x 12mm Crimps (Sterile)

Double Leader Line Loop on Needle

For use with McKee/Miller knot.

- 091160** 50lb Double Line (500mm x 2 As Loop) On V Small Fabella Needle
- 091161** 80lb Double Line (800mm x 2 As Loop) On Small Fabella Needle
- 091162** 100lb Double Line (800mm x 2 As Loop) On Medium Fabella Needle

Sterile Leader Line + Crimp

For use with separate Fabella (Cruciate) Needles.

- 091142** 10mm Tube Crimp + 500mm x 50lb Nylon (Sterile Pack)
- 091137** 12mm Tube Crimp + 800mm x 80lb Nylon (Sterile Pack)
- 091147** 12mm Tube Crimp + 800mm x 100lb Nylon (Sterile Pack)

Sterile Nylon Leader Line

Also useful for other ligament replacement procedures, e.g. hip toggle, collateral ligament repair.

- 091141 500mm x 50lb Nylon (Sterile Pack)
- 091139 800mm x 80lb Nylon (Sterile Pack)
- 091148 800mm x 100lb Nylon (Sterile Pack)

Crimps

Crimps supplied non-sterile.

- 091140 10mm Tube Crimp for 50lb Line
- 091136 12mm Tube Crimp for 80lb + 100lb Line
- 091133 14mm Tube Crimp Suitable For Nylon Over 100lb
- 091140/10 10mm Tube Crimp For 50lb Line Pack of 10
- 091136/10 12mm Tube Crimp For 80lb+100lb Line Pack of 10
- 091133/10 14mm Tube Crimp Suitable For Nylon Over 100lb Pack of 10

Fabella (Cruciate) Needles

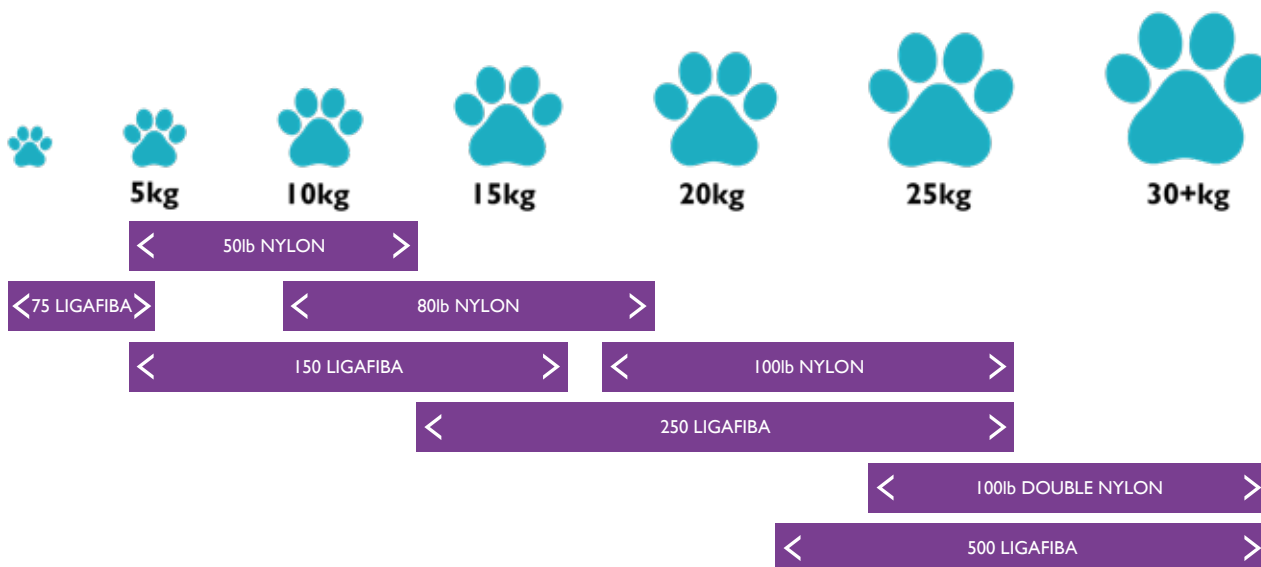

Most surgeons use our sterile procedure packs which include swaged on needle and appropriate crimps. Some surgeons prefer to use non swaged on needles although do bear in mind that leader line passed through a regular needle creates more damage as it passes through the femoro-fabella ligament. It is this ligament which is relied on for the holding power of the suture. Cruciate needles will pass through a hole created with a 2.7mm bone tunnel borer into the tibial crest.

- 091144VS Fabella Needle Very Small - Pack of 6 Has Regular Eye 16mm x 1.57mm
- 091144 Fabella Needle Small - Pack of 6 Has Regular Eye 21mm x 1.58mm
- 091145 Fabella Needle Medium - Pack of 6 Has Regular Eye 27mm x 1.58mm
- 091146 Fabella Needle Large - Pack of 6 Has Regular Eye 37mm x 1.57mm

Which line should I choose?

If a patient is above their ideal bodyweight, is particularly boisterous, or if there are concerns about post-operative compliance, a surgeon may chose to go up a size at their own discretion.

Instrumentation For Lateral Suture Crimping Forceps

Basic simple action crimper for monofilament line only.

091135 Crimping Forceps 195mm Long

Compound Action Crimper

Compound action crimper for monofilament line only, for both 10 and 12mm crimps. Delivers a more powerful crimp than the standard crimper.

091135C Compound Action Crimper 230mm Long

Compound Action Crimpers For LigaFiba®

The compound action crimper delivers a pre-measured crimp with minimal effort. The jaw cut-outs prevent over crimping. These crimpers require the least effort of any Vi crimper available. The compound action crimper is suitable for all crimps apart from the thin walled 10mm crimp for 50lb Nylon which suits the standard simple action crimper.

091135M LigaFiba® Compound Action Crimpers 245mm

Correct Crimping

✓ **Correct.**
Three evenly spaced crimps

✗ **Incorrect.**
Not enough crimps

✗ **Incorrect.**
Crimps too close to end of tube

Loop Tension Devices

Prior to crimping it is suggested that the loop be tensioned sufficiently to eliminate the anterior draw, but not enough to create an outward rotation. Many surgeons achieve this by hand but others may choose to use a tensioning device.

CCL Tensioning Device

Simple tension device requiring a pair of standard Gelpis.

091132P CCL Tensioning Device (Pair)

CCL Loop Tensioning

Leader line gripped by thumbscrew.

Does not require use of extra crimps - less wasteful.

Speed lock type action gives more 'feel' than ratchet type.

Jaws designed specifically for crimping system.

091132A CCL Loop Tensioner 175mm

Lateral Suture Tension Device

Ratchet based, it relies on the jaws pulling against crimps attached to the free ends of the loop. It is simple and effective but does require two extra crimps which are ultimately discarded.

091158 Lateral Suture Tensioner 170mm

Fixed Handle Bone Tunnel Borer

- 001070X Fixed Handle Bone Tunnel Borer 2mm
- 001073X Fixed Handle Bone Tunnel Borer 2.5mm
- 001071X Fixed Handle Bone Tunnel Borer 2.7mm
- 001072X Fixed Handle Bone Tunnel Borer 3.5mm

LigaFiba® Scissors

LigaFiba® is so tough it is difficult to cut and will damage standard scissors. Use our special T.C. Scissors with a custom cutting edge.

LFS140TC LigaFiba® Scissors T.C. 145mm

Heavy Duty Needle Driver

The large needles used for cruciate lateral suture placement, along with the force needed to pass them, will damage standard needleholders. A dedicated heavy duty TC needle driver kept with the cruciate kit will prove more cost effective, and improve grip on the needle.

091153 Heavy Duty Needle Driver With Tungsten Jaws 195mm Long

Training & Education

Our e-learning platform delivers a variety of technical and clinical educational material, in an engaging and interactive format.

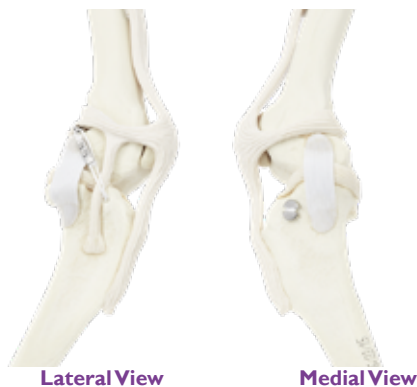

With a CPD certificate awarded upon successful completion of each module, the e-learning platform from Vi will help you to fulfil your annual CPD requirements.

LigaFiba® Isotoggle

To view our Surgery Guide on LigaFiba® Isotoggle, please scan the QR code below.

The Isotoggle suture is placed via bone tunnels across the stifle at isometric points. The use of isometric points maximises the range of movement of the stifle and protects the suture from repeated stretching and abrasion. The suture is anchored over buttons on the medial side.

- LFITS150TI** 150 Isotoggle Suture Set
- LFITS250TI** 250 Isotoggle Suture Set
- LFITS500TI** 500 Isotoggle Suture Set

Isotoggle Aiming Device - Adjustable Drill Guide

Useful for the placement of the femoral bone tunnel which can be more challenging than the tibial tunnel. Adjustable Drill Guide with an appropriately sized drill slider may be used to pre-determine the line of the tunnel and offer protection of the soft tissues. The arms of the guide have sufficient 'spring' in them so if pre-stressed the guide is self-retaining.

- ADJDG2035** Adjustable Drill Guide 175mm
- KWG10** K-Wire Guide For ADJDG2035

Isotoggle Consumables

Drill Bits

- H090102AS** 2.0mm Antiskid Drill (150) 100mm
- H090112AS** 2.5mm Antiskid Drill (250) 115mm
- H090106L** 3.5mm Round Shank Drill 180mm

Titanium Buttons

- TIBUT6H** Titanium Button 6mm 2 Holes
- TIBUT6S** Titanium Button 6mm 2 Slots
- TIBUT9H** Titanium Button 9mm 2 Holes
- TIBUT9S** Titanium Button 9mm 2 Slots
- TIBUT11H** Titanium Button 11mm 2 Holes
- TIBUT11S** Titanium Button 11mm 2 Slots

LigaFiba® Isotoggle Interference Screw

The LigaFiba® interference screw offers an alternative to tying over a button. The screw has a tapered, soft profile thread which jams the LigaFiba® into the bone tunnel.

- LFIS253518SS** Interference Screw 3.5mm Stainless 18mm
- LFIS354523SS** Interference Screw 4.5mm Stainless 23mm

Suture Screws

Suture screws are a self-tapping screw with an eyed head, designed to be used as a versatile, economic suture anchor. The thread pattern is the same as the equivalent type of cortical or cancellous screw.

Pre drill with the standard pilot for the screw size selected, screw in with the dedicated insertion tool.

The Suture Screw Set contains:

	Box and Insert for Suture Anchor Set (Not sold separately)	x1
SSITUN	Universal Insertion Tool for all Suture Screws	x1
SS2006	Suture Screw Cortical 2.0mm x 6mm	x2
SS2010	Suture Screw Cortical 2.0mm x 10mm	x2
SS2708	Suture Screw Cortical 2.7mm x 8mm	x2
SS2714	Suture Screw Cortical 2.7mm x 14mm	x2
SS3512	Suture Screw Cortical 3.5mm x 12mm	x2
SS3520	Suture Screw Cortical 3.5mm x 20mm	x2
SS4016	Suture Screw Cancellous 4.0mm x 16mm	x2
SS4024	Suture Screw Cortical 4.0mm x 24mm	x2
LF150500	LigaFiba 150 x 500mm (Sterile)	x1
LF250600	LigaFiba 250 x 600mm (Sterile)	x1
LF500600	LigaFiba 500 x 600mm (Sterile)	x1

SSITKIT	Suture Screw Set
SS2006	2.0mm Diameter 6mm Long 1.0mm Hole Cortical
SS2010	2.0mm Diameter 10mm Long 1.0mm Hole Cortical

SS4024	4.0mm Diameter 24mm Long 2.0mm Hole Cancellous
SSITUN	Universal Insertion Tool For All Suture Screws

Suture Anchor Pin

A threaded suture anchor is machined into the tip of a trochar pin. Immediately proximal to the suture anchor is a narrow break-off point. The construct is stable during axial drilling of the pin into bone. Once in position with the hole of the anchor just above the surface of the bone the shaft of the pin is rocked to and fro. The stainless steel undergoes work hardening and becomes very brittle, ultimately breaking off leaving the anchor in position ready for placement of sutures. The suture anchor pin is extremely easy to position and place without pre-drilling. Length of pin into the bone is (approx) 2.5mm - 12mm, 3.0mm - 14mm and 4.0mm - 20mm.

SAP2.5	Suture Anchor Pin 2.5mm Diameter 1.0mm Hole 17mm Suture Anchor Length 125mm Overall Length
SAP3	Suture Anchor Pin 3mm Diameter 1.0mm Hole 21mm Suture Anchor Length 127mm Overall Length
SAP4	Suture Anchor Pin 4mm Diameter 2.0mm Hole 26mm Suture Anchor Length 136mm Overall Length

LigaFiba® Tendon & Ligament Sutures

LigaFiba® is available in sterile single lengths for use in conjunction with any suitable suture anchor system.

LF150500	150 LigaFiba® x 500mm <15kg
LF250600	250 LigaFiba® x 600mm 15 - 30kg
LF500600	500 LigaFiba® x 600mm >30kg

Meniscus Surgery

Meniscus Surgery Set

Management of meniscal injuries has three phases, all of which will require special instrumentation.

- Exposure of the meniscus, particularly the caudal horn of the medial meniscus. This will require that the tibia is advanced and distracted relative to the femur.
- Examination of the meniscus for lesions. A visual examination is not enough. The surface of the meniscus should be probed for defects and tears. The circumferential attachments should be checked for integrity.
- Any lesions discovered must be treated/managed as appropriate.

The Enhanced Meniscus Surgery Set contains:

001112	Stifle Distractor (Spread: Min. 8mm, Max 30mm)	x1
001113	Small Joint Distractor 140mm Long 6mm Wide Tips	x1
06054	Vi Fine Stainless Steel Beaver Type Scalpel Handle 130mm	x1
05905	Fine Stainless Steel Blades Sm65 (Box of 25)	x1
103180	Halstead Mosquito Forceps Straight 5" 125mm - 1/2 Teeth	x1
001048	Mini Hohman Retractor 8mm Short Tip	x1
AR-17-11X	Meniscus Push Knife Knurled Stainless Handle	x1
AR-17-19X	Meniscus Hook Knife Knurled Stainless Handle	x1
001409	2mm Meniscus Probe Nerve Hook 2mm	x1
BX221250	Stainless Steel Box 220mm x 120mm x 50mm	x1
BXSIL2212	Silicone Insert for Box 220mm x 120mm	x1

001117 Enhanced Meniscus Surgery Set

The Meniscus Surgery Set contains:

001112	Stifle Distractor (Spread: Min. 8mm, Max 30mm)	x1
001408	Meniscus Probe 1mm / Nerve Hook 1mm	x1
06054	Vi Fine Stainless Steel Beaver Type Scalpel Handle 130mm	x1
05905	Fine Stainless Steel Blades Sm65 (Box of 25)	x1
103180	Halstead Mosquito Forceps Straight 5" 125mm - 1/2 Teeth	x1
001048	Mini Hohman Retractor 8mm Short Tip	x1
BX221250	Stainless Steel Box 220mm x 120mm x 50mm	x1
BXSIL2212	Silicone Insert for Box 220mm x 120mm	x1

001116 Meniscus Surgery Set

Meniscus Instrumentation

Hook Knife & Push Knife

These three hand-held knives can deal with most meniscal tears. Their low profile makes them suitable for both open and arthroscopic surgeries.

- AR-17-19XS** Hook Knife 150mm
- AR-17-19X** Hook Knife 225mm
- AR-17-11X** Push Knife 225mm

Stifle Lever

Exposure of the medial meniscus is never easy. Access is limited. The stifle levers are designed to fit the trochlea, while the atraumatic tip hooks behind the caudal tip of the tibial plateau. The levering action spreads the load over the surface of the trochlea, more effectively than a Hohman. Two sizes to cover most cases.

- 001115** Stifle Lever >20kg 225mm
- 001115S** Stifle Lever Small <20kg 165mm

Arthroscopic Stifle Lever VSTL

The arthroscopic stifle lever is finer and longer than the standard version, making it more suitable for arthroscopic surgery.

The good-sized white PTFE handle has a useful notch which aligns with the tip orientation of the lever. Not just for arthroscopy – useful in open arthrotomies as well.

Developed for stifle surgery by Ian Holsworth.

- AR-17-02** Arthroscopic Stifle Lever VSTL 280mm

Meniscus Probes

Used to probe the meniscus to check for tears, which may not be seen easily.

1mm – dogs up to 30kgs 2mm – dogs over 30kgs

- 001408** Meniscus Probe 1mm Tip 190mm
- 001409** Meniscus Probe 2mm Tip 220mm
- 001409A** Meniscus Probe 2mm Tip Heavy Pattern
- AR-17-10** Meniscus Probe 2.2mm Black Shaft For Arthroscopy 220mm

Toothed Halsteads

Very useful for grasping the meniscus.

- 103185 Halstead Mosquito Forceps 1/2 Teeth Cof 125mm
- 103180 Halstead Mosquito Forceps 1/2 Teeth Str 125mm

Meniscectomy Instruments

Purpose designed, the jaws of the Ligament Clamp have multiple small gripping teeth to combat synovial fluid slip. The T handle push knife is only sharp on the inner curve, not at the tips. Suitable for larger patients.

- 001107 Meniscectomy Knife 165mm
- 001110 Ligament/Cartilage Clamp 140mm
- 001100 Meniscectomy Instrument Set (As above)

Senn (Cats Paw) Retractor

- 833305 Senn Retractor Sharp (Cats Paw) 160mm
- 833310 Senn Retractor Blunt (Cats Paw) 160mm

Fat Pad Retractor

Visualisation of the medial meniscus is maximised by retraction of the fat pad. Previously this has been achieved by use of a Senn (Cats Paw) retractor. The fat pad retractor has the same clawed foot but has a much more practical means of holding the instrument.

- 001114 Fat Pad Retractor 180mm
- 00114S Fat Pad Retractor Small 180mm

Stifle Distractors

When closed, the tips of the Stifle Distractor overlap. This reduces the profile of the tips and minimises the chance of iatrogenic damage when inserting the device into the joint space.

Designed to separate the femoral component of the stifle from the tibia. For the best exposure, joint surfaces should move away from each other in a parallel fashion, exposing the meniscus in its natural state and minimally distorted by the examination.

Positioning:

- One tip is placed in the intercondylar notch.
- The other on the cranial intercondylar area.
- Neither tip should involve articular cartilage.
- Test distraction (by squeezing the handles) to find the exact point at which a full distraction will expose the meniscus.
- Engage the spinlock to open the joint.

001112/L Stifle Distractor Large Min Spread 10mm
Max Spread 40mm 210mm Long

001112 Stifle Distractor Min Spread 8mm Max Spread 30mm 190mm Long

001112S Stifle Distractor Small Min Spread 6mm Max Spread 20mm

001112XS Stifle Distractor Extra Small

Small Stifle Distractor

The small distractor is also useful as small local muscle and tissue retractors in and around canine joints e.g. elbow exploration. Total length 130mm.

001113 Small Joint Distractor/Retractor 6mm Wide Tips

Very Small Stifle Distractor

The very small distractor is extremely useful as a small joint retractor during the meniscal release procedure. It is used to open a small window, caudal to the medial collateral. Total length 140mm.

001113VS V Small Joint Distractor/Retractor 3mm Wide Tips

Miniature Stifle Distractor

Scaled-down version of the very small stifle distractor for use in small and miniature breeds. Same overlapping tip pattern shown in all Vi stifle distractors.

001113VSX Miniature Stifle Distractor 100mm

Spinlock Stifle Distractor

Alternative spinlock version of the ratcheted stifle distractors. Spinlocks avoid the slippage which can occur with ratchets, and allow incremental opening of the joint which is not dependant on the tooth pitch of a ratchet.

001113SL Spinlock Small Stifle Distractor 140mm 6mm Tips

001113VSSL Spinlock Very Small Stifle Distractor 140mm 3mm Tips

Gelpi Self Retaining Retractor

Measurement 'a' gives the depth of the tips.

Available as singles or sets of two.

- 001330** Gelpi Retractor 120mm Spread (a=20mm) 180mm Long
- 001330SL** Gelpi Retractor With Spinlock (a=20mm) 180mm Long
- 001330S** Gelpi Retractor Sharp Tips (a=20mm) 180mm Long
- 001331** Gelpi Long Reach (a=40mm) 200mm Long
- 001331L** Gelpi Very Long Reach (a=60mm) 200mm Long
- 001332** Gelpi Small 60mm Spread (a=15mm) 135mm Long
- 0013301** Gelpi Mini Flat 45mm Spread (a=15mm) 90mm Long
- 0013302** Gelpi Mini Curved 45mm Spread (a=15mm) 90mm Long
- 0013303** Gelpi Mini Curved 45mm Spread Blunt Tips 90mm Long

- 001330/2** Gelpi Retractors 120mm Spread (a=20mm) 180m Long Set of 2
- 001330SL/2** Gelpi Retractors With Spinlock(a=20mm) 180mm Long Set of 2
- 001330S/2** Gelpi Retractors Sharp Tips (a=20mm) 180mm Long Set of 2
- 001331/2** Gelpi Long Reach (a=40mm) 200mm Long - Set of 2
- 001331L/2** Gelpi Very Long Reach (a=60mm) 200mm Long - Set of 2
- 001332/2** Gelpi Small 60mm Spread (a=15mm) 135mm Long - Set of 2
- 0013301/2** Gelpi Mini Flat 45mm Spread (a=15mm) 90mm Long - Set of 2
- 0013302/2** Gelpi Mini Curved 45mm Spread (a=15mm) 90mm Long - Set of 2
- 0013303/2** Gelpi Mini Curved 45mm Spread 90mm Long Blunt Tips - Set of 2

Small Stifle Ronguers

Small ronguers with angled slim jaws, useful for work within the stifle to remove CrCL remnants or to apply tension to meniscal tissue prior to sharp resection.

001301 Small Stifle Ronguer 1.75mm Bite 140mm Long

Patellar Luxation

To view our Surgery Guide on Patellar Luxation please scan the QR code below.

Modular Osteotome With Ultra-Thin Interchangeable Blades & Diamond Rasp

PTFE osteotome handle which accepts a good range of blades plus a diamond rasp (not included in set). Blades are very thin (1.1mm) allowing fine cuts and reducing the incidence of breaking the block during block sulcoplasty procedures. Replacement T wrench and retaining screw are also available.

- 001380 Modular Osteotome With 7 Blades
- 001382 Modular Osteotome Replacement Blade 4mm
- 001390 Modular Osteotome Replacement Blade 5mm
- 001383 Modular Osteotome Replacement Blade 6mm
- 001384 Modular Osteotome Replacement Blade 8mm
- 001385 Modular Osteotome Replacement Blade 10mm
- 001386 Modular Osteotome Replacement Blade 12mm
- 001387 Modular Osteotome Replacement Blade 15mm
- 001388 Modular Osteotome Replacement Blade 20mm
- 001389 Modular Diamond Rasp 6mm
- 001380SCREW Spare Screw For Modular Osteotome
- TBHEX40 4.0mm T Bar Hex Driver

Gordon Coronoid Osteotome

Originally developed for surgery on the medial coronoid, its thin, sharp blade and narrow widths are making this tool increasingly popular amongst surgeons for block sulcoplasty.

- AR-17-30 Gordon Coronoid Osteotome 4mm
- AR-17-29 Gordon Coronoid Osteotome 2mm

Orthopaedic Hard Back Saw

Made from stainless steel. The stiff back helps to guide the saw.

- 001004 Orthopaedic Hard Back Saw

Adjustable Bone Saw

Useful for completing/squaring off the osteotomy, this saw comes complete with five, fine chrome plated blades. Blade length is adjustable from 40mm to 100mm. Handle length 130mm. Blade length 155mm.

- 001000 Adjustable Bone Saw With 5 Fine Blades
- 001001-A Spare Fine Blades Pack of 5 Chrome Plated
- 001000SS-A Adjustable Saw Blade Single Sterile
- 001002 Coarse Stainless Blade

Patella Saw

With standard sawblade including Allen Wrench 1.5mm.

- LEI23100590 Patella Saw
- LEI23100520 Patella Saw Replacement Blade
- LEI23100521 Patella Saw Allen Wrench

This product is only available in selected countries. Please check with Vi for availability.

Universal Sulcoplasty Rasp

Double ended rasp, 210mm long. Rectangular end for adjusting block sulcoplasties, triangular end for adjusting wedge sulcoplasties.

Improved tooth geometry gives more efficiency over standard rasps. Cuts on pull stroke only. The rectangular end has 2 fine and 2 medium surfaces, triangular has 2 fine surfaces.

001021 Universal Sulcoplasty Rasp 210mm Long

Rectangular Sulcoplasty Instruments

A rectangular sulcoplasty retains the maximum articular cartilage. Most standard osteotomes are too thick, tending to break up the block. The super slim 8mm osteotome minimises breakup. The rectangular rasp is designed to tidy up the corners of the sulcoplasty to maximise 'fit'.

001017 Super Slim Osteotome 8mm 180mm

001018 Rectangular Bone Rasp 210mm

Trochlea Rasp

Designed for deepening the trochlea groove. For larger breeds perform a wedge or block trochleaplasty using a hard backed saw. An accurately contoured trochlea is essential for a successful trochleaplasty. Articular cartilage is removed to be replaced by fibrocartilage. Total length 190mm.

001020 Trochlea Rasp 11mm max 5mm Min Diameter

001022 Trochlea Rasp Small 8mm max 3mm Min Diameter

Osteophyte Rasp

Most stifles requiring cruciate repair will exhibit some osteophytes. In some cases they may be bulky, necessitating removal. The osteophyte rasp is a small yet very effective rasp to keep in the cruciate set.

001019 Osteophyte Rasp

Corrective Osteotomy Sawguide System

Corrective osteotomy is a recognised procedure in the management of patella luxation, particularly in medium and large dogs. Positioning the osteotomy at the CORA (centre of rotation) can be a challenge. Creating an accurate osteotomy at the site is a further challenge. The osteotomy and sawguide system allows the surgeon to create accurate osteotomies positioned at the correct site.

TTO011 Osteometer/Sawguide

TTO013 Saw Guide Attachment Forceps 9½" 245mm

Vi Locking TPO/DPO Plates

The Vi TPO/DPO plates are similar to, but have larger footprints than, the Slocum style plates. They are available in both 2.7mm and 3.5mm sizes. Both feature divergent stacked locking holes on cranial and caudal sections to maximise implant security and a compression hole on the cranial portion.

The 2.7mm plates have three screw holes cranially and caudally.
The 3.5mm plate has four holes cranially and three holes caudally.

- 09930320L** 3.5mm TPO/DPO Locking Plate 20 Left
- 09930420R** 3.5mm TPO/DPO Locking Plate 20 Right
- 09930525L** 3.5mm TPO/DPO Locking Plate 25 Left
- 09930625R** 3.5mm TPO/DPO Locking Plate 25 Right
- 09930730L** 3.5mm TPO/DPO Locking Plate 30 Left
- 09930830R** 3.5mm TPO/DPO Locking Plate 30 Right
- 09940320L** 2.7mm TPO/DPO Locking Plate 20 Left
- 09940420R** 2.7mm TPO/DPO Locking Plate 20 Right
- 09940525L** 2.7mm TPO/DPO Locking Plate 25 Left
- 09940625R** 2.7mm TPO/DPO Locking Plate 25 Right

- 09940830R** 2.7mm TPO/DPO Locking Plate 30 Right

XL Locking Drill Guides

Extra-long locking drill-guides simplify working in deeper spaces, especially useful for TPO/DPO.

- LSDG2724XL** 2.7mm Locking Screw Drill Guide - Extra Long
- LSDG35XL** 3.5mm Locking Screw Drill Guide - Extra Long 45mm
- LSDG35XXL** 3.5mm Locking Screw Drill Guide - XXL 60mm

Hip Toggle Procedure

The hip toggle procedure is a well-established technique for the management of traumatic and unstable subluxation of the the coxo-femoral joint. Although somewhat invasive, it does have the advantage that by replacing the round ligament the hip has, postoperatively, a full range of movement.

However, the suture is placed into a very hostile abrasive environment and historically had a high failure rate. Newer materials have, to a degree, addressed this problem. LigaFiba® is spun Ultra High Molecular Weight Polyethylene. This is the same high wear material used for acetabular cups in Total Hip Replacement. For any given diameter, LigaFiba® is 2.5x stronger than the traditional monofilament nylon. In addition, the softer more flexible nature of the material allows a relatively larger implant to be passed along bone tunnels. LigaFiba® has, in addition, better wear characteristics than nylon.

The Hip Toggle has an 'eye' to hold the suture and is made from stainless steel 316LVM. Use the Adjustable Drill Guide to accurately place the hole in the femoral neck.

All sterile packs contain a titanium button for secure fixation of the suture. Available with monofilament nylon or braided LigaFiba®. LigaFiba® is easier to work with, is stronger and ties better. However, it is a braided material with higher infection risk, so the surgeon must pay close attention to aseptic technique. We recommend the use of an anti-bacterial adhesive drape for hip toggle surgery.

LigaFiba® Hip Toggles

TIBUT11H	Titanium Button 11mm 2 Holes (Non Sterile)

Hip Toggle Introducer

Use of a dedicated introducer facilitates the introduction of the 3mm toggle through the acetabulum into the pelvis.

Please note, only the 3mm toggle has an introducer. An introducer is not appropriate for the smaller sizes of hip toggle as the hole drilled in the acetabulum would be proportionately too large to accommodate the introducer. An over-large hole in a smaller patient would risk iatrogenic acetabular fracture. The smaller hip toggles are therefore inserted using an artery forcep or similar.

Notes on the use of the Hip Toggle system

1. Expose femoral head and floor of acetabulum via a cranio-lateral approach. Perform a trochanteric osteotomy if necessary
2. Clear soft tissues (mostly shredded round ligament) from acetabulum and fovea of femoral head
3. Drill a hole through the acetabular fossa (effectively the origin of the round ligament). Drill size required

3mm Toggle plus 250 LigaFiba® 4.5mm drill

3mm Toggle plus 80lb Nylon 4.8mm drill

2.5mm Toggle plus 250 LigaFiba® 4mm drill

2mm Toggle plus 150 LigaFiba® 2.7mm drill

Points 4, 5 and 6 – please note that the insertion tool is only supplied for 3mm toggles. For toggles smaller than 3mm it is recommended to use a pair of artery forceps for insertion of the toggle.

4. Load the toggle into the insertion tool (3mm toggle only). The 'long' end goes into the inserter tip. The suture is retained onto the inserter shaft by sliding the silicone ring over the toggle and inserter
5. Push projecting toggle into hole in acetabulum
6. Insert plunger and eject toggle into pelvic canal. Toggle should 'flip' out preventing pull out. Check toggle security
7. Drill a bone tunnel (2.5-3.5mm) from fovea exiting from proximal lateral femur
 - a. Use Adjustable Drill Guide for best results (ADJDG2035)
 - b. Visually assess positioning/drill placement
 - c. Drill from fovea to femur (requires severe external rotation of femur)
8. Pass free suture ends down the femoral neck tunnel from fovea to femur. LigaFiba® will require a suture puller or alternatively a folded loop of fine cerclage wire may be passed from lateral to medial to exit at the fovea. Pass the LigaFiba® through the loop and pull back. Check there are no soft tissues (usually joint capsule) interposed between head and acetabulum
9. Pass ends of the suture through holes in titanium button, pull tight and tie temporarily. Check that coxo-femoral joint has a full range of movement. Tie securely over button. Over-tightening is a technical error and will result in premature failure of the suture

Note: The implant always breaks within a few weeks of placement regardless of technique and material. The toggle provides temporary stability only. If it becomes necessary to remove the suture, locate the titanium button and remove both button and suture. It is not possible to retrieve the toggle which, lying extra-articularly, does not cause a problem. Complications/failure with the Hip Toggle system may be higher in giant breed dogs.

Hohman Retractors

A simple but multi-functional instrument, with a wide number of variations to cover different procedures, patients and surgeons' requirements.

Hohman Retractors With Short Tips 18mm & 12mm Blades

001041

These are the archetypal Hohman Retractors often described in text-books as 'Hohman'.

The 'standard' Hohman retractor shape and size.

Larger version at 240mm long is useful in larger dogs over about 20kg where more force is required for manipulation, and there may be more depth of overlying tissue.

Smaller version, 175mm long, is scaled down and useful in slightly smaller dogs or in smaller bones where less force is needed. Good for retracting fascia lata in CrCl procedures.

001041 Hohman Retractor 18mm Short Narrow Tip Total Length 240mm

001042 Hohman Retractor 12mm Short Narrow Tip Total Length 175mm

Mini Hohman 6mm & 8mm Blade With Short Tip

Ideal for careful retraction of soft tissue during the manipulation of smaller bones and fragments, aiding reduction of soft tissue devascularisation. Also allows delicate retraction of soft tissue for screw and wire placement.

8mm version is particularly good for long bones in the cat.

001047 Mini Hohman Retractor 6mm Short Tip 165mm Long

001048 Mini Hohman Retractor 8mm Short Tip 165mm Long

Micro Hohman 4mm With Short Narrow Tip

The smallest Hohman that Vi supply. Useful in very small procedures or patients. Also available in a version with a long narrow shaft to use with arthroscopic portals.

001049 Micro Hohman Retractor 4mm Short Tip 160mm Long

001049A Micro Hohman Retractor 4mm Short Tip
With Narrow Shaft For Arthroscopy 160mm Long

Hohman Retractor Broad With Short Narrow Tip

001045

Broad blade Hohman provides more effective retraction of large muscle masses than the standard version, with less focal pressure.

001045 Hohman Retractor 48mm Short Narrow Tip 260mm Long

001046 Hohman Retractor 24mm Short Narrow Tip 185mm Long

Hohman Retractor With Long Broad Tip

001043

Useful in and around the shoulder joint and other retraction situations when a blunt tip is desirable.

001043 Hohman Retractor 24mm Long Broad Tip 280mm Long

001044 Hohman Retractor 18mm Long Broad Tip 175mm Long

Mini Hohman Broad Blade with Narrow Tip

Suggested uses: Improving visualisation of and access to mid-diaphysis of cat and small dog bones and displacing ligaments and tendons in carpus/tarsus of larger patients.

001040 Mini Hohman 15mm Broad Blade 120mm Long

Hip Hohman

Developed for use in Total Hip Replacement but useful in any procedure requiring elevation of the femoral head. Multiple small teeth at the end lip of the instrument sit securely on the femoral neck outside the zone of articular cartilage.

Three sizes are available. Approximate guidelines are as follows:

Large	>30kg
Medium	10-30kg
Small	<10kg

001038 Large Hip Hohman 255mm Long 25mm Wide Blade

001037 Medium Hip Hohman 175mm Long 13mm Wide Blade

001036 Small Hip Hohman 125mm Long 8mm Wide Blade

0010300SET Hip Hohman Set of 3 (As above)

OCD Curette

Loose flaps of cartilage at the OCD lesion must be removed. The double ended OCD curette is designed to perform this task within the limited space available. Healthy fibrocartilage within the lesion should not be disturbed.

- 001030 OCD Curette 215mm Long
- 001032 OCD Curette Small 180mm Long

Combination Bone Rasp Set

The three interchangeable rasp blades offer a range of cutting surfaces, flat, round and 'putti' style. The handle has an ergonomic design which is easy to grip even when wet.

- 001015 Combination Bone Rasp With 3 Interchangeable Heads

Gigli

- 001514 Pair of Handles For Gigli Wire
- 001516 Gigli Saw 300mm
- 001517 Gigli Saw 500mm
- 001518 Gigli Wire Passer
- 001519 Gigli Wire Spool 10m

- 001515 Pair of Gigli Saw Handles

Goniometers

- HE-GONIO Femoral Neck Goniometer
- GONIO Goniometer 150mm
- GONIO2 Goniometer 300mm
- GONIO3 Goniometer 340mm

Femoral Head & Neck Excision Arthroplasty

Excision Arthroplasty Rasp

Designed specifically to remove any bone spurs following excision arthroplasty. Failure to remove bone spurs is the most common cause of problems with this procedure. Teeth cut on the back stroke.

001010 Excision Arthroplasty Rasp 170mm Long

Disarticulator

Disarticulator designed to elevate the femoral head for excision. Notch at the tip of the instrument engages and ruptures the Teres (round) ligament, which can be very difficult. Also useful in manipulation for the humeral head in OCD lesion procedures and investigation of elbow lesions.

001090 Small Disarticulator 145mm Long
001091 Large Disarticulator 195mm Long

Hatt Spoon

Alternative to the 'chip fork' style disarticulator, particularly for larger dogs. Spoon edge is sharp. Good-sized handle with a finer shaft for better balance.

001092 Hatt Spoon 230mm (17mm x 30mm Scoop)
001093 Hatt Spoon 230mm (12mm x 18mm Scoop)
001094 Hatt Spoon 230mm (7mm x 12mm Scoop)
00109SET Hatt Spoon Set of 3 (As above)

Training & Education

Our **e-learning platform** delivers a variety of technical and clinical educational material, in an engaging and interactive format.

With a CPD certificate awarded upon successful completion of each module, the e-learning platform from Vi will help you to fulfil your annual CPD requirements.

Arthroscopic Instrumentation

Arthroscopy Hand Instrument Set

Set of three arthroscopy instruments for examination and intra-articular surgery. The two hand held knives can deal with most meniscal tears, whilst the black shaft of the hook probe minimises reflection.

Arthroscopy Set Contains:

AR-17-19X

AR-17-11X

AR-17-10

- AR-17-SET** Arthroscopy Hand Instrument Set
- AR-17-19X** Meniscus Hook Knife Blade Knurled Stainless Handle
- AR-17-19XS** 3mm Meniscus Hook Knife Blade Knurled Stainless Handle 150mm
- AR-17-11X** Push Knife
- AR-17-10** Hook Probe 2.2mm, With Stainless Handle Black Shaft

External Stifle Distractor

Developed originally for arthroscopic use but also useful in open surgery on very tight osteoarthritic stifles. Improves visibility in the joint by reducing clutter.

- AR-17-01** Arthroscopic Distractor 2.5mm Pins 80mm
- AR-17-01/TPLO** Arthroscopic Distractor 3.2mm Pins 80mm

Arthroscopic Stifle Lever VSTL

The arthroscopic stifle lever is finer and longer than the standard version, making it more suitable for arthroscopic surgery.

The good-sized white PTFE handle has a useful notch which aligns with the tip orientation of the lever. Not just for arthroscopy – useful in open arthrotomies as well.

Developed for stifle surgery by Ian Holsworth.

- AR-17-02** Arthroscopic Stifle Lever VSTL 280mm

Arthroscopic Hand Instruments

Hook Probe

- AR-17-09S** Hook Probe 2.2mm With Silicon Handle

Banana Knife

- AR-17-05S** Banana Knife 2.7mm, with Silicon Handle

Curette

- AR-17-06S** Curette 2.7mm Curved With Silicon Handle

Ring Curette

- AR-17-07S** Ring Curette 2.7mm Small With Silicon Handle

Smilie Knife

- AR-17-11S** Smilie Knife 2.7mm With Silicon Handle

Hook Knife

- AR-17-19S** Hook Knife 2.7mm With Silicon Handle

Arthroscopic Hohman Retractor

001049A Arthroscopic Hohman 4mm

Milling Drill Designed by Van Ryssen & Van Bree

This hand-driven bur allows curettage of both cartilage and bone through the smallest working cannula. Much cheaper and easier than shaver systems.

I-17-822 Milling Drill For Arthroscopy Complete OD: 2.2mm WL: 12cm
I-17-821 Replacement Bur & Shaft

Gordon Coronoid Osteotome

Designed and developed by Ian Holsworth, this narrow osteotome is used for arthroscopic sub-total coronoidectomies.

AR-17-30 Gordon Coronoid Osteotome 4mm
AR-17-29 Gordon Coronoid Osteotome 2mm

2.7mm Instruments

2.7mm Instruments - working length 12cm with overstraining protection.

Alligator Grasping Forceps

AS-17-662 Alligator Grasping Forceps With Ratchet OD: 2.7mm

Universal Rongeur & Grasping Forceps

AS-17-632 Universal Rongeur & Grasping Forceps Fenestrated OD: 2.7mm

Biopsy & Spoon

AS-17-641 Biopsy & Spoon OD: 2.7mm

Shoulder Aiming Device

Developed and tested at the Veterinary Faculty of Vienna, Austria by Dr Lehman.

Due to the dense muscle mass in shoulder joints, creating a puncture for a working cannula is often quite difficult. If a clean puncture allowing access directly to the joint is not achieved the first time, the risk of a subsynovial oedema increases greatly.

The shoulder puncture system has been specifically designed to help eliminate this risk.

S140-2438F Aiming Device By Dr Lehman For The Canine Shoulder For 2.4mm Scope T140-2432 & Changing Rod I-17-028

Cannula Sets

I-17-755 Working Cannula Set 'Shoulder & Elbow' Designed By VAN BREE D:2.3 / 2.9 / 3.5mm; WL:3.5-5cm & 7-8 cm, Includes Sharp Trochar & Changing Rod

I-17-500 Working Cannula Set 'elbow' Designed By VAN BREE Consist of 3 Cannulas D:2.3/2.9/3.5mm; WL:3.5-5cm. Includes 1 Sharp Trochar & 1 Changing Rod (2.3mm)

I-18-518 Egress Cannula, With Sharp Trochar Stopcock ID 2.7mm WL 7cm

Hand Pressure Infusion Cuffs

AR-08-100 Pressure Infusion Cuff For 500-1000ml Complete With Pressure Gauge & Hand Pump Reusable

Camera Covers

DE-10-25 Camera Cover Disp Polyethylene 13 x 235cm Sterile Pack of 30
DE-10-25-SINGLE Single Camera Cover Disposable 13 x 235cm Sterile

SurgX FABRICANT
D'IMPLANTS
VÉTÉRINAIRES

Exclusively available at

We are delighted to introduce our exclusive partnership with Surg'X.

Surg'X offers the first angle-stable, anatomical titanium veterinary interlocking nail for the treatment of long bone fractures in small animals. Interlocking nails are the gold standard in human long-bone trauma, thanks to their biological and mechanical advantages over plates.

SurgX products are only available in selected countries. Please check with Vi for availability.

Implant and Instrument Sets

Cats and Small Dogs - Implant Set

Image for illustration purposes only. Correct contents of kit shown below:

The Cats and Small Dogs Implant Set includes:

- 18 most commonly used nail sizes
- 63 locking screws (2 to 3 per size)
- 26 bolts (1 per size)
- 3 sterilization containers, 2 modular trays and 1 screw rack

SXIS000110 Surg'X Interlocking Nail Small Starter Implant Set

Cats and Small Dogs - Instrument Set

The Cats and Small Dogs Instrument Set includes:

- 41 Instruments for nails 3.5 / 4 / 5
- 2 common instrument trays
- 1 Cats and Small Dogs instrument tray
- 2 sterilization containers

SXAS000120 Surg'X Small Instrument Set

Medium and Large Dogs - Implant Set

Image for illustration purposes only. Correct contents of kit shown below:

The Medium and Large Dogs Implant Set includes:

- 13 most commonly used nail sizes
- 64 locking screws (2 to 3 per size)
- 28 bolts (1 per size)
- 4 sterilization containers, 3 modular trays and 1 screw rack

SXIS000210 Surg'X Interlocking Nail Med/Large Starter Implant Set

Medium and Large Dogs - Instrument Set

The Medium and Large Dogs Instrument Set includes:

- 37 Instruments for nails
- 2 Common instrument trays
- 1 Medium and Large Dogs instrument tray
- 2 sterilization containers

SXAS000220 Surg'X Med/Large Instrument Set

Cats and Dogs All Sizes - Implant Set

Image for illustration purposes only. Correct contents of kit shown below:

The Cats and Dogs All Sizes Implant Set includes:

- 29 most commonly used nail sizes
- 99 locking screws (2 to 3 per size)
- 42 bolts (1 per size)
- 6 sterilization containers, 5 modular trays and 1 screw rack

SXIS000310 Surg'X Interlocking Nail All Size Starter Implant Set

Cats and Dogs All Sizes - Instrument Set

The Cats and Dogs All Sizes Instrument Set includes:

- 61 Instruments for nails
- 2 Common instrument trays
- 1 Cats and Small Dogs instrument tray
- 1 Medium and Large Dogs instrument tray
- 3 sterilization containers

SXAS000310 Surg'X All Size Instrument Set

Interlocking Nails

3.5mm Interlocking Nail

This nail is suitable for cats and small dogs.

SXIN35070	3.5mm Interlocking Nail 70mm
SXIN35078	3.5mm Interlocking Nail 78mm
SXIN35086	3.5mm Interlocking Nail 86mm

Plating Kits In Modular Plating Box (MPB) Concept

To view our Surgery Guide on 'The Essentials of Fracture Management' please scan the QR code below.

Locking Plate & Screw Kit

Our MPB locking kits contain plates, screws and required instrumentation.

- LS15STARDLPKITALLMPB** 1.5mm Locking Screw Star Head & DLP Plate Kit in MPB
- LS20STARDLPKITALLMPB** 2.0mm Locking Screw Star Head & DLP Plate Kit in MPB
- LS24STARDLPKITALLMPB** 2.4mm Locking Screw Star Head & DLP Plate Kit in MPB
- LS27STARDLPKITALLMPB** 2.7mm Locking Screw Star Head & DLP Plate Kit in MPB
- LS35STARDLPKITALLMPB** 3.5mm Locking Screw Star Head & DLP Plate Kit in MPB

Combined Dynamic Locking Plate Kits

Our combined DLP kits contain the most popular size combinations of DLP plates and combined screw caddies, which includes both star drive locking and star drive cortical screws.

- DLP15KIT-MPB** DLP Plating Kit 1.5 Mix Star Lock & Cort Screw Caddies
- DLP1520-MPB** DLP Plating Kit 1.5/2.0 Mix Star Lock & Cort Screw Caddies
- DLP152024KIT-MPB** DLP Plating Kit 1.5/2.0/2.4 Mix Star Lock & Cort Screw Caddies
- DLP2024KIT-MPB** DLP Plating Kit 2.0/2.4 Mix Star Lock & Cort Screw Caddies
- DLP2735KIT-MPB** DLP Plating Kit 2.7/3.5 Mix Star Lock & Cort Screw Caddies

Star Drive Cortical SelfTapping Kits

- CORTSTPKITSTAR152024MPB** 1.5/2.4mm Complete Self Tapping Star Drive Screw Cortical Kit
- CORTSTPKITSTAR27/35MPB** 2.7/3.5mm Complete Self Tapping Star Drive Screw Cortical Kit

Hex Head Cortical SelfTapping Kits

Our MPB self tapping cortical kits contain plates, screws and required instrumentation.

- CORTSTP152024MPB** 1.5/2.0/2.4mm Self Tapping Cortical Kit In MPB
- CORTSTP2735MPB** 2.7/3.5mm Self Tapping Cortical Kit In MPB

- LS35KITALL** 3.5mm Locking Screw Hex Head & Plate Kit in Prem Box

Cortical Self Tapping Kits In Premium Boxes

Kit featured is CORTSTP2735

Our self tapping cortical kits in anodised aluminium premium boxes contain plates, screws and required instrumentation.

- CORTSTP152024** 1.5mm/2.0mm/2.4mm Cortical Self Tapping Kit in Premium Box
- CORTSTP2735** 2.7mm/3.5mm Cortical Self Tapping Kit in Premium Box

1.0mm Plating Kit

Management of fractures in dogs weighing less than a kilo is very challenging. Even 1.5 and 2.0mm screws are too large. Metacarpals in even some medium size patients, require very small implants.

The range includes T-plates, compression plates and 5 different cuttable plates. Due to the small size, dedicated instrumentation is required.

- CORTSTP10** 1.0mm Plating Set in Premium Box

Cortical Kits In Stainless Box

Kit featured is CORTSTKIT2735

Our cortical and cortical self tapping kits in stainless box contain plates, screws and required instrumentation.

- CORTKIT1.5/2** 1.5mm/2.0mm Cortical Kit In Stainless Box

Cortical Self Tapping Kits In Stainless Box

- CORTSTKIT1.5** 1.5mm Cortical Self Tapping Kit In Stainless Box

- CORTSTKIT2735** 2.7/3.5mm Cortical Self Tapping Kit In Stainless Box

Locking Screw Sets

Available with either Hex (3.5mm only) or Star Drive Head.

- LS15STARKIT** 1.5 Star Drive Locking Screw Set
- LS20STARKIT** 2.0 Star Drive Locking Screw Set
- LS24STARKIT** 2.4 Star Drive Locking Screw Set
- LS27STARKIT** 2.7 Star Drive Locking Screw Set
- LS35STARKIT** 3.5 Star Drive Locking Screw Set
- LS35KIT** 3.5 Hex Drive Locking Screw Set

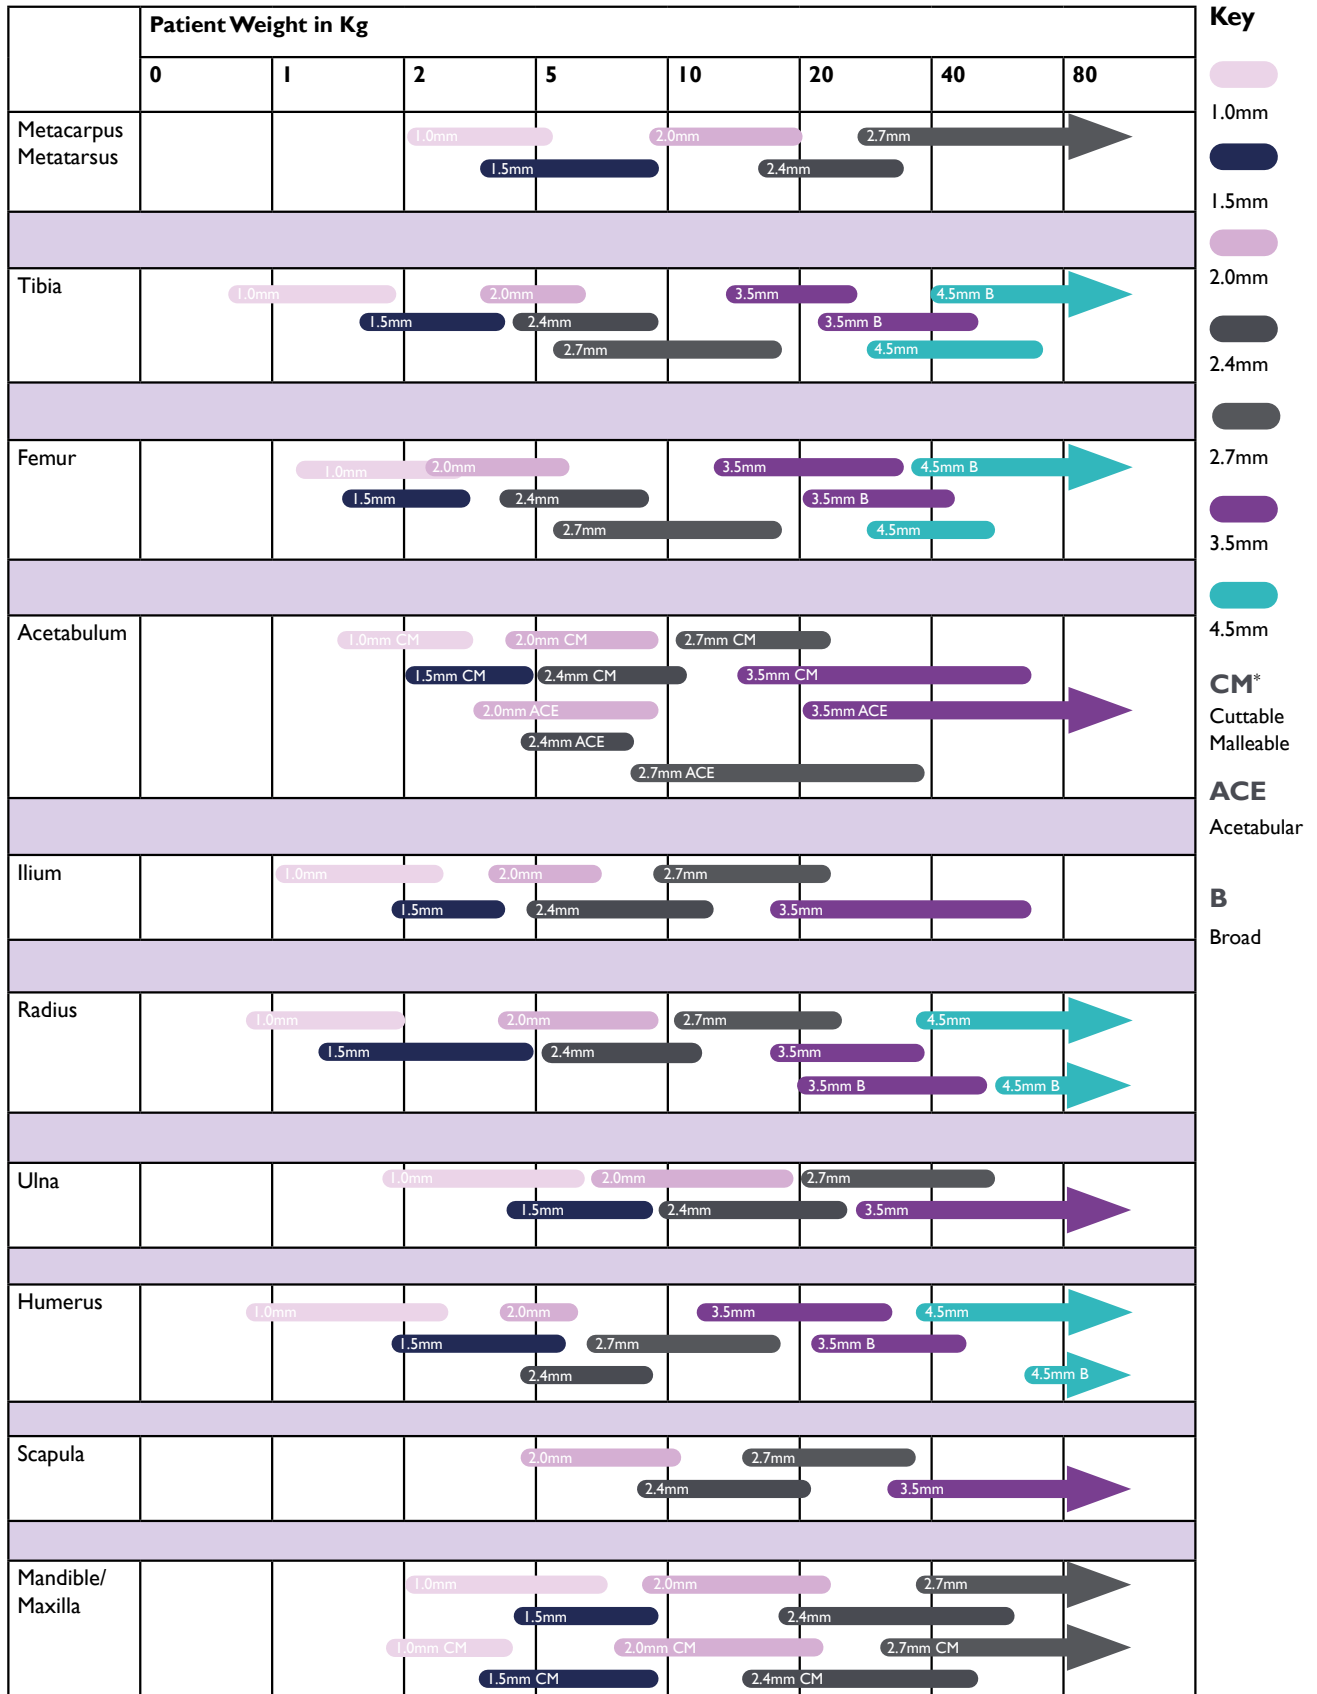

Full kit lists are available upon request.

Vi Plate Selection Chart

This chart is for guidance only and precise implant selection depends on a number of factors which are to be considered when assessing the fracture healing score and the mechanical behaviour of implants; this should be taken into account when making a definitive selection.

Scaled plate profiles are available in the catalogue or download the profiles from our website www.veterinary-instrumentation.co.uk

Vi plate profiles are also available via digital planning applications.

* Please note, Cuttable Malleable and Cuttable Malleable Locking Plates are not suitable for weight bearing fractures unless used in conjunction with other plates.

1.0mm Plates

1.0mm implants currently available consist of a range of straight plates, cuttable plates and an extensive range of T-Plates for radial fractures.

1.0mm Compression Plates

C100210	1mm Dynamic Compression Plate 10mm 2 Hole
C100418	1mm Dynamic Compression Plate 18mm 4 Hole
C100522	1mm Dynamic Compression Plate 22mm 5 Hole
C100626	1mm Dynamic Compression Plate 26mm 6 Hole
C100730	1mm Dynamic Compression Plate 30mm 7 Hole
C100834	1mm Dynamic Compression Plate 34mm 8 Hole
C100938	1mm Dynamic Compression Plate 38mm 9 Hole
C101042	1mm Dynamic Compression Plate 42mm 10 Hole

1.0mm Cuttable Plates

The Vi range of cuttable 1.0mm plates gives flexibility of management options for a number of different fracture scenarios. All of our 1.0mm Cuttable Plates have round holes.

Use the dedicated compound action implant cutters (001230) to cut plates.

CPI0390	Cutttable Plate 1.0mm 30 Holes 90mm Long
CPI0491	Cutttable Plate 1.0mm 23 Holes 91mm Long
CM10390	Cutttable Malleable Plate 1.0mm 30 Holes 90mm Long

1.0mm Cuttable Plates With Spaces

1.0mm cuttable plate with spaces to give the surgeon additional options. Versions are available with either 3mm or 4mm hole spacing.

CPI039027	Cutttable Plate 1.0mm 27 Holes 90 mm 3mm Spaces
CPI049120	Cutttable Plate 1.0mm 20 Holes 91mm 4mm Spaces

1.0mm T-Plates

The 1.0mm T-Plates have been designed by Vi to provide options for the repair of distal radial fractures in very small dogs and in cats. These fractures can be difficult to manage, partly because of the small sizes of the bones involved and partly because the area has relatively poor vascularity resulting in what is often a prolonged healing time.

T101016	1mm T Plate 16mm 5 Hole
T101018	1mm T Plate 18mm 5 Hole
T101020	1mm T Plate 20mm 6 Hole

Vi Dynamic Locking Plates

To view our Surgery Guide on 'Fixation of Long Bone (Diaphyseal) Fractures Using Locking Plates and Screws' please scan the QR code below.

- Combining compression and locking technology in one plate.
- 270° of locking thread engagement in plate for superior security.
- Compression section of hole allows up to 35° of screw angulation.
- Suitable for MIPO application - spade end for easier insertion, single full locking hole at opposite end allows drill guide to be used to aid plate manipulation.

Stacked Hole Locking Plates

Stacked Hole Locking Plates are designed with round threaded plate holes which will accept either locking screws (at a fixed 90 degree angle), or cortical screws (some angulation is possible when using cortical screws). If a combination of dynamic compression and locking function is required, please refer to our range of Dynamic Locking Plates.

2.0mm Plates With Stacked Locking Holes

LPSH200425	2.0mm Locking Plate 4 Hole 25mm Long

For scaled plate profiles, please view the Plate Profile chapter.

Cuttable Malleable Locking Plates

Vi Cuttable Malleable Locking Plates come into their own when pronounced contouring is necessary. They are well suited to situations where bone thickness or bone quality makes application of more conventional implants challenging, such as complicated pelvic fractures, as well as situations where mono-cortical application is desirable. With locking implants intimate bone contact is desirable, however, this is not essential.

The low profile makes these implants useful for craniomaxillofacial surgery and for other areas with limited soft tissue coverage. Manufactured from stainless steel grade 316LVM, they are stiffer than titanium implants of similar dimensions, but are still cuttable with standard implant cutters offering good versatility.

Use should be reserved for low load applications or when load sharing is possible between these and other implants such as with double plating techniques or when load sharing is possible with the bone. Use to span large defects is not recommended.

Contouring can be achieved with the appropriately sized bending levers or roller-style bending pliers. Cutting of these plates can be performed using an appropriately rated Implant Cutter.

Please note, Cuttable Malleable Plates and Cuttable Malleable Locking Plates are not suitable for weight bearing fractures unless used in conjunction with other plates.

CM15LOCK	1.5mm Cuttable Malleable Locking Plate 15 Holes 74mm Long
CM20LOCK	2.0mm Cuttable Malleable Locking Plate 15 Holes 103mm Long
CM24LOCK	2.4mm Cuttable Malleable Locking Plate 15 Holes 125mm Long
CM27LOCK	2.7mm Cuttable Malleable Locking Plate 15 Holes 148mm Long
CM35LOCK	3.5mm Cuttable Malleable Locking Plate 15 Holes 205mm Long

LokRod™ Plates

The LokRod™ Plate was conceived and designed by David Strong MRCVS. LokRod™ Plates may prove useful as an alternative for more traditional fixation modalities, particularly in the management of feline comminuted long bone fractures with only small proximal and distal fragments.

LokRod™ Plates must be used with locking screws. It is mechanically stronger to place the implant as close to the functional axis of the bone as possible, so it is advised to have the underside of the plate holes snugged up to the bone as close as possible. Spanning of the whole bone reduces adverse screw loading and will improve implant life as well as reduce the chances of bone splitting at these sites.

The chamfered tip enables easier MIPO insertion, and the small hole will engage a wire or the tips of reduction forceps to aid positioning. The cylindrical shaft minimises impact on surrounding soft tissues and helps reduce peak loading on the screw-plate and screw-bone interfaces.

Dynamic Compression Plates

To view our Surgery Guide on 'Fixation of Long Bone (Diaphyseal) Fractures Using Non-Locking Plates and Screws' please scan the QR code below.

Still a mainstay of veterinary orthopaedics, the DCP allows axial compression across the fracture line where desirable and appropriate. The use of the corresponding screw size, and correct sized Load Neutral Drill Guide for pilot hole placement, is essential to achieve axial compression.

ASYM[®] Plates

Plate design combining the established principles of round hole and compression plates. These plates are particularly suitable for a fracture or osteotomy scenario where one fragment is significantly smaller, (more distal/proximal) than the other. The round holes provide greater screw stability, and allow for more screws to be placed, in the smaller fragment, whilst compression can still be applied from the longer segment.

Cutttable Plates

Available in 1.0mm to 3.5mm sizes, the versatility of these plates lies in their close hole spacing, and they can be cut to length intra-op. They are not as stiff or as strong as compression plates of the equivalent size, so they are often used in conjunction with other fixation methods e.g. in combination with IM pinning, double plating including stacked plating, edge-loaded, or where elastic osteogenesis is considered advantageous.

Please see page 83 for the 1.0mm range of Cuttable Plates.

Cutttable Plates Standard Spacing

CM35LOCK	3.5mm Cuttable Malleable Locking Plate 15 Holes 205mm Long

Please note, Cuttable Malleable Plates and Cuttable Malleable Locking Plates are not suitable for weight bearing fractures unless used in conjunction with other plates.

For scaled plate profiles, please view the Plate Profile chapter.

Round Hole Plates

A traditional style of plate that may still have useful applications where budget is a concern. Also, may be useful where axial compression is not desirable or achievable, the round holes may provide a more stable screw/plate interface and the closer hole spacing can be useful for small fragments. More modern plating solutions may be preferable.

T-Plates

T-Plates are mainly used for distal radial fractures, but may also be useful in management of cranial, pelvic or certain scapula fractures. Locking T plates offer inherently better angular stability, which can be useful when managing small fragments.

Combi T-Plates

The Vi Combi T-Plates have been created as an extension of our current T-Plate range. The general shape of the plate is very similar, and this plate comes with the added benefit of locking technology. There are stacked locking holes in the distal end of the plate and dynamic locking holes in the shaft.

Key Features and Benefits:

- Locking construct increases stability
- Stacked locking hole allows placement of either a locking or non-locking screw
- Dynamic Locking holes in proximal section
- K-wire hole
- Available in a range of lengths
- Manufactured from Stainless Steel

Supracondylar Plates

Supracondylar femoral fractures in mature animals can be very difficult to repair. Small distal fragment size makes placement of sufficient implants a challenge, and there are often multiple small fragments in the supracondylar area. The forces acting on the distal femur are complex requiring a special plate to neutralise them. The original plates were developed by Mark Glyde using finite element analysis and an extra long version for cats has been developed in conjunction with Sorrel Langley-Hobbs.

Supracondylar Osteotomy Plates (SCOP)

Angular correction of the distal femur by means of a supra-condylar osteotomy (distal femoral osteotomy/DFO) is an accepted technique for correction of patella luxation in medium and large dogs with a limb alignment deformity. The distal femur is a difficult area over which to appropriately contour a plate and place sufficient screws. Using finite element analysis (FEA), Mark Glyde designed a preformed plate specifically for this area. Our SCOP plates feature thinning to the proximal end and smoothing to cranio-distal edge over which there is high motion during stifle flexion/extension.

Acetabular Plates

Accurate repair of fractures of the acetabulum is essential if full function is to be restored and long term arthritic changes are to be avoided. Ten sizes are available. These round-holed plates are pre-contoured three dimensionally to ensure a good fit.

Carpal Arthrodesis Plates

Our comprehensive range of plates for carpal arthrodesis take into account the challenges of this procedure and are designed for the dorsal approach.

- Appropriately sized and spaced screw-holes proximally and distally.
- Sufficient strength through the mid-portion.
- Thinning to the distal portion reducing stress riser effects and aiding skin closure.

Tarsal Arthrodesis Plates

Our comprehensive range of plates for tarsal arthrodesis take account of the challenges of this procedure. Plates are available for both the medial and dorsal approaches. Medial plates are available either with or without the T4 slot, and a titanium medial plate is available in one size. Plate angulation is set to match the normal standing angles of the target patient population.

Our original range of medial pantarsal arthrodesis plates were developed from custom implants supplied to Malcolm McKee, and improvements subsequently have been made to this original design. The Dorsal Pantarsal Arthrodesis Plate was developed in collaboration with Noel Fitzpatrick and allows the surgeon to benefit from the advantages of dorsal placement, whilst minimising the risks of failure.

Dorsal Pantarsal Arthrodesis Plates

Feline Dorsal Pantarsal Arthrodesis Plate

I52941 Feline Dorsal Pantarsal Arthrodesis Plate 2.0mm/2.0mm

Combi Canine Pantarsal Plates

The Vi Combi 2.7/3.5mm Canine Pantarsal Arthrodesis Plate has been created as an extension of our current Pantarsal Arthrodesis Plates range. Plate shape and standing angle have been carried over from the existing range due to the positive outcomes in surgery over the past 20 years. However, this plate comes with the added benefit of locking technology.

Developed in partnership with leading Orthopaedic Veterinary Surgeons, the plate has been carefully modelled against real life CT scans. A successful design has been achieved through the angling of the distal dynamic locking holes. This design feature was focussed on ensuring the best possible screw projection for maximum bone capture of the metatarsals in the majority of patients.

Key Features and Benefits:

- Locking construct increases stability.
- Stacked locking hole allows placement of either a locking or non-locking screw.
- Dynamic Locking holes in proximal section.
- Angled dynamic locking holes in distal section to allow screw projection through maximum number of metatarsals.
- Angled T4 slotted hole with locking hole at the proximal end of the slot.
- Distal section tapered to follow shape of metatarsals and reduce bone stress.
- Three 1.5mm K-wire holes.
- Available in left and right configuration.

I52913-T4COMBI 2.7/3.5mm Combi Canine Pantarsal Plate Left

LeiLOX 1.5/2.0 Micro Locking System

1.5/2.0 Osteosynthesis Locking Set Titanium

Contains:

- 1x Tray for Implants and Instruments with Lid
- 1x Locking Plate of each style (28 pcs. total)
- 5x of each 1.5 Locking Screw (5-24mm, 70 pcs. total)
- 5x of each 2.0 Locking Screw (5-30mm, 85 pcs. total)
- 2x Screwdriver Shafts
- 1x Screwdriver Handle
- 2x 2 Locking Drill Guides
- 1x Depth Gauge
- 2x Drills (AO, 1.1 and 1.5)
- 1x pair of Bending Irons

LEILOX142-1520-00 LeiLOX Titanium 1.5/2mm Micro Fracture Locking Plate Kit

1.5 Locking Plate Titanium

5mm wide, 1.5mm thick.

- LEILOX142-0215-04** LeiLOX Titanium 1.5mm Locking Plate 4 Hole 25.5mm
- LEILOX142-0215-05** LeiLOX Titanium 1.5mm Locking Plate 5 Hole 32.5mm
- LEILOX142-0215-06** LeiLOX Titanium 1.5mm Locking Plate 6 Hole 39.5mm
- LEILOX142-0215-07** LeiLOX Titanium 1.5mm Locking Plate 7 Hole 46.5mm
- LEILOX142-0215-08** LeiLOX Titanium 1.5mm Locking Plate 8 Hole 53.5mm
- LEILOX142-0215-09** LeiLOX Titanium 1.5mm Locking Plate 9 Hole 60.5mm
- LEILOX142-0215-10** LeiLOX Titanium 1.5mm Locking Plate 10 Hole 67.5mm

1.5 Locking Y-Plate Titanium

5mm/11mm wide, 1.5mm thick.

LEILOX142-0215-805 LeiLOX Titanium 1.5mm Y-Locking Plate 5 Hole 33mm Long

LeiLOX 1.5mm Locking Screws Titanium

For LeiLOX Locking System. Self-tapping. Requires Star Drive T6 insert.

- LEILOX245-415-05** LeiLOX Titanium 1.5mm Locking Screw 5mm
- LEILOX245-415-06** LeiLOX Titanium 1.5mm Locking Screw 6mm
- LEILOX245-415-07** LeiLOX Titanium 1.5mm Locking Screw 7mm

Shaft Screws

4.5mm Shaft Screws for HIF

We offer a range of 4.5mm shaft screws specifically designed to be used as trans-condylar stabilising screws. Note that the 4.5mm shaft screws are significantly stronger than a standard 4.5mm cortical screw.

SHSC4532	Shaft Screw	32mm
SHSC4534	Shaft Screw	34mm
SHSC4536	Shaft Screw	36mm
SHSC4538	Shaft Screw	38mm
SHSC4540	Shaft Screw	40mm
SHSC4542	Shaft Screw	42mm
SHSC4544	Shaft Screw	44mm

Please note that a tap is required for the shaft screws. It is also recommended that an insert sleeve is used to centre the pilot hole in the far condyle.

COU4565QR	Quick Release Countersink For 4.5mm/6.5mm Screws AO Fit
COU4565T-A	T Bar Countersink For 4.5mm/6.5mm Screws
DRILLSTOP	Drill Stop Set In Stainless Case
SDH4500	Hex Screwdriver For 4.5mm/5.5mm/6.5mm Screws
H090105S	3.2mm (Pilot) Drill Round Shank
S090105S	3.2mm (Pilot) Drill AO Quick Release
H090108S	4.5mm (Clearance) Drill Round Shank
S090108S	4.5mm (Clearance) Drill AO Quick Release
TS00045	4.5mm Cortical Tap Quick Release - Handle Required
ADJ45	Adjustable Drill Guide for 4.5mm Drills
SL4532	Insert Sleeve 4.5x3.2mm

Cortical Nuts

N45	4.5mm Cortical Nut Stainless Steel Non Sterile
CN45-A	4.5mm Cortical Nut UHMPWE - Sterile

Condyle Clamp

001080 Condyle Clamp Stainless Steel

Titanium Mesh System

Based on a human product, our Titanium Mesh is cuttable and is mouldable in three-dimensions, making it very adaptable and ideal for cranial fractures and in the management of fractures of other flat bones that are not load bearing.

The mesh has also been used to augment bone cement in joint replacement surgery.

The screws are tapered, making them self-drilling and self-tapping, however, a drill of 1mm diameter or less may be used to start the screws and may help reduce the chances of cracks forming if used close to the fracture lines.

The screws are made of titanium to avoid any problems arising from mixed metallurgy and feature a low profile cruciate head designed for use with the cruciate screwdriver with AO quick release fitting.

A 5mm or 7mm length appears to be the most useful for our species.

TIMESH405006	Titanium Mesh 40mm x 50mm 0.6mm Thick
TIMESH506006	Titanium Mesh 50mm x 60mm 0.6mm Thick
TIMESH607006	Titanium Mesh 60mm x 70mm 0.6mm Thick
TIMESHSCREW2005	Titanium Mesh Screws Tapered 2.0mm x 5.0mm Length Cruciate Head
TIMESHSCREW2007	Titanium Mesh Screws Tapered 2.0mm x 7.0mm Length Cruciate Head
TIMESHSDI	Screwdriver Insert for 2mm Cruciate Titanium Mesh Screws. AO Quick Release

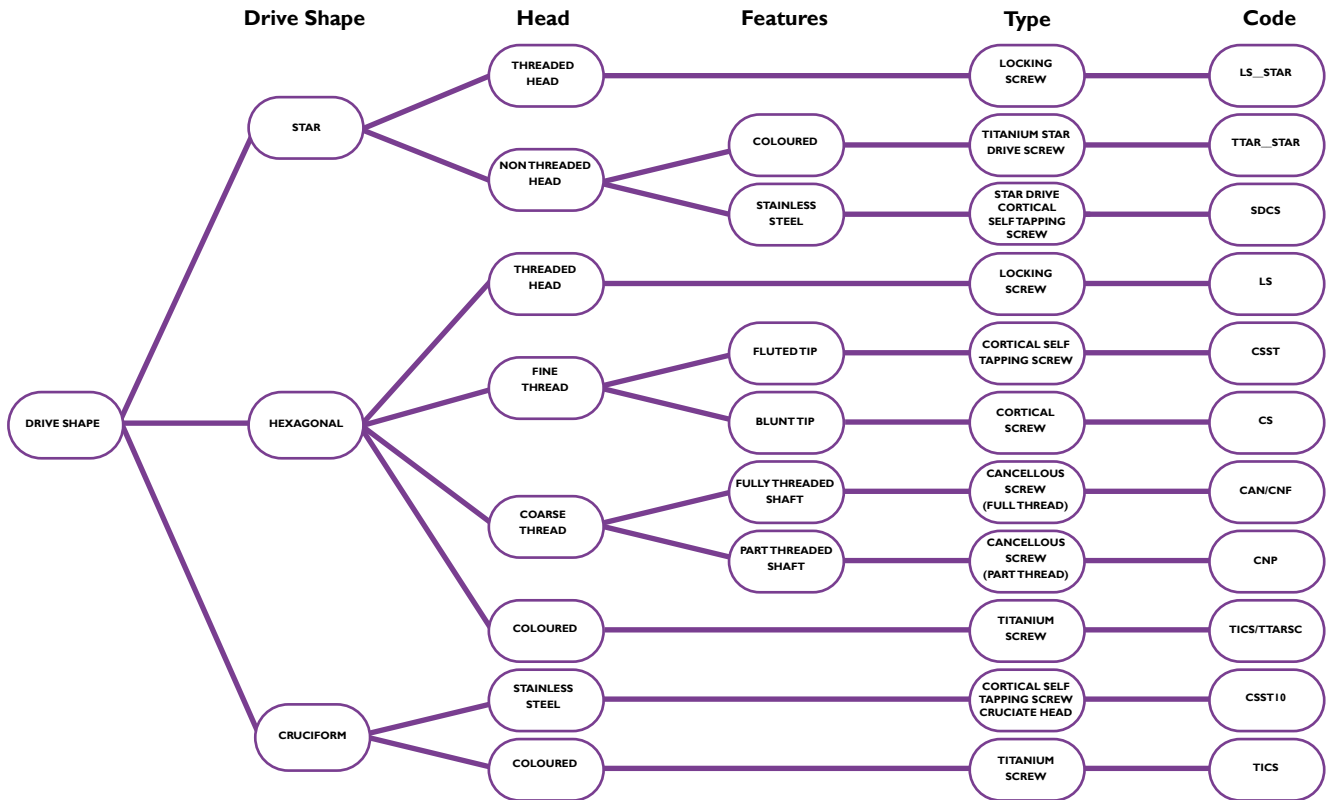

TIMESHCUT	Titanium Mesh Cutters
TIMESHPLI	Titanium Mesh Contouring Pliers

Screw Identification Tree

Use this decision tree tool to help you identify different type of screw. Start on the left and work your way across.

The code prefixes relate to the type of screw e.g. CSST = cortical screw self tapping, LS = locking screw, CAN = cancellous and so on.

Screw Identification - Type & Size Chart

Once you have used the decision tree to help you identify type, next measure the screw (length and width).

Use this chart to help confirm your identification - where there is a dot in the chart, the corresponding size/type exists.

	1.0mm	1.5mm	2.0mm	2.2mm	2.4mm	2.7mm	3.0mm	3.5mm	4.0mm	4.5mm	5.5mm	6.5mm

Vi Screw Types, Drive Shape, Sizes and Ordering Codes For Cortical and Cortical Self Tapping Screws

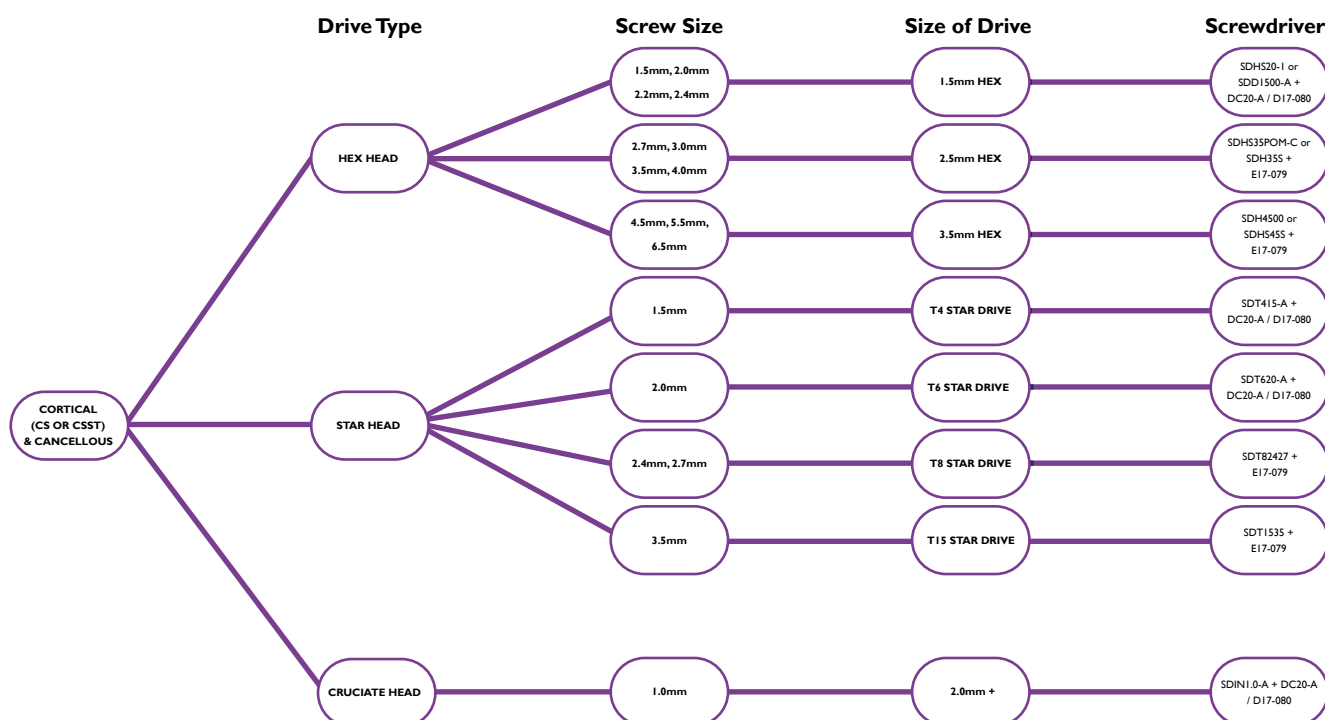

Once you have used the decision tree and the type/size chart, then refer to this table to confirm your identification and find out the product code (the last two digits of a code, indicated by **, refer to the length of the screw).

Screw Type	Drive Shape	Diameter	Vi Ordering Code
Cortical Non Self Tapping	Hexagonal	1.5mm	CS15**
		2.0mm	CS20**
		2.7mm	CS27**
		3.5mm	CS35**
		4.5mm	CS45**
		5.5mm	CS55**
Cortical Self Tapping	Hexagonal	1.5mm	CSST15**
		2.0mm	CSST20**
		2.4mm	CSST24**
		2.7mm	CSST27**
		3.5mm	CSST35**
		4.5mm	CSST45**
Cortical Self Tapping	Star Drive	1.5mm	SDCSI5**
		2.0mm	SDCS20**
		2.4mm	SDCS24**
		2.7mm	SDCS27**
		3.5mm	SDCS35**
Cortical Self Tapping	Cruciform	1.0mm	CSST10** for 1.0mm

Screwdriver Decision Tree For Cortical, Cortical Self-Tapping and Cancellous Screws Identification Tree

Once you have identified the type and size of screw, use this decision tree to determine the correct screwdriver.

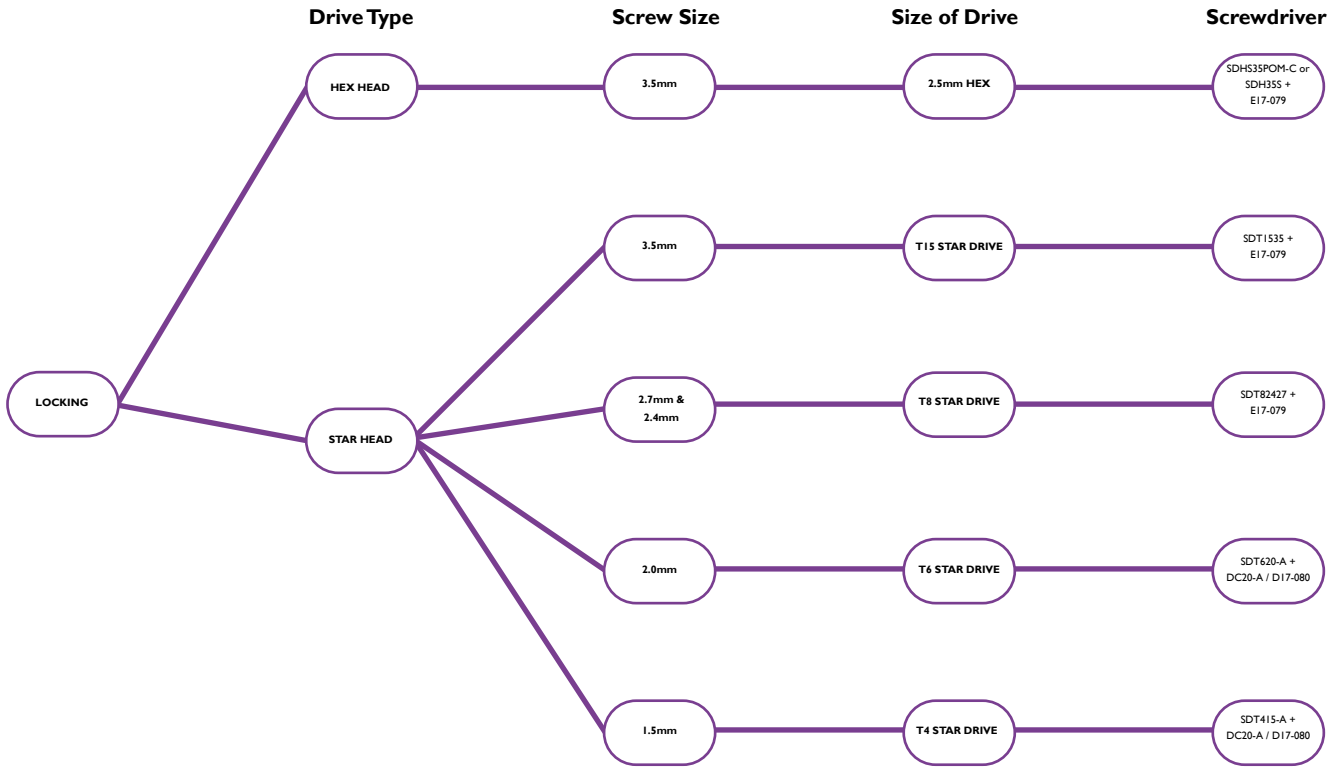

Where there are 2 options in the far right column, this is a fixed shaft screwdriver OR a quick release handle + separate screwdriver shaft (there may be 2 possible codes for the quick release handle).

Screwdriver Decision Tree For Locking Screws

Once you have identified the type and size of screw, use this decision tree to determine the correct screwdriver.

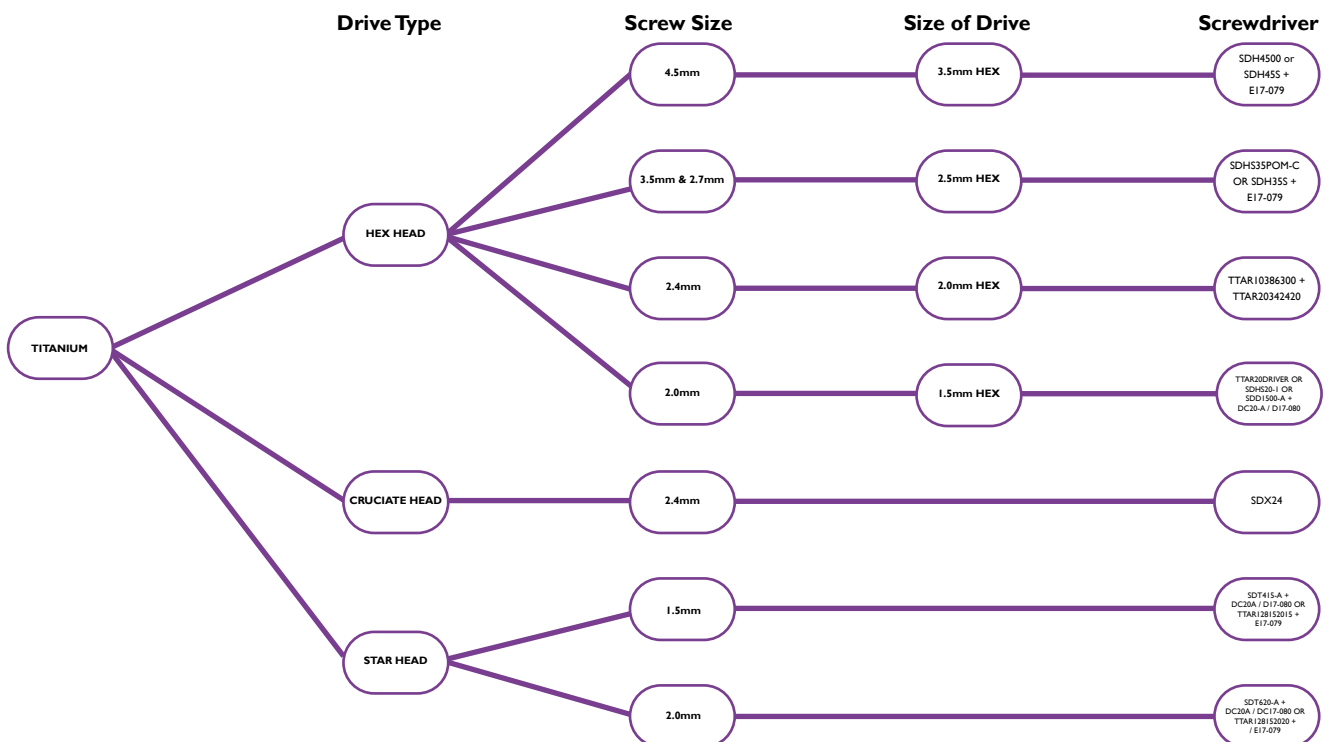

Where there are 2 options in the far right column, this is a fixed shaft screwdriver OR a quick release handle + separate screwdriver shaft (there may be 2 possible codes for the quick release handle).

Screwdriver Decision Tree For Titanium Screws

Once you have identified the type and size of screw, use this decision tree to determine the correct screwdriver.

Where there are 2 options in the far right column, this is a fixed shaft screwdriver OR a quick release handle + separate screwdriver shaft (there may be 2 possible codes for the quick release handle).

Countersinks - Quick Release

If the screw is destined to screw down onto the surface of the bone without a plate, it is helpful to contour the top of the screw hole to fit the screw head. This procedure is especially important when lag screwing relatively small fragments. Failure to countersink may lead to fracture of the bone fragment.

COU1520QRD Quick Release Countersink For 1.5/2.0mm Screws (Fits D17-080)

COU2427QR Quick Release Countersink For 2.4/2.7mm Screws (Fits E17-079 & T19-095)

Drill Bits

Drill Bits - Round Shank

Round shank multi-use drill bits made from hardened stainless steel, suitable for use with a standard Jacobs chuck.

Standard Length

Suitable for most applications.

	Diameter (mm)	Total Length (mm)	Flute Length (mm)
H090100	1.1	70	20
H090101	1.5	90	20
H090208	1.8	110	25
H090202	1.9	110	25
H090102	2.0	110	30
H090203	2.3	120	30
H090209	2.4	120	30
H090112	2.5	120	30
H090104	2.7	130	40
H090103	2.8	130	40
H090205	3.0	130	40
H090105S	3.2	130	40
H090106S	3.5	130	50
H090207	3.8	130	50
H090107S	4.0	130	50
H090108S	4.5	130	50
H090109S	5.5	130	60

Long Length

	Diameter (mm)	Total Length (mm)	Flute Length (mm)
H090101L	1.5	120	20
H090208L	1.8	140	25
H090102L	2.0	140	30
H090209L	2.4	150	30
H090112L	2.5	150	30
H090104L	2.7	170	40
H090103L	2.8	170	40
H090105L	3.2	180	40
H090106L	3.5	180	50
H090107/L	4.0	180	50
H090108L	4.5	180	50
H090109/L	5.5	180	60

Please note that longer drill bits are more prone to snapping and it is more difficult to control the hole angle and accuracy – therefore standard length drill bits should be used where possible. Where a longer drill bit is required it should be used with particular care and attention; use of a long drill guide may help to minimise problems.

Drill Bits - Quick Release AO Fit

Quick release multi-use drill bits made from hardened stainless steel, suitable for use with an AO style quick release chuck.

Standard Length

Suitable for most applications.

Mini Quick Release Drill Bits - Dental Fit

These smaller drill bits are too delicate for use with a power drill, and are designed for use with the D17-080 dental fit handle. This improves control and helps prevent breakages.

10MDB07-A	0.7mm Drill Bit Dental Fit 60mm
10MDB10-A	1.0mm Drill Bit Dental Fit 60mm

Drill Bits - Anti-Skid - Round Shank

Anti-skid drill bits have a special tip which bites into the bone surface, accurately positioning the hole. Particularly useful for holes which are not perpendicular to the bone surface, and where a drill guide is not used.

Round shank multi-use drill bits made from hardened stainless steel, suitable for use with a standard Jacobs chuck.

	Diameter (mm)	Total Length (mm)	Flute Length (mm)
H090101AS	1.5	90	20
H090208AS	1.8	110	25

Quick Release AO Fit

Quick release multi-use cannulated drill bits made from hardened stainless steel, suitable for use with an AO style quick release chuck.

	Diameter (mm)	Total Length (mm)	Flute Length (mm)
S090112CAN	2.5	105	25
S090104CAN	2.7	105	30
S090106CAN	3.5	105	35

Pre-Drilling ESF Pin Tracts

Pre-drilling a pin tract hole in the bone into which the ESF pin is subsequently inserted is very important as the ESF pins do not have drilling ends. Otherwise insertion of an ESF pin directly into the bone may cause impaction, micro-fracturing of the bone and excessive heat production with bone necrosis, all of which can lead to pin loosening. A drill bit that is about 10% smaller than the shank (core) diameter of the pin, or at least 0.1mm smaller, should be used. A slow speed (electric) drill at about 150rpm is advisable, using flush to cool the pin and minimise heat generated in the bone that could cause bone necrosis and pin loosening. An appropriate drill guide is used to protect the soft tissues and minimise drill wobble and skidding. Once the hole is drilled, a K-wire can be used to maintain the pin tract (before the drill guide is removed) so it can be easily re-identified once the ESF pin is ready to be inserted.

- H090202** 1.9mm Pre-Drill For 2.0mm Shank Positive Pin
- H090203** 2.3mm Pre-Drill For 2.4mm Shank Positive Pin
- H090205** 3.0mm Pre-Drill For 3.2mm Shank Positive Pin
- H090207** 3.8mm Pre-Drill For 4.0mm Shank Positive Pin
- H090101** 1.5mm Pre-Drill For 2.0mm Shank Negative Pin
- H090102** 2.0mm Pre-Drill For 2.4mm Shank Negative Pin
- H090104** 2.7mm Pre-Drill For 3.2mm Shank Negative Pin
- H090106L** 3.5mm Pre-Drill For 4.0mm Shank Negative Pin

Drill Stops

Drilling to a pre-measured depth can be a challenge. A drill stop is tightened onto the drill bit at the required depth. The Set includes 4 Stops to cover all the standard drill sizes. 1.5mm, 2.0mm, 2.5mm, 2.7mm, 3.2mm, 3.5mm and 4.5mm. The stop is tightened onto the drill bit using the hex driver provided.

DRILLSTOP Drill Stop Set in Stainless Case

Wires & Pins

Wires are simple, but versatile implants. Our specially selected stainless steel wires are both very hard and very stiff improving their driving characteristics and performance in situ.

Cutting with sufficiently robust implant cutters with hard jaws is obligatory.

These wires will damage cutters with stainless steel edges, e.g. combined wire twistors/shear cutters.

Arthrodesis Wire 125mm Long

Rather like small Intra-medullary Pins, Arthrodesis Wires have trochar points at each end.

They are used for the fixation of small bone fragments, produced either electively or as a result of trauma, e.g. distal femoral fractures, tibial crest transplants and femoral neck fractures. 125mm Long. Supplied in packs of ten.

090054ART	0.8mm Arthrodesis Wire 125mm Pack of 10
090020ART	0.9mm Arthrodesis Wire 125mm Pack of 10

090078KIR	1.8mm Kirschner Wire 178mm Pack of 10
090079KIR	2mm Kirschner Wire 178mm Pack of 10

Threaded Pins & Wires

Threaded wires have a much greater pull out resistance than smooth wires. They are very easy to insert using standard drills fitted with Jacobs chucks or wire drivers. Although having only trochar tips they will self tap in all but the hardest of cortical bone. Driven across fragments, threaded wires act as mini position screws which can be cut off flush to the bone surface or buried. It may be possible to place several threaded wires at angles to each other in a relatively small area.

Available in coarse or fine thread pitches. Use the coarse in cancellous or metaphyseal bone.

Coarse Threaded Small Fragment Pins

Use threaded pins where you might use a 2mm fixation screw or K Wire, e.g. tibial crest transplant. Drive in with slow speed drill. Relatively coarse threads. 0.8mm thread pitch.

090036	Threaded Pins 5mm Thread Single
090037	Threaded Pins 10mm Thread Single
090027	Threaded Pins 15mm Thread Single
090028	Threaded Pins 20mm Thread Single

1.6mm Threaded Pins with Olive

KS1101	1.6mm Threaded Pin with Olive
KS1102	1.6mm Threaded Pin with Olive

Fine Threaded Small Fragment Pins 2.0mm

Use singly to re-attach small bone fragments. Use in multiples to re-attach larger fragments e.g. humeral condyles. (4 x 2.0 threaded pins have similar properties to one 3.5 screw while interfering less with the healing process). Use threaded washer to create screw effect. Very easy to insert using an orthopaedic drill.

Thread pitch is 0.4mm for use in cortical bone. Self drilling. Cut off excess pin. For maximum pull out resistance drill through trans cortex and cut off trochar cutting tip.

090310	Fine Threaded Pin 10mm Thread Length	Single
090315	Fine Threaded Pin 15mm Thread Length	Single

Steinman Intra-Medullary Pins

Simple, cheap and often the best technique for the repair of long bones. I/M pinning does not resist compression and rotation very effectively. It may be helpful to add an external fixator for two weeks if in any doubt. Smooth pins are most likely to migrate. The threaded pins are negatively cut and do reduce backing out particularly if the distal fragment is small.

Our trochar tips are designed to cut bone but care must be exercised to avoid heat necrosis during insertion. Can be cut in half to produce cheap ESF pins.

Fully Threaded Arthrodesis Wires

090093ART	Fully Threaded Wire Single 1.5mm
090094ART	Fully Threaded Wire Single 2.0mm

Wire & Pin Storage Arthrodesis Wire Box

Box will store all diameters of Arthrodesis and K Wires in four compartments.

0900200 Arthrodesis & K Wire Organiser Plastic (Autoclavable)

Bone Pin Roll

Bone pin storage and sterilisation is difficult. Pins are long and sharp. The bone pin roll stores at least one of each pin.

An added advantage is that the pins do not penetrate sterilisation bags.

090038 Bone Pin Roll

A & K Wire Holders for 5"/125mm Wires

The simplest solution for storing A/ K wires is to have a tube dedicated for each size marked clearly with the diameter. There is no possibility for confusion. Each tube is 165mm long and 12mm diameter and will take any wire less than 150mm in length.

0900390.8 0.8mm A & K Wire Holder
0900390.9 0.9mm A & K Wire Holder
0900391.0 1.0mm A & K Wire Holder
0900391.1 1.1mm A & K Wire Holder

090039SET A & K Wire Holder Set (10)

Bone Pin Tubes

090039C Pin Storage Autoclave Tube 225mm

IM Pin Box

Keep all your 300mm IM Pins arranged and in size order safely within our IM pin box. The hard box will reduce the chance of personal injury and the risks of perforating packaging.

The box is fully autoclavable, but also makes an excellent stock-box. At a glance you can quickly see how many of each size pin it is holding. The box features a platform with a clearly marked metric and imperial pin gauge to make it very user friendly.

The pin sizes are, 1.6mm, 2.0mm, 2.4mm, 2.8mm, 3.2mm, 3.6mm, 4.0mm, 4.8mm and 6.35mm. Box external dimensions 308 x 138 x 64mm.

IMPBOX01 IM Pin Box With Insert - Supplied Empty
IMPBOXTRO IM Pin Box Complete With Steinman Pins Trochar Tips
IMPBOXSCR IM Pin Box Complete With Steinman Pins Screw Point Tips

A & K Wire Dispenser

The tube is sub-divided into four sections each of which has a window through which the wires may be viewed. The knurled dispensing tip is rotated until the hole is over the desired wire size and the wire shaken out. Total length 175mm. For wires 125mm. Marked with the standard sizes of 0.9mm, 1.1mm, 1.6mm and 2.0mm.

090039E A & K Wire Dispenser 0.9mm, 1.1mm, 1.6mm & 2.0mm

Orthopaedic Wire

Cerclage wire is an extremely useful method of fragment fixation. Use as thick a wire as seems possible. Twist evenly under tension. The best instrument is our Wire Twister/Cutter 001260. Minimise wire movement on periosteum. Tension wire banding should be performed when muscular forces must be transferred beyond a fracture or osteotomy, e.g. Tibial crest avulsion or trochanteric osteotomy. 1.0mm Wire is the most useful for mid-sized dogs. All are supplied in 10 metre rolls.

- OW0210** 32g Reel of Orthopaedic Wire 0.20mm
- OW0310** 30g Reel of Orthopaedic Wire 0.30mm
- OW0410** 27g Reel of Orthopaedic Wire 0.40mm
- OW0510** 25g Reel of Orthopaedic Wire 0.5mm
- OW0610** 24g Reel of Orthopaedic Wire 0.6mm
- OW0710** 22g Reel of Orthopaedic Wire 0.71mm
- OW0810** 21g Reel of Orthopaedic Wire 0.8mm
- OW0910** 20.5g Reel of Orthopaedic Wire 0.9mm
- OW1010** 20g Reel of Orthopaedic Wire 1.0mm
- OW1012** 18g Reel of Orthopaedic Wire 1.2mm
- OW1015** 16g Reel of Orthopaedic Wire 1.5mm

For convenience and identification rolls of orthopaedic wire can be marked with padlock security tags. This also has the added advantage of stopping rolls of wire unravelling in the operating theatre.

Orthopaedic Wire Kit

Cerclage wire can be a very useful means of fragment fixation. Kit containing our most popular cerclage instruments and a roll of wire, discounted over component price.

Kit contains:

- | | | |
|--------|------------------------------------|----|
| 001260 | Wire Twister | x1 |
| 001256 | Set of 3 Single Ended Wire Passers | x1 |
| OW1010 | 10m Roll of 1.0mm Orthopaedic Wire | x1 |

OWKIT Orthopaedic Wire Kit

Wire Passers can be found on page 23.

Wire Twister/Shear Cutter

- Jaws lock onto wire to enable easy twisting under tension for kink-free cerclage. The wire must be twisted under tension to create an even spiral
- Improved design, long life shear action cutter will cut 18 gauge (1.2mm) wire twisted double
- Serrated jaws grip and turn cut ends. Jaws have fenestration for extra grip
- Not designed to cut A + K wires, pins or fish hooks
- Available with Tungsten Carbide Jaws for extra grip (not fenestrated)

- 001260** Wire Twister/Shear Cutter 165mm Long
- 001261** Wire Twister/Shear Cutter - Tungsten Carbide Jaws 165mm Long

Wires With Eyelet

The free end of the wire is threaded through the eye. The cerclage is tightened using the special tightener. Requires a device for tightening eyed wires, see 001262 and 001264

- CWWE22** Orthopaedic Wire With Eyelet 22g x 12" (6 Pack)
- CWWE20** Orthopaedic Wire With Eyelet 20g x 12" (6 Pack)
- CWWE18** Orthopaedic Wire With Eyelet 18g x 12" (6 Pack)

Wire Tightener For Eyed Wires

Used to tension eyed wires very tightly. The cerclage is finished by kinking the wire back against the eye.

- 001262** Wire Loop Tightener 125mm Long

Wire Tightener With Two Cranks For Double Loop Cerclage & Eyed Wire

Use with single crank for eyelet wires. Use both cranks to tighten double loops.

- 001264** Wire Tightener With Two Cranks 240mm Long

Drill Guides & Sleeves

Universal Drill Guides

UDG15 – Universal Drill Guide for 1.5mm screws:

For load and neutral positioning of 1.1mm drills and tissue protector for 1.5mm tap

UDG20 – Universal Drill Guide for 2.0mm screws:

For load and neutral positioning of 1.5mm drills and tissue protector for 2.0mm tap

UDG24 – Universal Drill Guide for 2.4mm screws:

For load and neutral positioning of 1.8mm drills and tissue protector for 2.4mm tap

UDG27 – Universal Drill Guide for 2.7mm screws:

For load and neutral positioning of 2.0mm drills and tissue protector for 2.7mm tap

UDG35 – Universal Drill Guide for 3.5mm screws:

For load and neutral positioning of 2.5mm drills and tissue protector for 3.5mm tap

- UDG15** Universal Drill Guide For 1.5mm Screws
- UDG20** Universal Drill Guide For 2.0mm Screws
- UDG24** Universal Drill Guide For 2.4mm Screws
- UDG27** Universal Drill Guide For 2.7mm Screws
- UDG35** Universal Drill Guide For 3.5mm Screws

Locking Screw Drill Guides

- LSDG15** Locking Screw Drill Guide For 1.5mm
- LSDG20** Locking Screw Drill Guide For 2.0mm
- LSDG2424** Locking Screw Drill Guide For 2.4mm
- LSDG2724** Locking Screw Drill Guide For 2.7mm
- LSDG35** Locking Screw Drill Guide For 3.5mm

- LSDG2424XL** Locking Screw Drill Guide For 2.4mm Extra Long
- LSDG2724XL** Locking Screw Drill Guide For 2.7mm Extra Long
- LSDG35XL** Locking Screw Drill Guide For 3.5mm Extra Long
- LSDG35XXL** Locking Screw Drill Guide For 3.5mm Double XL

Locking Wire Guide

Screws into the locking plate to allow placement of a K Wire for temporary fixation of the plate to the bone. May also be used to facilitate plate manipulation during MIPO application.

- L20W11G** Locking 2.0mm Wire 1.1mm Guide
- L24W14G** Locking 2.4mm Wire 1.4mm Guide
- L27W16G** Locking 2.7mm Wire 1.6mm Guide
- L35W20G** Locking 3.5mm Wire 2.0mm Guide

Load Neutral Drill Guides

To exert compression at the fracture site, the cortical screw must be positioned precisely within the slot in the compression plate. The Load Neutral Drill Guide has two tips, one for compression (load) and one where no compression is exerted (neutral). There is one combination for each screw/plate size. Each guide is marked with the drill size to be used.

- LNDG15** Load Neutral Drill Guide For 1.5mm Compression Plates
- LNDG20** Load Neutral Drill Guide For 2.0mm Compression Plates
- LNDG24** Load Neutral Drill Guide For 2.4mm Compression Plates
- LNDG27** Load Neutral Drill Guide For 2.7mm Compression Plates
- LNDG35** Load Neutral Drill Guide For 3.5mm Compression Plates
- LNDG45** Load Neutral Drill Guide For 4.5mm Compression Plates

Insert Sleeves

Insert Sleeves centre smaller drills in the placement of lag screws.

- SL2015** Insert Sleeve 2.0mm o/d 1.5mm i/d
- SL2418** Insert Sleeve 2.4mm o/d 1.8mm i/d
- SL2720** Insert Sleeve 2.7mm o/d 2.0mm i/d
- SL3520** Insert Sleeve 3.5mm o/d 2.0mm i/d
- SL3525** Insert Sleeve 3.5mm o/d 2.5mm i/d
- SL3527** Insert Sleeve 3.5mm o/d 2.7mm i/d
- SL4532** Insert Sleeve 4.5mm o/d 3.2mm i/d
- SL5540** Insert Sleeve 5.5mm o/d 4.0mm i/d
- SL6545** Insert Sleeve 6.5mm o/d 4.5mm i/d

Tissue Protection Sleeves

Rotating pins, drills and taps will “pick up” soft tissues, skin, muscle, nerve and blood vessels, causing serious damage. Use of tissue protection sleeves minimises such damage. The teeth at the top of the guide locate on the bone whilst the stainless tube provides a barrier between soft tissue and implant equipment.

- TP2020** For Drill/Taps To 2.0mm 90mm
- TP0024** For Drill/Taps To 2.4mm 90mm
- TP0027** For Drill/Taps To 2.7mm 90mm
- TP0035** For Drill/Taps To 3.5mm 90mm
- TP0045** For Drill/Taps To 4.5mm 90mm

Drill Guide 0.7/1.0mm

Due to the size limitations, this device serves only as a drill guide and cannot be used as an insert sleeve or tap guide.

CDTIS10 Drill Guide 0.7mm/1.0mm

Adjustable Drill Guide

Our Adjustable Drill Guide allows accurate placement of drill holes by predetermination of drill entry and exit points. Locks onto bone to minimise errors.

- The swivelling point allows use of the guide where access is limited
- Supplied with 2.0, 2.5 and 3.5 Drill Sleeves. Use the appropriate sleeve for the drill in use
- A scale on the instrument measures hole depth
- Applications include condyle fractures, femoral neck tunnels, screw holes, and ununited anconeal process

In our view this design has significant advantages over CEG and C guides

ADJDG2035 Adjustable Drill Guide For 2.0mm/2.5mm/3.5mm Drills 175mm

KWG10 K-wire Guide For ADJDG2035

ADJDG45 Adjustable Drill Guide 4.5mm Drills 190mm

C Drill Guide

Use of an appropriately sized drill guide enables the surgeon to control exactly the entry and exit points of drills. This ability is extremely important in lag screwing.

Various insert sleeves are available for each drill size, with an accurate guidance system, and provide exact positioning of holes for lag screwing. (e.g. for a 3.5mm cortical screw, drill 3.5 lag hole in proximal cortex, insert SL3525 and drill through it into the trans cortex. Finally tap and insert screw).

CEG2735 Small Drill Guide i/d 3.5mm 'C' Guide 135mm

Triple Drill Guides

Triple Drill Guides are used to accurately position drills and K or arthrodesis wires. The three holes in the head allow for the placement of parallel anti-rotation wires.

SLG1115 Double Drill Guide/Sleeve For 1.1mm & 1.5mm Drills 100mm

SLG0020 Triple Drill Guide/Sleeve For 2.0mm Drills 115mm

SLG0025 Triple Drill Guide/Sleeve For 2.5mm Drills 115mm

Combination Drill, Tap & Insert Sleeve

The large end has an internal diameter which matches the clearance drill and tap. The small end has an internal diameter the same as the pilot drill and an external diameter which fits the clearance drill hole, i.e. the same as an insert sleeve. This single instrument contains all the guides and sleeves you need to place a lag screw.

CDTIS20 Combination Drill, Tap & Insert Sleeve for 2.0 Screws 100mm

CDTIS24 Combination Drill, Tap & Insert Sleeve for 2.4 Screws 105mm

CDTIS27 Combination Drill, Tap & Insert Sleeve for 2.7 Screws 110mm

CDTIS35 Combination Drill, Tap & Insert Sleeve for 3.5 Screws 115mm

CDTIS45 Combination Drill, Tap & Insert Sleeve for 4.5 Screws 130mm

Depth Gauges

Accurate measurement of hole depth is essential in order to select the appropriate screw size.

A range of gauges are available for various screw sizes. Hole depth is read from the instrument. Add extra to the measured length to ensure maximal screw thread/bone interface engagement.

Chart supplied with depth gauge or available on request. Use in self-tapping or cortical systems.

DG2027	Depth Gauge For 2.0mm & 2.7mm Screws 135mm
DG242735	Depth Gauge For 2.4mm, 2.7mm & 3.5mm Screws 180mm (TTA only)
DG2735	Depth Gauge For 2.7mm & 3.5mm Screws 175mm
DG4565	Depth Gauge For 4.5mm & 6.5mm Screws 290mm

Premium Depth Gauge

Radius matches screw under-head to replicate screw position. Improved hook. Contoured comfortable grip for ease of use. Store in fully retracted state to protect the delicate probe section.

DGP15	Premium Depth Gauge For 1.5mm Screws
DGP2024	Premium Depth Gauge For 2.0/2.4mm Screws
DGP2735	Premium Depth Gauge For 2.7/3.5mm Screws

Bone Plate Contouring Bone Plate Bending Levers

Bone plates appropriate for the repair of load bearing long bones are very stiff. Accurate contouring of plates is essential for precise fracture reduction; however, marking of plates during the bending process will lead to reduced fatigue strength.

Contoured plates should be placed with adequate support to minimise cyclical loading.

Extra length benders 01288L are particularly useful for contouring larger TPLO plates along with 3.5mm and 4.5mm standard plates.

Bone plate benders used in pairs are the most economic method of plate contouring. Supplied in pairs.

001280	1.0mm Bending Levers 130mm Long
001286	AO Type 1.5mm/2.0mm Bending Levers 130mm Long
001285	AO Type 2.4mm Bending Levers 140mm Long
001287	AO Type 2.7mm/3.5mm Bending Levers 175mm Long
001288	AO Type 3.5mm/4.5mm Broad Bending Levers 200mm Long
001288L	3.5/4.5 Extra Long Bending Levers 240mm Long

Delta TPLO Plate Benders With Curved Slots

Plate benders with slots tend to distort the Delta plate.

The curved slots help grip and support the plate during the bending process. In addition the plate is much less likely to end up on the floor.

TPLODELBEND	Delta TPLO Plate Benders (Pair) 230mm Long
--------------------	--

Plate Bending Pliers - Roller Type

- 001283SMALL** Plate Bending Pliers Roller Type 230mm Long Suitable For 3.5mm Plates
- 001283** Plate Bending Pliers Roller Type 380mm Long Suitable For 3.5mm & 4.5mm Plates

Bone Plate Press

- 001281** Bone Plate Press Small 285mm Long For Plates Up To & Including 4.5mm Narrow
- 001282** Bone Plate Press Large 410mm Long For All Plates

Tips on the use of the Plate Press

- The press works at maximum efficiency when the handle is approx. parallel with the base. Make sure the press is on a stable firm surface
- Place the plate to be contoured in between the anvils
- Adjust the gap between the anvils using the screw until the handle is parallel with the base
- Pressure on the handle will bend the plate
- Readjust the press using the screw to bring the handle parallel once again
- Contouring the plate should be accomplished using several small adjustments rather than one big one

Please check the press selected will fit your autoclave before purchase.

AO Type Plate Bending Pliers

These pliers will contour 2.7mm and 3.5mm narrow plates. 3.5mm DCP's will require multiple small bends. Also useful for bending guide pins in the Slocum TPLO technique.

- 001289B** AO Plate Bending Pliers 2.7mm/3.5mm

Heavy Duty Bone Plate Pliers To 4.5mm

The largest bone plate pliers in the range, these will contour all plates other than the 4.5mm broad.

The bending head has 3 interchangeable anvils and the 'hammer' side has 3 different shapes which rotate. This offers the surgeon 6 different contouring options to match different plates and different shapes.

- 001289C** Heavy Duty Plate Bending Pliers
- 001289SA** Small Anvil For 2.7mm Plates (For Existing Users)

Bending Templates

To avoid repeated entry into the operation site when contouring plates, an aluminium bending template is contoured to the bone. The steel plate is then bent to match the template using irons or a bone plate press.

- BT200737** Bending Template 37mm For 2.0mm DCPs & Round Hole Plates

- BT152700** Bending Template For 2.0mm Supracondylar Plate
- BT152711** Bending Template For 2.4mm Supracondylar Plate
- BT152714** Bending Template For 2.7mm Supracondylar Plate
- BT152717** Bending Template For 3.5mm Supracondylar Plate

Screw Holding Forceps

A useful instrument for selecting screws with minimal handling. Can be used with any style of screw.

- SF1024** Screw Holding Forceps 1.0/1.5/2.0/2.4mm Screws
- SF2055** Screw Holding Forceps 2.4/2.7/3.5/4.5mm Screws

Plate Holding Clip

A useful little clip for holding plates in sequence. Labelled with size.

- BPC2** Plate Holding Clip 2.0mm
- BPC24** Plate Holding Clip 2.4mm
- BPC27** Plate Holding Clip 2.7mm
- BPC35** Plate Holding Clip 3.5mm

Cerclage Button

- CB15** Cerclage Button For 1.5 DCP
- CB20** Cerclage Button For 2 DCP
- CB24** Cerclage Button For 2.4 DCP
- CB27** Cerclage Button For 2.7 DCP
- CB35** Cerclage Button For 3.5 DCP

Webb Bolts

Use where a lag screw strips out. Supplied as a threaded rod, two nuts and two washers.

Pre-measure and cut to length or crop after procedure. Saw cut or bolt cutting will prevent loosening of the nut on the cut side.

Run a fine nylon suture through the nut prior to attachment to create a locking effect.

5mm Webb Bolt use 5.5mm Drill H090109S. Requires 8mm spanner (001565).

4mm Webb Bolt use 4.0mm Drill H090107S. Requires 7mm spanner (001566).

3mm Webb Bolt use 3.2mm Drill H090105S. Requires 5.5mm spanner.

2mm Webb Bolt use 2.0mm Drill H090102. Requires 4mm spanner.

- 092003** Webb Bolt 5mm/8cm
- 092000** Webb Bolt 4mm/8cm
- 092001** Webb Bolt 3mm/8cm
- 092002** Webb Bolt 2mm/5cm

Washers

Use to spread load or retain wire or sutures. Use with cortical or self tapping screws. Spikey washers are used to reattach ligaments.

- PW15** Plain Washer 1.5mm Screws Stainless
- PW20** Plain Washer 2.0mm/1.5mm Screws Stainless
- PW20B** Plain Washer 2.0mm Screws Broad 6mm Diameter
- PW24** Plain Washer 2.4mm Screws Stainless
- PW24TI** Plain Washer 2.4mm Screws Titanium
- PW273540** Plain Washer 2.7mm/3.5/4.0mm Screws Stainless 7.0mm Dia
- PW273540B** Plain Washer 2.7mm/3.5mm/4.0mm Screws Stainless 8.5mm Dia
- PW45** Plain Washer 4.5mm Screws Stainless
- SW15** Spikey Washer 1.5mm Screws Stainless
- SW20** Spikey Washer 2.0mm Screws Stainless
- SW27** Spikey Washer 2.7mm Screws Stainless
- SW3540** Spikey Washer 3.5mm/4.0mm Screws Stainless
- SW45** Spikey Washer 4.5mm Screws Stainless

Cortical Nuts

Occasionally tapped threads strip and a larger screw is appropriate. Lag screws are particularly vulnerable as only one cortex is available.

A cortical nut manufactured from implant grade nylon gives the screw purchase allowing normal tightening. The thread form is designed to grip the screw to minimise 'backing out'.

Available in 2.0mm, 2.4mm, 2.7mm, 3.5mm and 4.5mm cortical thread forms. Supplied as a single sterile pack. The cortical nuts are also available in stainless steel.

- N20** 2.0mm Cortical Nut Stainless Steel (Non Sterile)
- N24** 2.4mm Cortical Nut Stainless Steel (Non Sterile)
- N27** 2.7mm Cortical Nut Stainless Steel (Non Sterile)
- N35** 3.5mm Cortical Nut Stainless Steel (Non Sterile)
- N45** 4.5mm Cortical Nut Stainless Steel (Non Sterile)
- CN20-A** 2.0mm Cortical Nut Nylon (Sterile)
- CN24-A** 2.4mm Cortical Nut Nylon (Sterile)
- CN27-A** 2.7mm Cortical Nut Nylon (Sterile)
- CN35-A** 3.5mm Cortical Nut Nylon (Sterile)
- CN45-A** 4.5mm Cortical Nut Nylon (Sterile)

Cortical Nut	Nut Profile	Associated Spanner Size
N20	Square	3.5mm
N24	Square	4.5mm
N27	Hex	1/4"
N35	Hex	7mm
N45	Hex	1 1/42"

Screw Extraction Trepine

Once the head of a screw has become detached the shaft can be very difficult to extract, particularly when the screw has been in situ for some time. The screw extraction trephine is designed to 'core out' the screw shaft either in its entirety or partially to allow the screw to be grasped by extraction forceps. The internal diameter is a little larger than the screw to be extracted. The external diameter is small enough in most cases to allow the replacement of the screw by a larger one. The trephine fits directly into a Jacobs Chuck.

- SCET20** Extraction Trephine For 2.0mm Screws o/d 2.7mm
- SCET24** Extraction Trephine For 2.4mm Screws o/d 3.5mm
- SCET27** Extraction Trephine For 2.7mm Screws o/d 3.5mm
- SCET35** Extraction Trephine For 3.5mm Screws o/d 4.5mm
- SCET45** Extraction Trephine For 4.5mm Screws o/d 5.5mm

Equipment & Screw Boxes AO Screw/Equipment Boxes

ESF Pins

Positive Threaded Pins

Positive threaded pins are the pin of choice for ESF application as they have excellent resistance to pull-out, and no inherent point of weakness.

End threaded pins are used as half pins in Type IA and IB ESF frames.

Centre threaded pins are used as full pins in Type II frames.

Positive Threaded Pins - Cortical

End Thread

The fine threads of these pins are proud of the shank eliminating the weak point where the thread ends in other pins.

The major benefit of positive threaded pins is that the additional thread diameter creates a larger bone pin interface for a given shaft diameter.

This style of pin is useful where a good pull out resistance is required and where it is anticipated that the frames will be left in situ for long periods - 6 weeks plus.

CET0014	0.8mm Shank 1.1mm Threads 60mm Long - End Thread
CET0013	1.0mm Shank 1.3mm Threads 65mm Long - End Thread
CET0015	1.2mm Shank 1.5mm Threads 65mm Long - End Thread
CET0016	1.2mm Shank 1.6mm Threads 70mm Long - End Thread
CET0017	1.4mm Shank 1.8mm Threads 70mm Long - End Thread
CET0018	1.6mm Shank 2.0mm Threads 70mm Long - End Thread
CET0026	1.8mm Shank 2.2mm Threads 80mm Long - End Thread
CET0019	2.0mm Shank 2.4mm Threads 85mm Long - End Thread
CET0020	2.4mm Shank 3.2mm Threads 100mm Long - End Thread
CET0020A	2.7mm Shank 3.5mm Threads 110mm Long - End Thread
CET0020B	3.0mm Shank 3.8mm Threads 120mm Long - End Thread
CET0021	3.2mm Shank 4.0mm Threads 130mm Long - End Thread
CET0024A	3.5mm Shank 4.3mm Threads 130mm Long - End Thread
CET0022	4.0mm Shank 4.8mm Threads 150mm Long - End Thread

Mid Thread

The Mid Threaded Pin provides good pull out resistance in frames where the fixation pins are supported on either side of the limb by connecting bars. i.e. Type II frames.

CMT0013	0.8mm Shank 1.1mm Threads 85mm Long - Mid Thread
CMT0014	1.1mm Shank 1.4mm Threads 85mm Long - Mid Thread
CMT0015	1.2mm Shank 1.5mm Threads 85mm Long - Mid Thread
CMT0016	1.4mm Shank 1.8mm Threads 85mm Long - Mid Thread
CMT0017	1.6mm Shank 2.0mm Threads 85mm Long - Mid Thread*
CMT0018	1.6mm Shank 2.0mm Threads 85mm Long - Mid Thread**
CMT0018A	1.8mm Shank 2.2mm Threads 90mm Long - Mid Thread
CMT0019	2.0mm Shank 2.4mm Threads 105mm Long - Mid Thread
CMT0019A	2.2mm Shank 2.6mm Threads 105mm Long - Mid Thread
CMT0023	2.4mm Shank 3.2mm Threads 105mm Long - Mid Thread
CMT0023A	2.7mm Shank 3.5mm Threads 115mm Long - Mid Thread

CMT0025	4.0mm Shank 4.8mm Threads 150mm Long - Mid Thread

*CMT0017 has a 16mm thread length.

**CMT0018 has a 20mm thread length.

Positive Threaded Pins - Cancellous

The coarser threads of these pins are appropriate for use in metaphyseal bone.

CANET0026	2.4mm Shank 3.5mm Threads 115mm Long Cancellous End Thread
CANET0027	3.2mm Shank 4.8mm Threads 150mm Long Cancellous End Thread
CANMT0029	2.4mm Shank 3.5mm Threads 150mm Long Cancellous Mid Thread
CANMT0030	3.2mm Shank 4.8mm Threads 180mm Long Cancellous Mid Thread

Trochar Pins

The smooth shanks of trochar pins provide minimal pull out resistance, there is therefore little advantage to their use. When used, trochar pins should be placed at diverging angles to maximise pull-out resistance. 130mm long.

001556	Trochar Pin 2mm
001557	Trochar Pin 3mm
001558	Trochar Pin 4mm

Cortical Negative Threaded Pins Ellis Type

The short fine negative thread engages the trans (far) cortex and the smooth shank engages the cis (near) cortex.

The thread/shank junction (the weakest part of the pin) is positioned in the medullary cavity and protected from potential failure.

Ellis type pins have better pull out resistance over Trochar pins and the angle of placement is not as critical.

		Pin Diameter	Overall Length
001528	Ellis Pin	1.1mm	76mm
001529	Ellis Pin	1.6mm	85mm
001533	Ellis Pin	1.8mm	127mm
001550	Ellis Pin	2.0mm	127mm
001530	Ellis Pin	2.4mm - (3/32")	127mm
001550A	Ellis Pin	2.7mm - (7/64")	127mm
001551	Ellis Pin	3.0mm	127mm
001531	Ellis Pin	3.2mm - (1/8")	127mm
001551A	Ellis Pin	3.5mm	127mm
001552	Ellis Pin	4.0mm	127mm

Bicortical Negative Threaded Pins

Bicortical Negative Pins have had a bad reputation for early failure at the thread pin junction. Where selection of pin and frame are appropriate, failure of negative threaded pins is rare.

The important criterion is thread diameter not shaft diameter. For any given thread diameter both positive and negative threaded pins are equally strong.

	Shaft Diameter	Thread Diameter	Thread Length	Overall Length
BCNET08	0.8mm	0.8mm	8mm	70mm
BCNET10	1.0mm	1.0mm	10mm	70mm
BCNET11	1.1mm	1.1mm	12mm	70mm

BCNET15	1.5mm	1.5mm	12mm	70mm
BCNET16	1.6mm	1.6mm	20mm	70mm
BCNET18	1.8mm	1.8mm	24mm	85mm
BCNET20	2.0mm	2.0mm	24mm	85mm
BCNET24	2.4mm	2.4mm	25mm	100mm
BCNET27	2.7mm	2.7mm	30mm	110mm
BCNET30	3.0mm	3.0mm	35mm	130mm
BCNET35	3.5mm	3.5mm	40mm	130mm
BCNET40	4.0mm	4.0mm	45mm	150mm
BCNET50	5.0mm	5.0mm	50mm	150mm

Pre-Drilling ESF Pin Tracts

Pre-drilling a pin tract hole in the bone into which the ESF pin is subsequently inserted is very important as the ESF pins do not have drilling ends. Insertion of an ESF pin directly into the bone may cause impaction, micro-fracturing of the bone and excessive heat production with bone necrosis, all of which can lead to pin loosening. A drill bit that is about 10% smaller than the shank (core) diameter of the pin, or at least 0.1mm smaller should be used. A slow speed (electric) drill at about 150rpm is advisable, using flush to cool the pin and minimise heat generated in the bone that could cause bone necrosis and pin loosening. An appropriate drill guide is used to protect the soft tissues and minimise drill wobble and skidding. Once the hole is drilled, a K-wire can be used to maintain the pin tract (before the drill guide is removed) so it can be easily re-identified once the ESF pin is ready to be inserted.

- H090202** 1.9mm Pre-Drill For 2.0mm Shank Positive Pin
- H090203** 2.3mm Pre-Drill For 2.4mm Shank Positive Pin
- H090205** 3.0mm Pre-Drill For 3.2mm Shank Positive Pin
- H090207** 3.8mm Pre-Drill For 4.0mm Shank Positive Pin
- H090101** 1.5mm Pre-Drill For 2.0mm Shank Negative Pin
- H090102** 2.0mm Pre-Drill For 2.4mm Shank Negative Pin
- H090104** 2.7mm Pre-Drill For 3.2mm Shank Negative Pin
- H090106L** 3.5mm Pre-Drill For 4.0mm Shank Negative Pin

Safety Cutter Surgical Finish To 4mm Capacity

Safety implant cutter which leaves a smoother cut end than a conventional cutter. Very useful for external fixation pins. Cut end is temporarily retained within the head rather than flying off.

Maximum capacity 4mm. Cuts 5mm below the face of the cutter.

Telescopic handles reduce the overall length from 470mm to 340mm to fit most autoclaves. Head strips for cleaning.

001229 Safety Cutter Stainless Steel Cuts To 4.0mm Capacity 340mm Long

ESF Tissue Protector

Protection of soft tissue is very important when placing an ESF frame. Protection prevents tissues from getting wrapped around the drill bit, and helps to maintain access to the pin tract in the bone.

Once a connecting bar with clamps is in position, pin placement through a drill guide presents a specific problem because standard drill guide tissue protectors cannot be removed once the pin is in position.

The ESF Tissue Protector splits along its length to allow removal. The tip has small serrations to encourage grip on the bone surface.

001548 ESF Tissue Protector

0017695SC SF Full Kit With Steel/Carbon Bars

SF Clamps

The Standard Fixator is the most adaptable standard linear ESF fixation system and is the recommended system to use. The ESF clamp design is a 2 part, 2 bolt mechanism body which can be dismantled. This means that ESF clamps can easily be added or removed from an ESF frame at any time, and by using two rather than one bolt to secure the clamp, better stability of the clamp-connecting bar and clamp-ESF pin interface is achieved.

The system is available in three different sizes, Mini, Small, and Large, as shown in the table below.

Clamp	Pin Shaft Dia	Bar Dia	Spanner
Mini	0.9mm - 2.5mm	3.2mm	7mm (001566)
Small	2.0mm - 3.2mm	6.3mm	8mm (001565)
Large	3.2mm - 4.8mm	9.5mm	10mm (001564)

SF Bars

Connecting bars for the mini system are 3.2mm stainless steel. The small system has carbon fibre and titanium 6.3mm connecting bars, and the large system has 9.5mm carbon fibre and aluminium connecting bars. Carbon fibre is radiolucent meaning that the connecting bar does not obscure the image when a radiograph is taken. Considering bending strength, Titanium is stiffer than carbon fibre which in turn is stiffer than aluminium.

SF Mini Range

001740	Mini Single Clamp

KE Plus

The KE Plus linear ESF system is an evolution of the original KE system. Although it is a versatile system that has functioned well over time, it has no advantage over the SF system.

The KE Plus clamp is designed to allow a wider range of positive threaded pins to be used than the original KE clamp, but clamp stability and security is not as good as the SF system.

KE Plus is compatible with existing KE systems and is a useful addition to expand the range of the KE system. KE Plus clamps have a matt finish compared with the polished standard KE clamps. The KE Plus system is available in small, medium and large sizes.

One important limitation of the KE Plus system is that once the fixator has been applied to the patient, additional clamps cannot be added or removed from the connecting bar without removing the entire fixator, disassembling, and starting from the beginning. This is because the clamps cannot pass those already present on the connecting bar.

001579ND KE Plus Kit in Stainless Steel Box - No Double Clamps Pins or Drills
001579NDP KE Plus Kit in Stainless Steel Box - Includes Pins and Drills. No Double Clamps

Single KE Plus Clamp

Medium KE Plus with large positive pin

Medium KE Plus with small positive pin

Double Clamps

Used to attach a connecting bar to another connecting bar.

Connecting Bars

Connecting Bars are available in 5/16" (8mm) for large clamps, 3/16" (4.8mm) for medium clamps and 1/8" (3.2mm) for small clamps.

The thicker the bar, the stronger the frame. The shorter the bar between bone fragments, the stronger the frame. Rigidity is important early in fracture healing.

When significant callus is present, it is often helpful to introduce some slight axial motion by either removing some pins or moving the clamps further away from the bone. This is known as staging down or dynamising.

Bars are available in a variety of lengths.

KE Plus Small Range

001527	Small Single KE Plus Clamp
001594	Small Double Clamp
001595	Small Connecting Bar 1/8" (3.2mm) x 30mm

Epoxy ESF Putty

Epoxy ESF Putty is a simple to use, quick and convenient alternative to the standard bar and clamp system. The putty, once mixed, stiffens in 5 minutes and within 1 hour is fully cured. The putty can be applied and then the fracture reduced allowing precise manipulation of the fracture site. The versatility of the system allows the putty to be used in place of clamps, to cover sharp ends of cut pins, and many other applications.

There are two pack sizes in a bar format with the premeasured catalyst in the centre of the bar ready for mixing. The product is clean and has a long shelf life. Only mix the quantity you need, cutting the required amount off the end of the bar. If you find you don't have enough, more can be prepared in a matter of seconds. ESF putty sticks to itself very well and may be used for repairs and corrections. Particularly useful in fractures in small furries where proximal and distal fragments may be attached together with 'blobs' of putty in place of clamps regardless of fixation pin site.

Typical Applications

- ESF applications requiring multiple pins of various sizes placed at various angles
- ESF applications in rabbits and guinea pigs
- Fractures of the jaw
- Protecting sharp ends of cut pins
- Joining non-standard pins and bars
- Use to add a pin mid-frame

- EPOXY1 Epoxy ESF Putty 55g
- EPOXY2 Epoxy ESF Putty 110g

FESSA External Fixation

FESSA - Stainless Steel

Developed for use in the French army FESSA is a lightweight tubular fixator with a number of interesting features.

- The tube incorporates the pin clamping mechanism and is thus very strong and has extremely good angular pin rigidity
- Available in 6mm, 8mm and 12mm diameter tubes
- 6mm tube accepts pins of shaft diameter 0.9mm to 1.8mm making it extremely useful in the management of fractures in cats and exotics
- 8mm tube accepts pins of shaft diameter 1.6mm to 3.2mm
- 12mm tube accepts pins of shaft diameter up to 4mm and M5 grub screws
- Design allows placement of multiple parallel pins close together in small fragments
- Pins can be placed at right angles to tube or angled through adjacent holes. Pins are locked into position by hex driven grub screws

The full kit list is available upon request.

015500 FESSA 6 & 8mm Set With 10 of Each Screw

6mm FESSA

015502 FESSA Tube 6mm x 30mm
015504 FESSA Tube 6mm x 45mm
015506 FESSA Tube 6mm x 65mm

015517 FESSA Hex Driver Allen Key Type 2.0mm
015520 FESSA 8mm (2.0 Hex) Grub Screws (10)
015536 FESSA 8mm Hinge

12mm FESSA

015540 FESSA Tube 12mm x 125mm
015542 FESSA Tube 12mm x 175mm
015544 FESSA Tube 12mm x 225mm
015545 FESSA 12mm (2.5 Hex) Grub Screws (10)
SDHS35POM-C 2.5mm Hex Screwdriver + Sleeve With PTFE Handle

FESSA Ultra-Lightweight Titanium

Standard stainless steel FESSA is light. The tubular structure acts as both clamp and bar. Birds, small furries and exotics demand even lighter constructs.

Using Titanium tube of 5.0mm in diameter enables the surgeon to apply FESSA constructs weighing from as little as 1.5 grams.

Titanium FESSA tubes (015521 and 015522) are both supplied with 6x M3 grub screws. Suitable for pins 0.8mm to 1.6mm. Uses 1.5 hex drivers, the same as 6.0mm FESSA.

The full kit list is available upon request.

- 6 months warranty for battery
- 12 months warranty on hand pieces

Vi Black Series Battery Powered Drill

Supplied complete with battery, battery charger, battery transfer sleeve and storage case.

The drill has a reverse and is fitted with a 4.8mm capacity three jaw chuck with 3.0mm through cannulation for driving smaller pins, wires and drill bits.

Drill max speed: 0-1100RPM
 Drill max noise: <40dB
 Drill weight: 990g

BLACKDRILL-EU Vi Black Series Drill EU
BLACKDRILL-USA Vi Black Series Drill USA
BLACKCHUCKKEY Vi Black Series Drill Spare Chuck Key

Vi Black Series Attachment

Designed for use with the Black Series Drill, this attachment converts the Jacobs chuck to a quick-release chuck, allowing the use of AO/quick release drill bits and attachments.

BLACKDRILL-QRAC Vi Black Series Cannulated QR Attachment

Vi Black Series Battery Powered Surgical Saw

Supplied complete with battery, battery charger, battery transfer sleeve, storage case and 1x BLACKSW451607B blade.

Saw speed: 0-15000 osc/min
 Saw max noise: <50dB
 Saw weight: 782g

BLACKSAW-EU Vi Black Series Saw EU
BLACKSAW-USA Vi Black Series Saw USA

Vi Black Series Saw Blades

We stock a range of Black Series Saw Blades which have been specifically designed for Veterinary patients.

Ideal for TTA/TTO style cruciate surgeries, other elective osteotomies and excisional arthroplasty.

TPLO Saw Blade 9mm

Vi are pleased to offer a 9mm radial cut TPLO blade by Rita Leibinger. Standard triangular mount fitting.

TPLOBLEI09 Rita Leibinger 9mm TPLO Saw Blade

This product is only available in selected countries. Please check with Vi for availability.

TPLO Saw Hex Driver T Bar Type

The fitting on most TPLO saw blades is of the triangular Stryker Type. The means of attachment to the saw is by hex drive grub screws which are notorious for working loose.

Our T Bar hex drivers allow the surgeon to quickly, easily and firmly attach the blade to the saw.

Available in 2.5mm (Slocum), 3.0mm (Aesculap) and 3.2mm (Whittemore/ Vi).

- TBHEX25** 2.5mm T Bar Hex Driver (Slocum)
- TBHEX30** 3.0mm T Bar Hex Driver (Aesculap)
- TPLOHEX32** 1/8" Stainless Allen Key (Whittemore/ Vi)
- ALLEN25** 2.5mm Allen Key Stainless
- 015508** 1.5mm Allen Key
- 015517** 2.0mm Allen Key

TPLO Saw Blade Protractor

Use to accurately measure the tibial plateau slope. In addition the protractor is marked with blade outline to further assist in the planning of the TPLO procedure.

Multi Saw Battery Powered System

This multi-functional oscillating saw can be used for powered bone dissection, where an oscillating motion is required and also acts as a dedicated cast cutter.

The saw is supplied as a kit and includes a charging unit, two batteries, and a blade.

- 001708** Multi Saw Surgical Kit incl Converter, Shroud, Titanium Nitride Coated Blade & S82-103 Blade
- 001708.134** Multi Saw Surgical Kit incl Converter, Shroud, Titanium Nitride Coated Blade & SB5071-134 Blade Suitable for TTO & TTA Rapid
- 001702** Stainless Converter supplied with spanner
- 001703** Waterproof Shroud For Multi Saw
- 001705** Multi Saw Diamond Blade
- 001714** Multi Saw Titanium Nitride Coated Blade
- MI2B2MIL** Spare Battery For Milwaukee Multi Saw and Drill
- MI218FCMIL** Charging Unit For Milwaukee Batteries 240V

Surgical Blades

All blades with a central hole bigger than 6mm will fit the Multi Saw.

	THICKNESS	CUT	LENGTH	WIDTH

Multi Saw Blades

Variable Speed Orthopaedic Drill (Milwaukee) & Accessories

The drill system is from an industrial background, modified for the Animal Health industry.

- Excellent control over speed 0-600rpm via trigger
- Stainless Steel Chuck (6.35mm capacity) and Extension
- 80mm through Chuck cannulation
- Autoclavable Shroud
- Low Speed, High Torque
- Supplied as a Complete Kit including Stainless Chuck, Key, Extension, Autoclavable Shroud, 2 Batteries and a Charger.

- 001600** Variable Speed Orthopaedic Drill (Milwaukee) Kit - Drill, Chuck, Key, Shroud, Extension & 2x Batteries
- 001605** Spare Chuck and Key 1/4" 6.35mm
- 001606** Spare Key For Standard Chuck
- 001607** Drill Extension
- 001661A** Waterproof Shroud
- M12B2MIL** Spare Battery For Milwaukee Multi Saw and Drill
- M1218FCMIL** Charging Unit For Milwaukee Batteries 240V
- 001620** Waterproof Drill Shroud for Pre-2014 Makta Style Drill

MiniDriver Basic Set

VIMDB2 MiniDriver Basic Set Including MK 2 Saw

K200 MiniDriver Handpiece

Fully re-furbished to the new K200 standard, the handpiece is the centre of the modular system.

Handpiece has forward and reverse button plus locking trigger.

Power output with medical air at 7bar input is 0.78 Newton Meters.

Speed variable 0-1100rpm.

K200VI K200 Handpiece

K111 Wire Driver

Re-attachment of osteotomies or small bone fragments is often best achieved using K or arthrodesis wires. Driving a long pin in a chuck often results in bending and kinking making driving difficult. Incrementally advancing the wire through a chuck is often time consuming. The wire driver allows the easy incremental advancement of the wire through the handpiece via the use of a clutch arrangement.

K111VI Wire Driver 0.7mm To 1.8mm

K110 Small 4mm Jacobs Chuck

The 4mm chuck attachment is cannulated for driving long pins.

K110VI K110 4mm Chuck Attachment Including Key

K211 Pin Driver

Similar to the wire driver in operation the pin driver has a larger capacity 1.6m to 4mm.

K211VI K211 Pin Driver 1.6 To 4mm

K109 Large 6.25mm Jacobs Chuck

The 6.25mm chuck attachment is cannulated for driving long pins.

K109VI K109 6.25mm Chuck Attachment Including Key

K210 Hi Torque Large 6.25mm Jacobs Chuck

Using the standard chucks the MiniDriver has a torque of 0.78 Newton Meters, which makes heavy weather of driving large pins without pre-drilling.

By adding a set of gears the chuck speed is reduced but the stall torque is increased to 2.8 Newton Meters ideal for driving pins.

K210VI K210 Hi Torque 6.25mm Chuck Attachment

K107VI Keyless Chuck Attachment

Chuck keys wear quickly, become lost and can be awkward to use in some situations. The keyless chuck allows the surgeon to quickly switch drills and pins without a key.

The distal part of the chuck is held using fingers and the chuck opened or closed by engaging the drill in either the forward or reverse drive respectively. The downside is that the chuck is slightly bulkier than the keyed equivalent.

K107VI Keyless Chuck Attachment 0 - 6.3mm

K114B AO Quick Release Attachment

Drills may be changed quickly without the use of a chuck key. The original version was made from relatively soft aluminium. The re-manufactured K114B is made from stainless steel and is easier to use than the original.

K114BVI K114B AO Quick Release Attachment

K220 Blades

	CUT THICKNESS	LENGTH	WIDTH
K142	1.0mm	30.0mm	6.4mm

K149	0.65mm	42.7mm	19.1mm
K154	0.65mm	42.7mm	9.5mm
K155	0.65mm	42.7mm	14.0mm

K220 Mark II Sagittal Saw

The Mark II Saw is more robust in construction than the K120 Saw. Blade attachment is by use of a Hex Wrench. While this gave a more rigid attachment of the blade to the saw it was also the weak point of the attachment.

We have re-engineered the blade holding mechanism to make it stronger and made the whole attachment from stainless steel.

The Mark II Saw drives a larger range of blades including longer ones up to 42mm useful in the TTO and TTA procedures.

K220VI K220 Mark II Sagittal Saw Attachment

K133	0.7mm	15.1mm	10.4mm

MiniDriver Hose

The standard hose is a 3m long double hose which vents back at the wall gas outlet or the regulator. In the UK the standard drive gas is bottle sterile medical air delivered at 7bar (100psi). Elsewhere in the world nitrogen may be used.

The standard hose supplied is fitted with an MA7 gas probe (medical air at 7bar) which prevents connection to other gases e.g. oxygen.

3MHOSEVI MiniDriver Hose

3MHOSEVIUS MiniDriver Hose US Schrader

Air Hoses

What do I need?

To get the correct hose you will need to know two things – the make/model of instrument the hose is to fit, and the type of supply outlet you have.

Outlet connectors cause most fitting issues. Most usual outlet – UK MA7. This will only accept UK MA7 probes. If your hose pushes in, but will not click home, the hose usually has a US Schrader fitting. Hoses sourced outside the UK and USA are very unlikely to be compatible with UK outlets as each country has its own connectors for safety reasons.

Hose outlet connectors are shown with the relevant outlet. Schrader hoses can be as shown but can also have no gutter round the probe.

A UK MA7 probe will fit a Schrader socket, but a Schrader probe will NOT fit a UK MA7 outlet without a special adaptor.

UK MA7

SCHRADER

Common Instrument Connectors:

3M Connector – fits MiniDriver, MicroDriver and Minos A200.

Halls Connector - fits most Halls Air Tools, Surgairtome Spinal System and many others.

Hose Probes

UK supplied hoses come with an MA7 probe (medical air 7 Bar pressure). Schrader fittings on hoses purchased from the USA look similar to UK MA7 probes. Many will however not lock into UK MA7 sockets. The best solution is to change the probe. A cheaper alternative is to use a Schrader/ MA7 Converter (001758).

001758 MA7 Male to Schrader Female Plug in Adaptor

Halls (Linvatec) Spinal Bur System Surgairtome II

The Surgairtome II has an air brake, so the bur stops immediately the trigger is released.

505800-A Surgairtome II Kit. Includes Hose Medium Bur Guard & Motor
5058 Surgairtome II Handpiece Only
HALLHOSEVI Vi Hose – Halls Fitting 3m Long

Bur Guards

VIMBG Medium Bur Guard For Burs 45-51mm Long
VILBG Long Bur Guard For Burs 70mm Long

Halls Bur Guards

Spinning at 100,000 rpm the shaft needs support. These are the original Halls Guards.

1375-023 Extra Long Halls Bur Guard
1375-011 Long Halls Bur Guard
1375-012 Medium Halls Bur Guard

Burs

All surgical burs have a 2.36mm shank (HP fitting) and will fit in all high speed surgical bur systems e.g. 3M's Minos, Halls Surgairtome and Freedom. We have selected Komet burs for their high quality. All are single pack and non sterile. In human surgery, burs are regarded as disposable items. In veterinary surgery the cost precludes using burs as disposables. However, use of burs which are less than sharp extends procedure time and creates heat. We do advise that burs are checked and changed on a regular basis. Diamond burs are sharper and create less heat than carbide equivalents. Adequate irrigation is essential.

BURS		HEAD SIZE	OVREALL LENGTH	BUR GUARD	ORDER CODE (Carbide)	ORDER CODE (Diamond)

Cervical Intervertebral Fusion Implant

C-LOX has been developed by Rita Leibinger in cooperation with Professor Dr. Frank Forterre, Bern University (Switzerland). Surgical protocol available on request.

C-LOX Complete Set

The C-LOX Complete Set:

- C-Lox Tray x1
- Screwdriver Handle Silicone x1
- C-LOX Screwdriver Shaft 2.7mm Star-Drive 135mm AO x1
- Locking Drill Guide 2.7 (1 of each size working end) x5
- C-LOX Implantation Placement Rod 22cm x2
- C-LOX Spinal Curette 22cm x1
- Bone Drill AO Shaft Ø 2.0 mm 100/75 mm x1
- Bone Drill AO Shaft Ø 2.5 mm 110/85 mm x1
- C-LOX Spinal Cage Titanium, 2,7mm H-Plate with Almond Cage Locking with Spikes (1 of each size) x10
- C-LOX Sizing Cage for Spinal Cage H-Plate with Almond Cage (1 of each size) x10
- Star Drive Spinal Cage Locking Screw Titanium x5 of each length

CLOX134010001 C-LOX Complete Set - New Version

C-LOX Screwdriver Handle

Silicone handle, sterilisable up to 134°.

CLOX247010200 C-LOX Screwdriver Handle

C-LOX Screwdriver Shaft 2.7mm

Star Drive T10, 135mm long. AO connection, self holding.

CLOX134080027 C-LOX Screwdriver Shaft 2.7mm

C-LOX Cages

- CLOX134-0144-08** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 14mm x 4
- CLOX134-0146-08** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 14mm x 6
- CLOX134-0164-08** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 16mm x 4
- CLOX134-0165-10** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 16mm x 5
- CLOX134-0166-08** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 16mm x 6
- CLOX134-0167-10** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 16mm x 7
- CLOX134-0185-10** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 18mm x 5
- CLOX134-0187-10** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 18mm x 7
- CLOX134-0206-12** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 20mm x 6
- CLOX134-0208-12** CLOX Spinal Cage Titan 2.7mm H Plate Almond Cage 20mm x 8

C-LOX Spinal Cage Locking Screws

Self drilling 2.7mm locking titanium cortex screw with star drive head.

- CLOX245-427-10** CLOX Spinal Cage Locking Screw 12mm Thread Length 10mm
- CLOX245-427-12** CLOX Spinal Cage Locking Screw 14mm Thread Length 12mm
- CLOX245-427-14** CLOX Spinal Cage Locking Screw 16mm Thread Length 14mm
- CLOX245-427-16** CLOX Spinal Cage Locking Screw 18mm Thread Length 16mm
- CLOX245-427-18** CLOX Spinal Cage Locking Screw 20mm Thread Length 18mm
- CLOX245-427-20** CLOX Spinal Cage Locking Screw 22mm Thread Length 20mm

C-LOX Twist Drill

Anti-skid tip and length matched to C-LOX drill sleeve. AO fitment.

- CLOX148008120** C-LOX 2.0mm AO shaft Twist Drill Bit 100mm Long
- CLOX148008125** C-LOX 2.5mm AO shaft Twist Drill Bit 110mm Long

C-LOX Locking Drill Guides

Used with 2.0mm drills and 2.7mm screws.

- CLOX164002710** Locking Drill Guide 2.7mm 10mm Working End
- CLOX164002712** Locking Drill Guide 2.7mm 12mm Working End
- CLOX164002714** Locking Drill Guide 2.7mm 14mm Working End
- CLOX164002716** Locking Drill Guide 2.7mm 16mm Working End
- CLOX164002718** Locking Drill Guide 2.7mm 18mm Working End
- CLOX164002720** Locking Drill Guide 2.7mm 20mm Working End

C-Lox Spinal Disk Broaching Curette

Used for removing disk material and creating bed for cage. 220mm long.

CLOX134070022 C-LOX Spinal Disk Broaching Curette

The products on this page are only available in selected countries. Please check with Vi for availability.

C-Lox Implant Placement Rod

Threaded tip engages with trial cages and with implantable cages. 220mm long.

CLOX134075022 C-LOX Implant Placement Rod

This product is only available in selected countries. Please check with Vi for availability.

C-Lox Distractor

Used to distract the intervertebral disk space. 90mm deep.

CLOX134075016 C-LOX Distractor 90mm Deep

This product is only available in selected countries. Please check with Vi for availability.

Instrumentation

Percussion Mallet

Designed for consistent neurological examination.

001322 Percussion Mallet 180mm Long

Rongeurs & Punches

All rongeurs and spine forceps cut with one part of the jaw inserted into the compromised spinal canal.

Our spine instruments are designed to minimise the size of the lower jaw. In many cases this will reduce the cutting strength of the instrument which should only be used on appropriate bone thickness.

A selection of Rongeurs will be required.

Duck-Billed Daniel Rongeurs

Designed by Simon Wheeler BVSc PhD, these Rongeurs can remove full thickness lamina bone in small dogs.

They are however, best used to remove the layer of deep cortical bone overlying the spinal cord once the superficial cortex and cancellous bone have been removed using power tools; this is particularly true of the medium and large dog.

001400 Duck-Billed Daniel Rongeurs 3mm Bite 177mm Long

Daniel Rongeur

The jaws of this instrument are straight and the bite is small. Also suitable for bulla osteotomy.

001402 4mm Daniels Rongeurs 130mm Cvd

Micro Spine Rongeur Set

Very fine Rongeurs with a 1.75mm (width) bite. Set contains three variations, straight, curved and angled.

142600 Micro Spine Rongeurs Set of 3

Laminectomy Rongeurs

These Rongeurs have been developed specifically for Laminectomy in the dog.

- 001432 Laminectomy Rongeurs 2mm 160mm
001433 Laminectomy Rongeurs 3mm 160mm

Compound Action Spinal Rongeurs

Much more powerful than the Daniels, this instrument can nibble through full thickness lamina. The jaws are very fine and angled to allow the surgeon to enlarge the inter-vertebral foramen.

Available in 2mm, 3mm and 4mm jaw widths. Length 190mm.

- 001429 Compound Action Spinal Rongeurs 2mm
001430 Compound Action Spinal Rongeurs 3mm
001431 Compound Action Spinal Rongeurs 4mm

Lempert Straight

Useful for spines and bulla osteotomy.

- 6730/10 Lempert Rongeurs Straight 3mm Bite 190mm Long

Stille-Luer Rongeurs

A very large rongeur.

- 142305 Stille-Luer Heavy Compound Action Rongeurs Curved 8mm 225mm Long

Mini-Friedman

Useful in bulla osteotomy.

- 142501 Mini-Friedman Rongeur Curved 3mm Bite 160mm Long

Smith-Kerrison Punch Forceps

This is a traditional design with a 40 degree upward cutting jaw. Robust spine forceps. 185mm shaft.

- 001143 2mm Self Clearing Kerrisons
001445 Smith-Kerrison Punch Forceps 2mm
001446 Smith-Kerrison Punch Forceps 3mm

Micro-Friedman

A small spine rongeur.

- 142502 Micro-Friedman Rongeur Curved 2.2mm Bite 155mm Long

40° Bone Punch Forceps (Low Profile)

Designed for use where a high speed bur has removed the outer cortical layer and the underlying cancellous layer, the powerful nibbling action of this device allows very controlled removal of the final layer of cortical bone. The wedge-shaped foot of this device is designed to allow good access whilst still retaining strength, and is polished to minimise friction and potential trauma. Overall length 210mm.

- 001438 Batemans Spine Punch 40 Degree Upward Cut 2mm
001441 Batemans Spine Punch 40 Degree Upward Cut 4mm

Retractors & Distractors

Gelpi Odd Leg Retractor

The asymmetric pattern is most typically used for a dorsal approach to the spine, where the long arm extends deep to retract the longissimus dorsi muscle, as the short arm engages with axial structures. They are supplied in matched, opposite pairs to create a rectangular window of exposure.

- 001333 Gelpi Self Retaining Retractors Odd Leg 205mm Pair
- 001334 Gelpi Self Retaining Retractors Odd Leg 130mm Pair

Spike and Shield Odd Leg Retractor

Operates in a similar fashion to the odd leg Gelpis but the muscle retaining shield creates a wider field of view. Shield size 25 x 25mm. Supplied in pairs left and right.

- 001480 Spike and Shield Odd Leg Gelpi 180mm Pair

Cone Laminectomy Retractor

Similar in size to a Travers retractor but with articulated arms, the cone retractor allows a very flexible field of retraction, with the additional benefit that it can be folded away from the operation site. Maximum retraction, minimum interference.

- 001335 Cone Laminectomy Retractor 160mm Long

Small Spine Distractor

The tips of the small distractor are designed to fit into inter-vertebral spaces. The surfaces pushing against the end plates are serrated for maximum grip. Tips when closed 4mm. Overall length 140mm. Tips are staggered for easy introduction.

- 001491 Small Spine Distractor

McKee Distractor With Speedlock

The odd legs of this dedicated distractor engage the inter-vertebral space cranial to and caudal to the space involved.

The speedlock opens the disc space leaving it uncluttered by instrumentation.

- 090257 McKee Distractor With Speedlock 240mm

FitzExcavator Set

Designed and developed by Noel Fitzpatrick this excavator set includes all the necessary hand instruments for surgical management of canine inter-vertebral disc disease.

The set consists of 5 cutting instruments: one left, one right, plus 3 straight instruments 2.00mm, 1.00mm and 0.5mm.

Set also includes 001275 Molt Periosteal Elevator 4mm/6mm.

The six instruments are supplied in a stainless steel autoclavable case.

- 001428 FitzExcavator Set

Hand Instruments

Periosteal Elevator Very Fine

001272 Periosteal Elevator Very Fine 2mm/3mm 180mm Long

Chase Spinal Hook

Based on a suggestion from Damian Chase. This probe is useful for manipulation of the spinal cord and nerve roots during certain surgeries.

001451 Chase Spinal Hook 8mm 90° Offset 145mm Long

Dandy Nerve Hook

The Dandy nerve hook is useful for manipulation of nerves and nerve roots. Also useful for manipulation of the medial meniscus during CCL procedures.

001408 Dandy Nerve Hook 1mm 190mm Long
001409 Dandy Nerve Hook 2mm 220mm Long

Bone Curette

Following requests for a House curette with smaller scoops. This is the smallest scoop we can provide whilst still being strong enough to elevate bone.

001412 Bone Curette 2.0mm Scoop 145mm Long

Freer Periosteal Elevator

The Freer elevator is a fine instrument which is particularly useful in spinal work.

7350/05 Freer Periosteal Elevator 5mm 180mm Long

House Curette

The House curette is a strong small curette to lift bone from around the spinal cord. Double ended 2.5mm and 3.0mm scoops.

7262/05 House Curette 2.5 & 3.0mm Scoops 150mm

Burley Disc Scoop

The Burley disc scoop is designed to remove material without repeated insertions into the disc space. As the scoop is moved around, the nuclear material travels along the channel and out.

001501 Burley Disc Scoop

Rosen Mobiliser

With care, intraneural canal structures can be manipulated. Removal of disc debris is essential to achieve decompression of the cord. The curved tip of this instrument is very useful.

7105/40S Rosen Mobiliser No.8 160mm

Sheas Curette

Fenestration of discs, particularly cervical discs, can be a useful procedure. The Sheas Curette is a very small scoop. 2.5mm in diameter.

001410 Sheas Disc Curette 2.5mm Diameter 170mm

Bone Wax

It will not help you if you hit a venous sinus but will control the blood from cut cancellous bone which obscures the visual field. The wax physically blocks the blood vessels.

001460 Bone Wax 12 x 2.5g

Younger Good Scaler Jaquette Scaler

Younger Scaler

Jaquette Scaler

Both instruments are for the removal of wafer thin bone overlying the spinal cord during Laminectomy.

The Younger Good scaler is blunt-backed and useful for removal of disc material from both disc spaces and neural canal. This is not a standard scaler in that all the sharp surfaces are softened to minimise spinal trauma.

The Jaquette scaler is sharp and best suited to hooking out the final lamina.

001422 Younger Good Scaler 175mm

001424 Small Jaquette Scaler 165mm

Lyostypt®

Lyostypt® is a wet-stable collagen haemostat. Collagen leads to thrombocyte adhesion and to activation of coagulation factor XII. 30 x 50mm. 12 units per pack.

- Achieves haemostatis very swiftly
- Is completely absorbable
- Can be removed easily
- Can be applied endoscopically
- Can be combined with fibrin glue and antibiotics

1069128 Lyostypt® (12 Units)

Spinal Needles

405255 22g x 3" Spinal Needles Disposable Box of 25

405253 20g x 3.5" Spinal Needles Disposable Box of 25

405252 20g x 3" Spinal Needles Disposable Box of 25

J0529AN 18g x 6" Spinal Needle Disposable. Single Sterile

VETIGEL®

Exclusively available from Vi®

VETIGEL® is a haemostatic gel that is designed to stop moderate to severe bleeding within seconds. VETIGEL® helps control bleeding in animals by achieving haemostasis in seconds without the need for manual pressure.

VETIGEL® can be used on a variety of procedures, including but not limited to: dental extractions, oral mass removals, abdominal and thoracic mass removals, soft organ biopsies, enucleations, spays and neuters, amputations, venous and arterial bleeds, cholecystectomies, catheterisation, and lacerations.

VETIGEL® Haemostatic Gel

VET-02 VETIGEL Haemostatic Gel 2 x 5ml

VET-05 VETIGEL Haemostatic Gel 5 x 5ml

VETIGEL® Accessory Packs

ACC-01 VETIGEL Haemostatic Gel 2 x Accessory Packs

Artery Forceps

Spencer Wells

Standard veterinary artery forceps.

106600	Spencer Wells Artery Forceps Str 12.5cm 5"
106605	Spencer Wells Artery Forceps Str 15cm 6"
106610	Spencer Wells Artery Forceps Str 18cm 7"
106615	Spencer Wells Artery Forceps Str 20cm 8"
106620	Spencer Wells Artery Forceps Str 23cm 9"
106621	Spencer Wells Artery Forceps Str 30cm 12"
106625	Spencer Wells Artery Forceps Cof 12.5cm 5"
106630	Spencer Wells Artery Forceps Cof 15cm 6"
106635	Spencer Wells Artery Forceps Cof 18cm 7"
106640	Spencer Wells Artery Forceps Cof 20cm 8"
106645	Spencer Wells Artery Forceps Cof 23cm 9"

Halstead Mosquito

Very light but adequate for routine haemostasis in all but the largest blood vessels.

103165	Halstead Mosquito Artery Forceps Str 10cm 4"
103170	Halstead Mosquito Artery Forceps Cof 10 cm 4"
103175	Halstead Mosquito Artery Forceps Str 12.5cm 5"
103225	Halstead Mosquito Artery Forceps Cof 12.5cm 5"
103180	Halstead Mosquito Artery Forceps 1/2 Teeth Str 12.5cm 5"
103185	Halstead Mosquito Artery Forceps 1/2 Teeth Cof 12.5cm 5"

Kocher

Similar to Rochester Peans, but with a 1/2 toothed tip for added security.

105520	Kocher Artery Forceps Cof 14cm 5.5"
105521	Kocher Artery Forceps Str 15cm 6"
105522	Kocher Artery Forceps Cof 15cm 6"

Rochester Pean

Long jaw forceps, useful as a hysterectomy clamp in cats and small-medium breed bitches.

106225	Rochester Pean Artery Forceps Str 14cm 5.5"
106230	Rochester Pean Artery Forceps Str 16cm 6.5"
106235	Rochester Pean Artery Forceps Str 18cm 7"
106236	Rochester Pean Artery Forceps Str 22cm 8.5"
106270	Rochester Pean Artery Forceps Cof 14cm 5.5"
106275	Rochester Pean Artery Forceps Cof 16cm 6.5"
106280	Rochester Pean Artery Forceps Cof 18cm 7"
106285	Rochester Pean Artery Forceps Cof 20cm 8"
106290	Rochester Pean Artery Forceps Cof 22cm 9"

Crile

Jaw is somewhat lighter than the more popular Spencer Wells Artery Forceps.

101750	Crile Artery Forceps Str 14cm 5.5"
101755	Crile Artery Forceps Atraumatic Jaws Str 14cm 5.5"
101765	Crile Artery Forceps Str 16cm 6.5"
101775	Crile Artery Forceps Str 18cm 7"
101780	Crile Artery Forceps Cof 14cm 5.5"
101785	Crile Artery Forceps Atraumatic Jaws Cof 14cm 5.5"
101795	Crile Artery Forceps Cof 16cm 6.5"
101800	Crile Artery Forceps Cof 18cm 7"

Negus Forceps

7018/05	Negus Artery Forceps Small Cof 18cm 7"
----------------	--

Kelly

106700	Kelly Artery Forceps Curved 14cm 5.5"

Surgical Scissors

Surgical scissors are typically either one of two designs. The Mayo is the general purpose surgical scissor in which the blade occupies approximately one third of the length of the scissor. The 14cm straight Mayo is the standard veterinary surgical scissor. The Metzenbaum is a finer, lighter scissor in which the blade occupies approximately one quarter of the scissor length. Using a 14.5cm Metzenbaum rather than a 14cm Mayo will give you a finer scissor but a similar working distance.

Each style of scissor is available in four different versions which vary according to blade construction and cutting characteristics. They can be identified by handle colour.

- Standard: Stainless - silver-coloured throughout
- Supercut: Black handles
- Tungsten Carbide: Gold handles
- Supercut T.C.: One black handle, one gold handle

Surgical Scissor - Mayo

The Mayo is a general purpose surgical scissor.

745300	Mayo Chamf Blades Str 14cm 5.5"
745310	Mayo Chamf Blades Str 16.5cm 6.5"
745320	Mayo Chamf Blades Str 19cm 7.5"
745330	Mayo Chamf Blades Str 21.5cm 8.5"
745400	Mayo Chamf Blades Cof 14cm 5.5"
745410	Mayo Chamf Blades Cof 16.5cm 6.5"
745420	Mayo Chamf Blades Cof 19cm 7.5"
745430	Mayo Chamf Blades Cof 21.5cm 8.5"

Surgical Scissor - Supercut

One blade is sharpened to a tapered edge which greatly enhances the ability of the scissor to slice through tissues. The standard scissor has much more of a crushing action. Identified by having black handles.

760000	Mayo Supercut Str 14cm 5.5"
760002	Mayo Supercut Cof 14cm 5.5"
760008	Metzenbaum Supercut Str 14.5cm 5.75"
760009	Metzenbaum Supercut Cof 14.5cm 5.75"
760010	Metzenbaum Supercut Str 18cm 7"
760012	Metzenbaum Supercut Cof 18cm 7"

Surgical Scissor - Metzenbaum

The Metzenbaum is a finer lighter scissor than the mayo.

746100	Metzenbaum Scissor Str 14.5cm 5.75"
746101	Metzenbaum Scissor Str 15cm 6"
746110	Metzenbaum Scissor Str 18cm 7"

Bandage Scissors

Veterinary Bandage Scissors

Lower profile and slightly straighter than standard Lister bandage scissors, to better fit veterinary patients. Listers are often too bulky, as they are designed for larger human patients.

744820 Veterinary Bandage Scissors 14cm 5.5"

744830 Veterinary Bandage Scissors 19cm 7.5"

Lister Bandage

744800 Lister Bandage Scissor 14.5cm 5.5"

744810 Lister Bandage Scissor 18cm 7"

General Purpose Dressing Scissors

The comfortable handles and serrated blades make these a useful all round dressing scissor inexpensive enough for each consulting room.

744840 General Purpose Dressing Scissors 19cm 7.5"

Stitch Cutters

Heath Stitch

General purpose stitch cutter.

743800 Heath Stitch Scissors 15cm 6"

Littauer Stitch

Very nice for removal of small awkward sutures.

745095 Littauer Stitch Scissors 9cm 3.5"

745100 Littauer Stitch Scissors 11cm 4.5"

745110 Littauer Stitch Scissors 12.5cm 5"

Castroviejo Suture Removal Scissors

Designed for the removal of very fine sutures. The Castroviejo action matches that of the Castroviejo Needle Holders.

014185 Castroviejo Suture Removal Scissors 12cm 4.5"

Needle Holders

Dedicated needleholders offer the best grip, and dedicated suture scissors offer the best cutting action. However combined needleholder/scissors are very popular for convenience in spite of the functional compromise. Most Vi needleholders are available with tungsten carbide jaw inserts. These grip and wear better. Particularly useful for smaller needles. Identified by gold handles.

Olsen Hegar Scissor/Needle Holder

Olsen Hegars are usually considered the 'go to' choice for general surgery. Highly recommended. Combined scissor/needle holder.

585400	Olsen Hegar Needle Holders 14cm 5.5"
585410	Olsen Hegar Needle Holders 16.5cm 6.5"

604715	Mayo Hegar T.C. Jaws 16cm 6"
604715L	Mayo Hegar T.C. Jaws - Left Handed 16cm 6"
604720	Mayo Hegar T.C. Jaws 18.5cm 7"
604735	Mayo Hegar T.C. Jaws 20cm 8"
604740	Mayo Hegar T.C. Jaws 23cm 9"

DeBakey Needle Holders

Much lighter in construction than the Mayo Hegar. These needleholders are very useful for deep surgical procedures where there is limited space e.g. chest surgery.

602005	DeBakey Needle Holders T.C. Jaws 18cm 7"
602010	DeBakey Needle Holders T.C. Jaws 20cm 8"
602030	DeBakey Needle Holders T.C. Jaws 22.5cm 8.5"
602015	DeBakey Needle Holders T.C. Jaws 23cm 9"
602020	DeBakey Needle Holders T.C. Jaws 25cm 10"
602025	DeBakey Needle Holders T.C. Jaws 30.5cm 12"

McPhails

The McPhails needle holder has one soft copper jaw for extra needle grip, the other is stainless steel. The catch engages with a moderate squeeze on the handles. Further pressure releases the catch and the needle.

584650	McPhails Needle Holders 15cm 6"
584660	McPhails Needle Holders 18cm 7"
584670	McPhails Needle Holders 20cm 8"

Gillies

Combined scissor/needle holder. No ratchet.

582950	Gillies Needle Holders RH 16cm 6.25"
582951	Gillies Needle Holders LH 16cm 6.25"
602950	Gillies Needle Holders T.C. Jaws RH 16cm 6.25"
602951	Gillies Needle Holders T.C. Jaws LH 16cm 6.25"

Foster Gillies

Smaller than the standard Gillies this instrument is useful for finer surgery or smaller hands.

- 582650 Foster Gillies Needle Holders RH 12.5cm 5"
- 602700 Foster Gillies Needle Holders T.C. Jaws RH 12.5cm 5"
- 602705 Foster Gillies Needle Holders T.C. Jaws LH 12.5cm 5"

Kilner Needle Holders

Kilner needle holders are similar to 140mm Mayos but the arms are cranked, offsetting the jaws from the handles by around 10mm.

- 608000 Kilner Needle Holders 14cm 5.5"

Miniature Foster Gillies

- 602710 Miniature Foster Gillies T.C. 10cm 4"

Ryder Needle Holders

Ideal for small needles. The smaller sizes are an alternative for ophthalmic needleholders.

- 606340 Ryder (Micro) T.C. Jaws 12.5cm 5"
- 606345 Ryder (Micro) T.C. Jaws 15cm 6"
- 606350 Ryder (Micro) T.C. Jaws 18cm 7"

Castroviejo

Classic ophthalmic needleholder with catch. Infrequent ophthalmic surgeons should also consider Miniature Fosters or Ryders as the squeeze action of Castroviejos requires patience and practice to master. Also available without catch.

- 014175 Castroviejo Needle Holders With Catch T.C. 15cm 6"
- 014177 Castroviejo Needle Holders Without Catch T.C. 15cm 6"

Derf Needle Holder

The Derf needle holder is a small T.C. needleholder with slightly heavier jaws than the Ryder. More resistant to surgeon abuse!

- 607010 Derf Needle Holder T.C. Jaws 12cm 5"

Castroviejo Needle Holders/Scissor

This Instrument functions as a standard Castroviejo needleholder but the jaws incorporate a suture cutting function in the style of Olsen Hegars or Gillies. Jaws are tungsten carbide for maximum grip.

- 014181 Castroviejo Needle Holders/Scissor Str T.C. 15cm 6"
- 014182 Castroviejo Needle Holders/Scissor Cof T.C. 15cm 6"
- 014183 Castroviejo Needle Holders/Scissor Str 'S'Cut T.C. 15cm 6"
- 014184 Castroviejo Needle Holders/Scissor Cof 'S'Cut T.C. 15cm 6"

Galibans Suture Forceps

Use when placing sutures under tension. A good example is the placement of a lateral stabilising suture in the management of cranial cruciate ligament failure or abdominal sutures in an overweight dog. Galibans used by an assistant are used to atraumatically secure the first throw. The Galibans are removed as the second throw is tightened.

342040	DeBaKey Dissecting Forceps 24cm 9.4"

Epilation Forceps

342450	Epilation Forceps Square Jaws Plain 9cm 3.5"
---------------	--

St. Martin Dissecting Forceps

A very fine rat tooth for delicate procedures including corneal surgery.

014160	St. Martin Dissecting Forceps Teeth 9cm 3.5"
---------------	--

Retractors

Good retraction is the key to success in many procedures, especially surgery on deep structures e.g. the pelvis or the larynx.

Langenbeck Retractor

684375	Langenbeck Retractor 6mm Blade 21.5cm 8.5"
684395	Langenbeck Retractor Long Reach 6mm x 35mm Blade 21.5cm 8.5"
684380	Langenbeck Retractor 13mm Blade 21.5cm 8.5"
684390	Langenbeck Retractor 20mm Blade 21.5cm 8.5"
684385	Langenbeck Retractor 25mm Blade 21.5cm 8.5"

Morris Retractor

Much wider than the Langenbeck, good for fat abdomens.

684750	Morris Retractor 38mm 1.5" 21.5cm 8.5"
684755	Morris Retractor 50mm 2" 26cm 10"
684760	Morris Retractor 65mm 2.5" 22cm 8.5"

Senn (Cats Paw) Retractor

833305	Senn Retractor Sharp (Cats Paw) 16cm 6"
833310	Senn Retractor Blunt (Cats Paw) 16cm 6"

Fat Pad Retractor

Visualisation of the medial meniscus is maximised by retraction of the fat pad. Previously this has been achieved by use of a Senn (Cats Paw) retractor. The fat pad retractor has the same clawed foot but has a much more practical means of holding the instrument.

001114	Fat Pad Retractor 3 prong 18cm 7"
001114S	Fat Pad Retractor 2 prong Small 18cm 7"

Malleable (Walton) Retractors

These flat plates of soft stainless steel are bent intra-operatively to retain abdominal structures.

- 687613 Walton Retractor 13mm wide 175mm Long
- 687825 Walton Retractor 25mm wide 250mm Long
- 687651 Walton Retractor 50mm wide 330mm Long

Collins Retractor

The two blades swivel as retraction takes place. They self-centre in the incision.

- 703260 Collins Retractor 110mm Spread

Finochietto Rib Retractor

Finochietto is the standard rib retractor; available in large and small.

- 704000 Rib Retractor Finochietto Small 95mm Spread
- 704005 Rib Retractor Finochietto Large 130mm Spread

Gosset Retractor

Good as a rib retractor, laparotomy retractor and for retraction of ventral cervical structures during cervical fenestration.

- 701550 Gosset Retractor Large 185mm Spread
- 710600 Gosset Retractor Small 100mm Spread

Balfour Retractor

The original Balfour has for many years served as the standard large abdominal retractor for canine surgery. However the standard midline canine approach is very different from the standard human approach. Alasdair Hotston Moore has re-visited the original design and has made some significant changes which improve the instrument both in use and sterilisation.

The central blade in the Balfour slides freely on the back bar and automatically self-centers. If the lesion or organ of interest is off-centre this is undesirable. The Balfour locking ring fits onto the back bar and may be locked in any position, holding the blade off centre. The Balfour locking ring fits all Vi Balfours.

- 25-2375AHM AHM Balfour Retractor 180mm Spread
- 25-2375 Standard Balfour Retractor 180mm Spread
- 25-2377 Medium Balfour 115mm Spread
- 25-2376 Baby Balfour Retractor 90mm Spread
- 25-2375R Balfour Locking Ring

Ring Retractor

Some abdominal approaches require a more complex retraction system than a simple Balfour or Gossett. The Vi Ring Retractor allows the surgeon to place hooked retractor strips around the periphery of a surgical incision which may then be tensioned individually and retained around the edge of the ring.

The ring is laser cut from stainless steel which is thin enough to mould to the profile of the patient. Slots are cut every 15mm around the periphery of the ring into which lock one or more retractor strips.

The strips are manufactured from silicone with a stainless hook. The strips are autoclavable but will require periodic replacement.

All the rings fit into standard counter-top autoclaves.

Please note: Vi Sterile Hooks are compatible with other retractor systems.

- 701700 Ring Retractor Set - S, M, L Rings With 10 Sterile Hooks
- 701701 Large Ring 200 x 130mm Internal
- 701702 Medium Ring 160 x 85mm Internal
- 701703 Small Ring 110 x 40mm Internal
- 701HOOK-A Set of 10 Sterile Hooks

Travers Retractor

Useful for retraction of skin and superficial soft tissue.

- 703051** Travers Self Retaining Retractor 70mm Spread 16.5cm 6.5"
- 703050** Travers Self Retaining Retractor 90mm Spread 20cm 8"
- 703053** Travers Self Retaining Retractor Mini 43mm Spread 9.5cm

Weislander Retractor

Arms are flat compared with the Wests. Proportions differ from Travers.

- 702150** Weislander Self Retaining Retractor Sharp 60mm Gape 14cm 5.5"
- 702152** Weislander Self Retaining Retractor Blunt 60mm Gape 14cm 5.5"

West Retractor

Widely used but sharp points tend to snag tissues. Curved arms sit quite nicely on small veterinary patients.

- 703250** West Retractor 50mm Spread 14cm 5.5"
- 703253** West Retractor 40mm Spread 9.5cm 4"

Gelpi Self Retaining Retractor

The Gelpi is an extremely versatile self retaining retractor useful in almost any orthopaedic procedure. Veterinary Instrumentation Gelpis are different from standard Gelpis in two respects:

1. Short blunt tips give focal retraction for precise exposure of the fracture or lesion
2. The teeth on the ratchet are smaller than usual giving finer control over the spread of the tips

Gelpis are virtually an extra pair of hands and are invaluable where the surgeon is working without a scrubbed assistant. The curved shape fits nicely on our patients.

Two pairs of Gelpis placed at right angles to one another may be used to create a window into a joint or fracture site. Gelpis are available in a number of lengths. Measurement 'a' gives the depth of the tips.

Available as singles or sets of two Gelpis.

- 001330** Gelpi Retractor 120mm Spread (a=20mm) 180mm Long
- 001330SL** Gelpi Retractor With Spinlock (a=20mm) 180mm Long
- 001330S** Gelpi Retractor Sharp Tips (a=20mm) 180mm Long
- 001331** Gelpi Long Reach (a=40mm) 200mm Long
- 001331L** Gelpi Very Long Reach (a=60mm) 200mm Long
- 001332** Gelpi Small 60mm Spread (a=15mm) 135mm Long
- 0013301** Gelpi Mini Flat 45mm Spread (a=15mm) 90mm Long
- 0013302** Gelpi Mini Curved 45mm Spread (a=15mm) 90mm Long
- 0013303** Gelpi Mini Curved 45mm Spread Blunt Tips 90mm Long

- 001330/2** Gelpi Retractors 120mm Spread (a=20mm) 180m Long Set Of 2

- 0013302/2** Gelpi Mini Curved 45mm Spread (a=15mm) 90mm Long - Set Of 2
- 0013303/2** Gelpi Mini Curved 45mm Spread 90mm Long Blunt Tips - Set Of 2
- 001333** Gelpi Self Retaining Retractors Odd Leg 205mm Pair

Bungee Gelpi Self Retaining Retractors

Based on the Vi standard Gelpi, with added anchor points for elastic stays allowing 4 point retraction from a single two point instrument. Anchor points may be double loaded for 6 point retraction. Accepts Vi Sterile Hooks.

Advantages:

- Better retraction with fewer retractors cluttering a wound
- Greater stability of Gelpi's within a wound with four or six point retraction preventing the tips from sliding towards each other. Easier for surgeries which are often performed in a more vertical position, such as perineal hernia repair
- More useful shape to retracted hole – more rectangular than round, square or diamond, but is very adaptable to suit the situation
- Multi-layer retraction such as creating deep retraction with tips and improved skin retraction with the elastic stays

001330BUNGEE Gelpi Bungee Retractor
701HOOK-A Set of 10 Sterile Hooks

Sterile Surgical Skin Marker

Supplied in a sterile peel pouch, the surgical marker allows the surgeon to demarcate selected sites prior to or during surgery. The marker is scrub resistant, non toxic and highly visible. Especially useful around the eyes and ears where accurate reconstruction is vital. Also useful for large skin reconstruction procedures.

001487 Surgical Skin Marker Single

Probes & Cutting Guides

Use the blunt probe to track fistulae. The butterfly cutting guide has a groove along its length to allow a scalpel to be run down without fear of damaging deeper tissues, the vulnerable tissues being protected by the guide. The notched spade end is useful for isolating vessels before ligating.

901010 Blunt Dissection Probe 140mm
901015 Winged Director 130mm

Cheatle Steriliser Forceps

For manipulation of instruments during setting up.

787655 Cheatle Steriliser Forceps 26.5cm 10.5"

Left Handed Instruments

Vi offer a selection of left handed instruments, identified by one black handle.

Vi General Surgery Kit - Left Handed

The Vi General Surgery Left Handed Kit contains:

BOAS Mouth Gag

Patent number: GB2616493

The BOAS Mouth Gag from Vi has been developed specifically to aid surgeons performing BOAS surgery. The unique design allows vastly improved visualisation and surgical access during these procedures.

This device is based on the design of the ever-popular table-top gag for rabbit and rodent dentistry, with several key features and adaptation specifically intended for BOAS surgery.

Special design features include:

- Fully adjustable tilting base to support the upper body of the patient at the desired angle to maximise visualisation and access.
- The tilting base is supported by sturdy upright bars to ensure excellent stability and optimal weight capacity.
- Two adjustable horizontal bars to retain the patients' mouth open in the desired position. Both bars are adjustable up/down, and the upper bar also adjusts forwards/backwards.
- Silicone bar sleeves for the horizontal bars are available to minimise potential trauma to the patient's gums.
- Front-positioned cleat hook to allow tie-down of the tongue if desired.
- Supporting hook for the ET tube or anaesthetic circuit. This is height-adjustable and can be positioned to either the front or the side of the upright.

BOASMG	BOAS Surgery Mouth Gag Complete
BOASST	BOAS Silicone Bar Sleeve 190mm Long
BOASST-SML	BOAS Silicone Bar Sleeve - Small Bars

Airway Surgery Soft Palate Clamp

An overlong palate is a common cause of dyspnoea in the brachiocephalic dog. Shortening the soft palate in an atraumatic manner provides almost immediate relief.

The soft palate clamp was designed by Geoff Lane FRCVS.

The jaws have a special atraumatic grip to hold the very slippery soft palate.

014040 Soft Palate Clamps Large 26 x 12mm 170mm Long

014050 Soft Palate Clamps Small 18 x 7mm 170mm Long

Tonsillectomy Clamp

The standard Negus clamp may be used in pairs for soft palate resection. A right angled version designed by Stephen Baines at the Willows is also available.

014038 Tonsillectomy Clamp Right Angle 190mm Long

014039 Tonsillectomy Clamp Curved 190mm Long

Negus Forceps

7018/05 Negus Artery Forceps Small Cof 18cm 7"

Satinsky Clamp

Useful for intra-thoracic surgery, trimming soft palates and even ears. Atraumatic design maximises haemostasis and minimises trauma.

2685/03 Satinsky Clamps 20mm Jaw 160mm Long

2685/05 Satinsky Clamps 30mm Jaw 200mm Long

Soft Tissue Biopsy Forceps

Designed to take samples of soft tissue masses from the ear or via the mouth, these forceps come in three sizes and will work in combination with standard aural specula.

Fits down all usual aural specula.

014087 Cup Biopsy Forceps 2mm Diameter Shaft 75 x 3.6mm

014087A Cup Biopsy Forceps 2mm Diameter Shaft 100 x 3.6mm

014088 Cup Biopsy Forceps 3.5 x 8mm Shaft 105 x 5.6mm

Angled Allis Tissue Forceps

This angled Allis has 4 into 5 teeth at the tip and is angled mid shaft.

The kink in the shaft of the Allis allows use in the upper airway and pharynx without obstructing other instrumentation.

Please note, at 20cm the length is longer than the standard Allis.

801161 Angled Allis Tissue Forceps 4/5 Teeth 20cm Long

Aural Surgery

Malleable Instrument Set

Fully flexible instruments are difficult to control. Malleable instruments allow the tips to be positioned exactly where the surgeon needs them. The malleable instrument set contains:

- 014098 Malleable Grasping Forceps 145mm Shaft x1
- 014099 Malleable Biopsy Forceps 2mm Cup 145mm Shaft x1
- 012528 Malleable Ear Loop Curette 2.0mm Diameter x1
- 012529 Malleable Ear Loop Curette 4.0mm Diameter x1

Stainless steel box with silicone insert.

- 014125 Malleable Instrument Set in Stainless Steel Case

Canine Ear Loop

Removal of hard wax and other debris from the canine horizontal canal without causing trauma is a common problem in veterinary surgery. It is now accepted that the use of ear loops is more effective than cotton tipped products. Most human ear loops are too large and too short for use with the much longer veterinary specula. Vi's Canine Ear Loop is slimmer and longer to facilitate debris removal without obscuring the visual field. The flexible ear loop is very fine and flexible for added safety. The Buck ear loop is firmer.

- 012526 Canine Buck Looped Ear Curette
- 012528 Malleable Ear Curette Cats/Small Dogs
- 012529 Malleable Ear Curette Medium/Large

Malleable Grasping & Biopsy Forceps

The fine flexible grasping forceps have a maximum diameter of 1.7mm and are therefore ideal for small working channels and speculae. The forceps are available as graspers or as biopsy forceps.

- 014098 2mm Malleable Grasping Forceps 145mm
- 014099 2mm Malleable Biopsy Forceps 145mm

Crocodile Forceps

Removal of foreign bodies, particularly grass seeds, is achieved using long crocodile forceps. Available in traditional designs or as a fine tubular shaft design.

Extra Fine

- 014091 Extra Fine Crocodile Forceps Tubular 3" Shaft
- 014092 Extra Fine Crocodile Forceps Tubular 5" Shaft
- 014093 Extra Fine Crocodile Forceps Tubular 7" Shaft
- 014089 Extra Fine Crocodile Forceps Tubular 9" Shaft

Standard Jaw

- 014094 Aural Crocodile Forceps Standard Jaw 3" Shaft
- 014095 Aural Crocodile Forceps Standard Jaw 5" Shaft
- 014096 Aural Crocodile Forceps Standard Jaw 7" Shaft

TECA Retractor - Pieter Nelissen

Achieving adequate exposure is essential when performing lateral bulla osteotomy and debridement, especially in broad headed breeds, this will mean working down a narrow and surprisingly deep corridor. Following the suggestion from Pieter Nelissen, we have developed a purpose made TECA Retractor. The 40mm long legs are at 80° to the handles to reach deep into the hole created. The cross-over tips are only 3mm across when closed enabling insertion with no edges protruding to snag tissues.

- 001338 TECA Retractor 105mm Long 40mm Cross-Over Legs

Bulla Rongeurs

- 142280 Bulla Rongeurs 200mm

Implants For Hart Pinna Haematoma System

- 014601U/S Fenestrated Implants Pack of 12 Supplied Unsterile

Thoracic Surgery

Thoracic Surgery Kit

Working inside the chest of medium and large dogs will require extended instrumentation. The instruments listed below represent a useful kit. In addition a pair of rib retractors will be required. Other useful instruments include extra long Metzenbaum scissors and right angled forceps (Lahey cholecystectomy clamp and small right angled forceps).

The Thoracic Surgery Kit contains:

106205	45 Degree Curved Forceps 220mm	x1
105415	90 Degree Curved Forceps 245mm	x1
754060	Metz Scissors Str 235mm T.C.	x1
754120	Metz Scissors Curved 235mm T.C.	x1
342020	DeBakey Thumb Forceps 205mm	x1
347665	Rat Tooth Thumb Forceps 205mm	x1
602010	Debakey Needleholders T.C. 200mm	x1
347655	Dressing Forceps 205mm	x1
2685/03	Satinsky Clamps 160mm Long 20mm Jaw	x1
2685/05	Satinsky Clamps 200mm Long 30mm Jaw	x1
BX281450	Instrument Box 280x140x50mm	x1

CAMTHORKIT Thoracic Surgery Kit

Finochietto Rib Retractors

Finochietto is the standard rib retractor, available in large and small.

704000	Rib Retractor Finochietto 95mm
704005	Rib Retractor Finochietto 130mm

Right Angled Clamps

Typically used to dissect around a patent ductus arteriosus and then pull through appropriate ligature material.

014051	Right Angled Lahey Cholecystectomy Clamps 195mm Long
014052	Small Right Angle Clamps 160mm Long
014052S	Small Right Angle Clamps Without Ratchet 160mm Long
014052M	Mixer Forceps With Ratchet 140mm Long
014052A	Right Angled Clamp With Ratchet 250mm

Curved Forceps - Long

106205 45 Degree Curved Forceps 220mm Long

105415 90 Degree Curved Forceps 235mm Long

Thoracic Surgery

Foreign Body Retrieval Forceps

We offer a range of forceps to cover every eventuality from a bone in the oesophagus of a large dog to a grass seed in a cat trachea.

The forceps may be guided by rigid or flexible endoscopes or fluoroscopy. In exceptional cases retrieval may be achieved by 'feel'.

The teeth on these forceps face backwards for maximum grip. When closed the jaws are atraumatic for minimal damage to the oesophagus or trachea. It is helpful to inflate the oesophagus prior to withdrawal of spiky objects.

Key Features:

- Backward-facing teeth for maximum grip
- Jaws are externally atraumatic
- Shaft diameter as small as possible
- Large forceps jaws are angled when closed so that when open they sit mid-oesophagus

014097	Foreign Body Retrieval Forceps	640mm Shaft Length
014097M	Foreign Body Retrieval Forceps	500mm Shaft Length
014097F	Foreign Body Retrieval Forceps	400mm Shaft Length
014097XF	Foreign Body Retrieval Forceps	400mm Shaft Length
014097XXF	Foreign Body Retrieval Forceps	220mm Shaft Length

Code		Diameter at Jaws in mm	Length at Jaws in mm	Shaft Diameter in mm	Shaft Length in mm

Spay Hooks

Use to atraumatically lift uterine horns.

014320 Spay Hook Small 130mm Long

014325 Spay Hook Large 170mm Long

Spay Forceps

Atraumatic spay forceps-tips have fine toothed DeBakey type form.

014211 Spay Forceps 125mm Long

014218 Spay Forceps (DeBakey Type) 125mm Long

Angiotribes

The jaws of this instrument are designed for maximum crushing by serrated longitudinal grooves.

014304 Angiotribes Straight 160mm

014305 Angiotribes Curved 160mm

014301 Angiotribes Straight 200mm

014302 Angiotribes Curved 200mm

Hysterectomy Clamps (Carmault)

These clamps are curved with longitudinal grooves in the jaws to minimise tissue slippage.

- 014307 Hysterectomy Clamp (Carmault) 200mm Long
- 014309 Hysterectomy Clamp (Carmault) 160mm Long
- 014307L Carmault Forceps Curved LH 200mm

Howard 'B' Ovariohysterectomy Clamp

Designed and developed in practice by Howard Taylor who recognised that ovariohysterectomy was far from straightforward, particularly but not exclusively for recent graduates.

The clamp has a number of features which assist the surgeon in the exposure and ligation of the ovarian pedicle.

- The ligature material is preloaded onto the forceps which takes it through the broad ligament
- Longitudinal grooves in the jaw minimise slippage
- As the forceps are rotated the 'B' shaped extension 'collects' and brings together the structures of the pedicle ready for tying
- The forceps sit outside the incision to exteriorise the pedicle
- The ligature is tied without precrushing but is retained by a small haemostat to check for bleeding prior to closure

- 546470 Howard 'B' Ovariohysterectomy Clamp 160mm Long

Hauptman Retractors

This retractor designed by Joe Hauptman maintains distal retraction of the ovary during ligation of the ovarian pedicle. This is the crucial part of the procedure which can be a challenge for even experienced surgeons.

- 014400 Small Hauptman Retractor 10mm Blade
- 014410 Medium Hauptman Retractor 15mm Blade
- 014420 Large Hauptman Retractor 20mm Blade

Obstetrical Items

- 546465 Hobdays Obstetric Forceps for Cats 150mm Long
- 546466 Hobdays Obstetric Forceps for Dogs 210mm Long

- 546455 Killian Bitch Speculum Blade Length 650mm Long (2½")

- 014310 Whelping Forceps 260mm Long

Abdominal Surgery

Vascular Probe Set

A set of 15 vascular probes in a fully autoclavable stainless steel case. The 25mm long angled working tips are of specified diameter permitting accurate documentation of blood vessel diameter and marriage of blood vessel diameters when performing vascular anastomoses. With an overall length of 225mm, these are especially useful in abdominal surgery, in particular for documenting hepatic shunts.

The set includes probe diameters of 1.25mm, 1.5mm, 1.75mm, 2mm, 2.25mm, 2.5mm, 2.75mm, 3mm, 3.25mm, 3.5mm, 3.75mm, 4mm, 4.5mm, 5mm and 6mm. Diameters are clearly etched on the handles.

0014SET Vascular Probe Set

Balfour Retractors

The original Balfour has for many years served as the standard large abdominal retractor for canine surgery. However the standard midline canine approach is very different from the standard human approach. Alasdair Hotston Moore has re-visited the original design and has made some significant changes which improve the instrument both in use and sterilisation.

- 25-2375AHM** AHM Balfour Retractor 180mm Spread
- 25-2375** Standard Balfour Retractor 180mm Spread
- 25-2377** Medium Balfour 115mm Spread
- 25-2376** Baby Balfour Retractor 90mm Spread
- 25-2375R** Balfour Locking Ring

Ring Retractor

Some abdominal approaches require a more complex retraction system than a simple Balfour or Gossett. The Vi Ring Retractor allows the surgeon to place hooked retractor strips around the periphery of a surgical incision which may then be tensioned individually and retained around the edge of the ring.

The ring is laser cut from stainless steel which is thin enough to mould to the profile of the patient. Slots are cut every 15mm around the periphery of the ring into which lock one or more retractor strips.

The strips are manufactured from silicone with a stainless hook. The strips are autoclavable but will require periodic replacement.

All the rings fit into standard counter-top autoclaves.

Please note: Vi Sterile Hooks are compatible with other retractor systems.

- 701700** Ring Retractor Set - S, M, L Rings With 10 Sterile Hooks
- 701701** Large Ring 200 x 130mm Internal
- 701702** Medium Ring 160 x 85mm Internal
- 701703** Small Ring 110 x 40mm Internal
- 701HOOK-A** Set of 10 Sterile Hooks

Ameroid Constrictors

Supplied sterile. Used exclusively in the surgical treatment of hepatic shunts, the Ameroid Constrictor gradually occludes the blood vessel in question allowing the circulation to adjust.

The Casein (clay-like) layer expands as it absorbs water, constricting the blood vessel within. Insertion of metal locking key prevents constrictor from slipping from blood vessel.

Colour variation of the Casein material is normal and does not indicate a defect. The outer case is 304 Stainless Steel.

Selection of Ameroid Constrictor.

Once the portosystemic shunt has been identified and exposed it is suggested that a constrictor should be selected which initially encloses the vessel but does not constrict it.

- AC35-A** Ameroid Constrictor 3.5mm Sterile
- AC40-A** Ameroid Constrictor 4.0mm Sterile
- AC45-A** Ameroid Constrictor 4.5mm Sterile
- AC50-A** Ameroid Constrictor 5.0mm Sterile
- AC60-A** Ameroid Constrictor 6.0mm Sterile
- AC70-A** Ameroid Constrictor 7.0mm Sterile

Doyen Bowel Clamp

201950 Bowel Clamps Doyen Str 9.5" 24cm
201955 Bowel Clamps Doyen Cof 9.5" 24cm

Autoclavable soft silicone shoes created to fit the Doyen Bowel Clamps, making the Doyen more atraumatic. Ribs maximise grip.

- EXTR201950** Silicone Shoe For Doyen Bowel Clamps 1 Pair

Atraumatic Small Bowel Clamp

Jaw design gently holds and seals the bowel with a minimum of pressure and trauma. The fine ratchet facilitates gentle yet secure application.

222165 Bowel Clamps Atraumatic Str 17cm 7" Long
222170 Bowel Clamps Atraumatic Cof 17cm 7" Long

Resano Bowel Clamp

201956 Resano Bowel Clamp 20.5cm 8" Long

Soft Edge Surgical Spoon

Removing calculi from the bladder or impacted faeces from the rectum requires great care to avoid damage.

Our soft edge spoons have been designed and manufactured with veterinary procedures in mind.

Available in three sizes:

- XSmall 230 x 15 x 8mm
- Small 250 x 20 x 10mm
- Large 270 x 44 x 23mm

014703 Soft Edged Spoon - XSmall
014700 Soft Edged Spoon - Small
014701 Soft Edged Spoon - Large
014702 Soft Edged Spoon - Set of 3

Norfolk Vet Products

The Norfolk and DocXS products are based around the CompanionPort device. This is a titanium port with a silicone septum which is implanted during a surgical procedure beneath the skin at a suitable site, depending on accessory connection required. The port is then accessed percutaneously using a special non-coring Huber point needle to either withdraw, sample or administer/flush as required, with minimal disturbance and distress to the patient.

Surgical guides and further information is available online at www.norfolkvetproducts.com

Norfolk products are only available in selected countries. Please check with Vi for availability.

Pleural Port

This version of the Port kit consists of a silicone fenestrated catheter for insertion into the thoracic cavity, with a CompanionPort and three sizes of Huber needle.

Indications for use are repeated aspiration of the thoracic cavity, or intra-cavity chemotherapy.

- NOR-PP-102K** Pleural Port - Dogs
- NOR-PP-202K** Pleural Port - Cats
- NOR-NPX-10** Introducer Kit for Canine Pleural Port

CompanionPort for Vascular Access

The CompanionPort for vascular access is designed to provide a more comfortable way of gaining repeated access to the venous system for both delivery of medication and repeat blood sampling.

Each kit contains a titanium port (3 sizes available) and a round tip radiopaque silicone catheter with depth markings. 22g Huber needles are included in all sizes.

- NOR-CP-100K** CompanionPort Vascular Access Le Petite - Small Cats
- NOR-CP202K** CompanionPort Vascular Access Le Port - Cats & Small Dogs
- NOR-CP305K** CompanionPort Vascular Access Le Grande - Larger Dogs

Training & Education

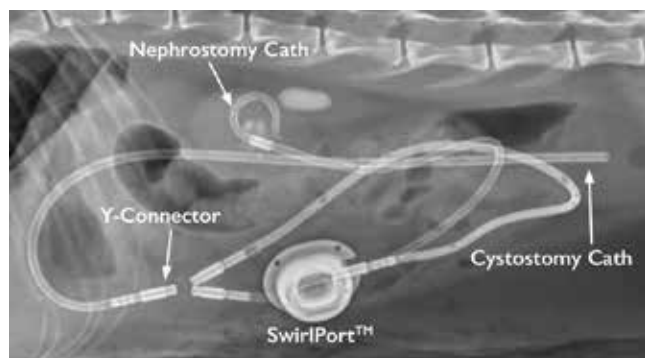

Our e-learning platform delivers a variety of technical and clinical educational material, in an engaging and interactive format.

With a CPD certificate awarded upon successful completion of each module, the e-learning platform from Vi will help you to fulfil your annual CPD requirements.

The SUB™ - A Subcutaneous Ureteral Bypass System

The Subcutaneous Ureteral Bypass (SUB™) device is a unique system designed for use in cats and dogs.

Redesigned to reduce some of the most common complications seen in prior SUB™ devices, the SUB™ 3.0 consists of one or two locking loop pigtail catheters placed in the kidney(s), one straight catheter placed in the bladder, a subcutaneous titanium SwirlPort™, and a “Y” or “X” Connector for securing the catheters.

Indications for using the SUB™ 3.0 include:

- Ureteral Obstruction associated with Ureteral Stone Disease
- Ureteral Strictures – the abnormal narrowing of the ureter
- Ureteral Stent Reaction
- Ureteral Stent Intolerance
- Malignant Obstructions

Items included in the kit:

SwirlPort Access Port and Catheter Tubing, Locking Loop Nephrostomy Catheter(s), Straight Bladder Catheter, “Y” or “X” Connector, .035” J-Tip Guidewire, 2 x Posi-grip Huber Point Needles, Over-the-Needle IV Catheter(s), Blue Boot Catheter Connectors.

NOR-SUB3-2001K	Sub Device 3.0 Kit Cats & Small Dogs
NOR-SUB3-2002K	Sub Device 3.0 Kit Long for Larger Dogs
NOR-SUB3-3001K	Sub Device 3.0 Kit Bilateral for Cats & Small Dogs

Not included in the kit - optional extras include:

I050052	Histoacryl Tissue Glue (Pack of 5)
NOR-SFK-20	20g Sub Flush Kit (Case of 5)
NOR-SFK-22	22g Sub Flush Kit (Case of 5)
NOR-TFL-1202	T-FLOLOC™ 2ml 2% Tetra EDTA Solution in 12ml Syringe Box of 10

Kit components available separately:

NOR-BC-7	Bladder Catheter 7FR
NOR-LL6.5	Kidney (Pigtail) Catheter 6.5FR
NOR-SHU-PP	3 Way Sub Port Only
NOR-GW-035	J Tipped .035” Guide Wire
DC-7	Metal Male To Male Adaptor For Sub Device
NOR-SP4	Medium Swirlport For Sub 3.0 Port Only
NOR-X-CONNECTOR	4 Way X Connector For Bilateral Sub 3.0
NOR-Y-CONNECTOR	3 Way Y Connector For Unilateral Sub 3.0

Artificial Urethral Sphincter (AUS) Port System

The Artificial Urethral Sphincter Port System (AUS™) is designed for dogs and cats for the long-term relief of sphincter mechanism incontinence that is unresponsive to medical management.

The AUS Port system has 2 components: a titanium access port and a silicone AUS occluder catheter.

The device employs a silicone cuff placed around the proximal urethra and filled with variable amounts of saline to provide mechanical obstruction to urine flow through the urethra. The degree of resistance to flow is adjusted using a subcutaneous access/injection port that is subcutaneously placed on the inner thigh. There is no exit site.

The AUS Port System – the access port, occluder and accessories – are packaged as a sterile kit complete with Huber point accessing needles.

DXAUS-KIT-6X11	AUS Port System Kit 6 x 11mm Cuff
DXAUS-KIT-10X11	AUS Port System Kit 10 x 11mm Cuff
DXAUS-KIT-6X14	AUS Port System Kit 6 x 14mm Cuff
DXAUS-KIT-8X14	AUS Port System Kit 8 x 14mm Cuff
DXAUS-KIT-10X14	AUS Port System Kit 10 x 14mm Cuff
DXAUS-KIT-12X14	AUS Port System Kit 12 x 14mm Cuff
DXAUS-KIT-14X14	AUS Port System Kit 14 x 14mm Cuff
DXVO-CATH45	AUS & HSO Backfill/Flush Catheter

AUS Port System Components

Access Port available in 3 sizes supplied sterile with Huber needles:

DXAUS-KIT-CP6	Companion Port Kit S Sterile
DXAUS-KIT-CP4	Companion Port Kit M Sterile
DXAUS-KIT-CP2	Companion Port Kit L Sterile

Most common size can be purchased as port only supplied sterile:

DXAUS-CP4	Companion Port Only M
------------------	-----------------------

Cuffs available individually; supplied sterile:

DXAUS-4X11	Artificial Urethral Sphincter 4x11mm Sterile
DXAUS-6X11	Artificial Urethral Sphincter 6x11mm Sterile
DXAUS-6X14	Artificial Urethral Sphincter 6x14mm Sterile
DXAUS-8X11	Artificial Urethral Sphincter 8x11mm Sterile
DXAUS-8X14	Artificial Urethral Sphincter 8x14mm Sterile
DXAUS-10X11	Artificial Urethral Sphincter 10x11mm Sterile
DXAUS-10X14	Artificial Urethral Sphincter 10x14mm Sterile
DXAUS-12X11	Artificial Urethral Sphincter 12x11mm Sterile
DXAUS-12X14	Artificial Urethral Sphincter 12x14mm Sterile
DXAUS-14X11	Artificial Urethral Sphincter 14x11mm Sterile
DXAUS-14X14	Artificial Urethral Sphincter 14x14mm Sterile
DXAUS-16X11	Artificial Urethral Sphincter 16x11mm Sterile
DXAUS-16X14	Artificial Urethral Sphincter 16x14mm Sterile

Hepatic Shunt Occluder (HSO) System

The Hepatic Shunt Occluder (HSO™) Port System is designed to produce gradual and complete occlusion of Congenital Portosystemic Shunts (IHPS) that is percutaneously controlled through an access port. The occlusion is easily reversed if postoperative portal hypertension occurs.

The HSO-Port System consists of an inflatable silicone cuff and a titanium access port.

The full kit contains:

- 1 x access port (Medium supplied as standard)
- 1 x HSO (size as selected)
- 2 x 22g Huber point needles
- 1 x 22g right angle infusion set

DXHS-KIT-HS-4	Hepatic Shunt Kit 4mm
DXHS-KIT-HS-6	Hepatic Shunt Kit 6mm
DXHS-KIT-HS-8	Hepatic Shunt Kit 8mm
DXHS-KIT-HS-10	Hepatic Shunt Kit 10mm
DXHS-KIT-HS-12	Hepatic Shunt Kit 12mm
DXHS-KIT-HS-14	Hepatic Shunt Kit 14mm
DXHS-KIT-HS-16	Hepatic Shunt Kit 16mm
DXVO-CATH45	AUS & HSO Backfill/Flush Catheter

Access Port available in 2 sizes supplied sterile with Huber needles:

DXAUS-KIT-CP4	Companion Port Kit M Sterile
DXAUS-KIT-CP2	Companion Port Kit L Sterile

Most common size can be purchased as port only supplied sterile:

DXAUS-CP4	Companion Port Only M
------------------	-----------------------

HSO available singly, supplied sterile:

DXHS-4	Hepatic Shunt Occluder 4mm Sterile
DXHS-6	Hepatic Shunt Occluder 6mm Sterile
DXHS-8	Hepatic Shunt Occluder 8mm Sterile
DXHS-10	Hepatic Shunt Occluder 10mm Sterile
DXHS-12	Hepatic Shunt Occluder 12mm Sterile
DXHS-14	Hepatic Shunt Occluder 14mm Sterile
DXHS-16	Hepatic Shunt Occluder 16mm Sterile

Huber Needles

These special non-coring needles are required to access the silicone septum of the CompanionPort without the damage associated with traditional needles. They are also known as deflected-point needles. When withdrawn after use, the septum re-seals itself.

NOR-NV-PG22-75	22g Huber Needle 3/4" Black Box of 12
NOR-NV-PG22-100	22g Huber Needle 1" Black Box of 12

SUB Flush Kit

This convenient kit contains the items you need to quickly and effectively flush the SUB™ System.

SUB™ Flush Kit Contents

SFK-22 – for use with All Shunting Ports

- 1x T-Port Connector
- 1x 3-Way Stop-Cock
- 1x 22-Gauge Huber Point Needle
- 2x 3ml Syringe
- 1x 2.5ml Sterile Saline in 3ml Syringe
- 1x 2ml T-FloLoc in 12ml Syringe

NOR-SFK-22	22g Sub Flush Kit (Case of 5)
-------------------	-------------------------------

SFK-20 – option for Swirl and Large Shunting Ports

- 1x T-Port Connector
- 1x 3-Way Stop-Cock
- 1x 20-Gauge Huber Point Needle
- 2x 3ml Syringe
- 1x 2.5ml Sterile Saline in 3ml Syringe
- 1x 2ml T-FloLoc in 12ml Syringe

NOR-SFK-20	20g Sub Flush Kit (Case of 5)
-------------------	-------------------------------

T-FloLoc

2% Tetra-EDTA Flush and Lock Solution

NOR-TFL-1202	T-FloLoc™ 2ml 2% Tetra EDTA Solution in 12ml Syringe Box of 10
---------------------	--

Penrose Drains

Latex rubber. Use to maintain drainage from infected wounds. Also useful to retract soft tissues such as blood vessels and nerves.

- 090168 Penrose Drain 1/4" 40cm 16" Long Sterile
- 090165 Penrose Drain 1/2" 40cm 16" Long Sterile

Kitty Kollar Tube Collar

The placement of oesophagostomy 'E' feeding tubes is a growing modality in small animal medicine. Many 'E' Tubes have been successfully in place for years on some patients. The challenge of the 'E' Tube is its care and maintenance.

The Kitty Kollar was designed as a sensible solution to the everyday patient management of the 'E' Tube. The adjustable collar fits securely around the animal's neck. It has a small hole for the 'E' Tube to pass through. A velcro strap secures or holds the 'E' Tube flat when not in use. Circular cotton pads with a center hole are provided to be placed between the collar and the skin. They protect the wound and absorb drainage eliminating the need for owners to learn bandage techniques or repeated clinic visits for rebandaging. Includes 6 protector pads and laminated instruction card.

Code	Circumference of Neck in Inches	Length of Collar + Tab in Inches	Size
KTK-XS	4" - 7"	5.5" + 2"	X-Small
KTK-PF	8" - 9"	9" + 2"	Petite
KTK-F	10" - 12"	11" + 2"	Small
KTK-M	12" - 16"	13" + 3"	Medium
KTK-L	17" - 19"	18.5" + 3"	Large
KTK-XL	20" - 24"	21" + 3.5"	X-Large

- KTK-XS Kitty Kollar Tube Collar - X-Small
- KTK-PF Kitty Kollar Tube Collar - Petite
- KTK-F Kitty Kollar Tube Collar - Small
- KTK-M Kitty Kollar Tube Collar - Medium
- KTK-L Kitty Kollar Tube Collar - Large
- KTK-XL Kitty Kollar Tube Collar - X-Large
- KTK-PADS Spare Replacement Pads - Pack of 24

Polyester Mesh

Use polyester mesh to repair soft tissue defects where alternative autografts are not available. E.g. perineal hernia, umbilical hernia. Mesh loop diameter 1mm. Sheet size 60mm x 120mm Supplied single pack sterile.

- PM60120 Polyester Mesh 60mm x 120mm Single

Anal Sac Kit

Anal sac conditions such as impaction or abscess formation are a common, often reoccurring problem in small animal medicine. The surgical excision of both anal sacs can be elected as a permanent solution to these reoccurring issues.

- ASEK5 Anal Sac Excision Kit Pack of 5

Enema Pump

The original Higginsons Enema Pump.

- G1894 Higginsons ENEMA pump

Biopsy Needles

Soft Tissue Tru-Cut Style

Used to sample liver, kidney and other soft tissues with minimal trauma. Takes just a small sliver of tissue. Supplied sterile - single use only. Needle is "locked" and when released, spring loaded cutting needle takes the biopsy. 14g has two stop system and can take either 10mm or 20mm samples.

- STB18 Vi Trucut Type Supercore Biopsy Needle 14g x 90mm
- STB18B Vi Trucut Type Supercore Biopsy Needle 18g x 90mm

Temno Evolution Biopsy Needle

The standard soft tissue biopsy needle used by the NHS. 2 different sample sizes can be selected when pulling the plunger. One click equals a 10mm notch exposure, two clicks 20mm.

- TEM1420/1 Temno Evolution Biopsy Needle 14g x 200mm Single
- TEM1420/5 Temno Evolution Biopsy Needle 14g x 200mm 5 Pack

Disposable Skin Biopsy Punch

Disposable skin biopsy punch with razor-sharp stainless steel blade. Light weight, ribbed plastic handle for control and comfort. 4mm, 6mm and 8mm diameters available. Supplied sterile.

SBP4	Skin Biopsy Punch 4mm Diameter Head
SBP6	Skin Biopsy Punch 6mm Diameter Head
SBP8	Skin Biopsy Punch 8mm Diameter Head
SBPSET	Skin Biopsy Punch Set of 3 (4mm, 6mm, 8mm)

Flushing Needles

Flushing needles have a bead or olive soldered onto the tip to minimise trauma to friable soft tissues.

Ear Flushing Needles - Spreulls

Often referred to as Spreulls needles these blunt beaded needles are available in 60mm and 100mm lengths with a Luer hub.

012510	Ear Flushing Spreulls Needle Short 60mm
012511	Ear Flushing Spreulls Needle Long 100mm

Flushing Needle 21 Gauge

Suitable for anal gland ducts of small dogs. Ideal for flushing the urethra in the male cat prior to placement of catheter. Start with the 30mm needle and move to the 50mm and 75mm versions as urethra clears.

012512	Flushing Needle 21g Bead Tip 30mm
012512L	Flushing Needle 21g Bead Tip 50mm
012512XL	Flushing Needle 21g Bead Tip 75mm

Oral Dosing Needles

Suitable for oral dosing and feeding of birds and reptiles. Available in a range of gauges from 12G to 23G. Care should be taken to ensure the needles cannot be swallowed.

012513	12g Oral Dosing Needle 200mm Curved
012514	14g Oral Dosing Needle 125mm Curved
012515	16g Oral Dosing Needle 75mm Straight
012515C	16g Oral Dosing Needle 75mm Curved
012515STR	16g Oral Dosing Needle 100mm Straight
012516	18g Oral Dosing Needle 50mm Straight
012516C	18g Oral Dosing Needle 50mm Curved
012517	20g Oral Dosing Needle 38mm Straight
012517C	20g Oral Dosing Needle 38mm Curved
012517CS	20g Oral Dosing Needle 25mm Curved
012517S	20g Oral Dosing Needle 25mm Straight
012527	22g Oral Dosing Needle 38mm Straight
012527C	22g Oral Dosing Needle 38mm Curved
012522	23g Oral Dosing Needle 25mm Straight
012532	Raptor Crop Tube 7mm Diameter 18cm Long

Intraosseous Infusion Needle 18g

Where vascular access is difficult, fluids and most drugs can be administered via this intraosseous infusion needle. This process is particularly useful in neonates and birds where blood vessels are very small.

The most common site is the proximal femur via the trochanteric fossa. An IV catheter should be placed as soon as practical. Also used as a small bone marrow aspiration needle in the Jamshidi Style.

BMBJV18	Intraosseous Infusion Needle 18g
----------------	----------------------------------

Stomach Tubes

- EQSTS** PVC Stomach Tube Small 10mm Diameter
- EQSTM** PVC Stomach Tube Medium 15mm Diameter
- EQSTL** PVC Stomach Tube Large 20mm Diameter
- EQSTF** PVC Stomach Tube Foal

VETIGEL® is a haemostatic gel that is designed to stop moderate to severe bleeding within seconds. VETIGEL® helps control bleeding in animals by achieving haemostasis in seconds without the need for manual pressure.

VETIGEL® can be used on a variety of procedures, including but not limited to: dental extractions, oral mass removals, abdominal and thoracic mass removals, soft organ biopsies, enucleations, spays and neuters, amputations, venous and arterial bleeds, cholecystectomies, catheterisation, and lacerations.

VETIGEL® Haemostatic Gel

VET-02 VETIGEL Haemostatic Gel 2 x 5ml
VET-05 VETIGEL Haemostatic Gel 5 x 5ml

Lyostypt®

Lyostypt® is a wet-stable collagen haemostat. Collagen leads to thrombocyte adhesion and to activation of coagulation factor XII. 30 x 50mm. 12 units per pack.

- Achieves haemostatis very swiftly
- Is completely absorbable
- Can be removed easily
- Can be applied endoscopically
- Can be combined with fibrin glue and antibiotics

1069128 Lyostypt® (12 Units)

BXSIL201040	Silicone Insert for Box For 200 x 100mm Instrument Box	x1

014130 Basic Ophthalmic Surgery Kit

Needle Holders

Castroviejo

Classic ophthalmic needleholder with catch. Infrequent ophthalmic surgeons should also consider Miniature Fosters or Ryders as the squeeze action of Castroviejoes requires patience and practice to master. Also available without catch.

014175 Castroviejo Needle Holders With Catch T.C. 150mm

014177 Castroviejo Needle Holders Without Catch T.C. 150mm

Castroviejo Needle Holders/Scissor

This instrument functions as a standard Castroviejo needleholder but the jaws incorporate a suture cutting function in the style of Olsen Hegars or Gillies. Jaws are tungsten carbide for maximum grip.

014181 Castroviejo Needle Holders/Scissor Str T.C. 150mm

014182 Castroviejo Needle Holders/Scissor Cof T.C. 150mm Cof

014183 Castroviejo Needle Holders/Scissor Str 'S'Cut T.C. 150mm

014184 Castroviejo Needle Holders/Scissor Cof 'S'Cut T.C. 150mm

Miniature Foster Gillies

602710 Miniature Foster Gillies T.C. 100mm 4"

Ryder Needle Holders

Ideal for small needles. The smaller sizes are an alternative for ophthalmic needleholders.

- 606340 Ryder (Micro) T.C. Jaws 12.5cm 5"
- 606345 Ryder (Micro) T.C. Jaws 15cm 6"
- 606350 Ryder (Micro) T.C. Jaws 18cm 7"

Derf Needle Holder

The Derf needle holder is a small T.C. needleholder with slightly heavier jaws than the Ryder. More resistant to surgeon abuse!

607010 Derf Needle Holder T.C. Jaws 12cm

Roberts Tying Forceps

Used in conjunction with the needle holders to tie knots in fine material.

014132 Roberts Tying Forceps 100mm

Eyelid - Speculae

Desmarres Eyelid Retractor

014215-M Medium 14mm Wide 140mm

Lister Speculum

This speculum is adjustable and has a locking mechanism. The shape is contoured for minimum interference with sutures and instruments.

014115 Lister Speculum 40mm Gape 80mm Length

Barraquer Speculum

This simple spring loaded speculum is ideal for most procedures which do not require a locking speculum. No protuberances to catch sutures.

- 014110 Barraquer Speculum Large 30mm Gape 10mm 'Blade'
- 014112 Barraquer Speculum Small 25mm Gape 5mm 'Blade'

Jaeger Eyelid Speculum

Useful during wedge resections of eyelids. The speculum stretches and retains the eyelid prior to dissection, with the blade cutting down onto the metal of the speculum which protects the eye.

- 014120 Jaeger Eyelid Speculum (Stainless) 100mm
- 014121 Jaeger Eyelid Speculum Insulated 110mm

Steven's Tenotomy Scissors

014108 Steven's Tenotomy Scissors Straight 110mm Long
014108CV Steven's Tenotomy Scissors Curved 110mm Long

Eye Enucleation Scissors

Standard curved surgical scissors do not match the radius of the eye of dogs and cats.

The eye enucleation scissor closely matches required radius and slides easily behind the eyeball to cut the optic nerve and internal ophthalmic artery and vein, without the requirement to apply dangerous traction to the globe. Use in conjunction with eye enucleation forceps.

014225 Eye Enucleation Scissors 140mm

Eye Enucleation Forceps

It is very important to clamp and crush the optic nerve and internal ophthalmic artery and vein.

The curvature on standard artery forceps is not correct and if used, the handles stand up in the way. The Enucleation Forceps are designed to slide around the rear of the globe and capture the blood vessels. The jaws are then levered against the edge of the orbit to elevate the globe for ease of tying. The handles curve out of the way.

Use with eye enucleation scissors. The large size is more suitable for large animal work.

- 014219 Eye Enucleation Forceps 135mm
- 014219L Eye Enucleation Forceps Large 155mm

Chalazion Forceps (Desmarres)

- 014216 Chalazion Forceps (Desmarres) 3.5"

Snellen's Vectis

Use to apply pressure to globe to extrude lens rather than 'fishing' for it within the eye.

- 014101 Snellen's Vectis 135mm

Dental Elevators

Elevator or Luxator?

Elevator: A stocky strong blade used to extract loose teeth using adjacent sound teeth. Not usually meant to go below the gumline. The elevator has a thicker, more robust chisel-shaped working tip. This instrument can be used as a prying lever, or with rotation, or in a 'wheel and axle' manner, to achieve displacement of the tooth root. Very high forces can be generated so fingertip manipulation only is appropriate.

They will fracture if the periodontal ligament fibres are not loosened or cut before forceps are applied or if the instrument is torqued.

Luxator: A razor sharp, thin-tipped wedging instrument used to cut the periodontal ligament and create a wedging force. The luxator is a fine instrument and is at risk of damage if used incorrectly. It is not to be used in a prying or twisting motion. It will blunt quickly and sharpening before each use is appropriate.

Comfort Handle Elevators

Designed and developed by David Strong MRCVS, this popular pattern fits into the palm of the hand allowing the fore finger to be positioned along the shaft for added control.

Supplied with fully autoclavable coloured-coded PTFE handle. Available singly or as a set. When purchased as a set the stainless steel autoclave case comes free.

- 012601 Comfort Elevator 1mm (White)
- 012602 Comfort Elevator 2mm (Green)
- 012603 Comfort Elevator 3mm (Blue)
- 012604 Comfort Elevator 4mm (Black)
- 012600 Comfort Elevators Set of 4 (Includes Free Stainless Steel Case)
- 012605 Comfort Elevator 5mm (Grey)
- 012606 Comfort Elevator 6mm (Yellow)
- 012608 Comfort Elevator Set of 6 (Includes Free Stainless Steel Case)

Comfort Handle Winged Elevators

- 012611 Comfort Winged Elevator 1mm (White)
- 012612 Comfort Winged Elevator 2mm (Green)
- 012613 Comfort Winged Elevator 3mm (Blue)
- 012614 Comfort Winged Elevator 4mm (Black)

- 012616 Comfort Winged Elevator 6mm (Yellow)
- 012618 Comfort Elevator Set of 6 (Includes Free Stainless Steel Case)
- 012617 Comfort Winged Elevator 7mm (Red)
- 012619 Comfort Winged Elevator 8mm (Purple)

Winged Elevators

Veterinary Elevators designed by Dr Robert Wiggs. They have short winged blades with lateral edges which curve upwards further than traditional elevators, improving conformation to the root structure as well as instrument control. The narrow neck enhances visibility of the root and the shorter shaft improves handling and control, especially if the operator's hands are not large.

The design incorporates the best parts of an elevator and a luxator. Aluminium knurled handles are very comfortable in use. Flattened surface prevents rolling off the table.

Available singly or as a set of 4 in stainless steel autoclave case.

- 012389 Winged Elevator 1mm (Pink) 145mm
- 012390 Winged Elevator 2mm (Gold) 145mm
- 012391 Winged Elevator 3mm (Blue) 145mm
- 012392 Winged Elevator 4mm (Black) 145mm
- 012393 Winged Elevators Set of 4 (Includes Free Stainless Steel Case)
- 012395 Autoclavable Stainless Steel Case For Winged Elevators

Winged Elevators With Short Handles

Our short handled winged elevators are predominantly designed to support users with smaller hands. The stainless steel case is silicone lined to minimise damage to the elevators, whilst being a convenient storage device during the sterilisation and transportation of the elevators.

- 012401 Short Winged Elevators Rainbow 1mm 125mm
- 012402 Short Winged Elevators Gold 2mm 125mm
- 012403 Short Winged Elevators Slate 3mm 125mm
- 012404 Short Winged Elevators Black 4mm 125mm
- 012405 Short Winged Elevators Set of 4 In Stainless Steel Case

Wedge Elevator

Designed to remove the carnassial without the need to split the tooth.

012010 Wedge Elevator 170mm

Small Feline Elevator

The 2mm angled tip on a fine handle allows access to lingual surfaces. Also useful in the extraction of rabbit incisors.

012018 Small Feline Elevator 165mm

Superfine Elevator

012004 Superfine Elevator 2mm Straight

Double Ended Elevator

The curved tips are designed to follow the concave and convex curvatures of the roots, helping to prevent breaking the roots.

012036 Double Ended Elevator 2mm 185mm

012038 Double Ended Elevator 4mm 190mm

Molt Periosteal Elevator

The molt is a double ended periosteal elevator. The tips are round and dished. 4mm and 6mm diameters.

001275 Molt Periosteal Elevator 200mm

Periosteal Elevator

Used for raising full thickness mucogingival flaps before surgical extraction of teeth, bone removal and sectioning.

001270 Periosteal Elevator 4mm/7mm 195mm

7350/05 Freer Periosteal Elevator 5mm 180mm

001271 AO Type Periosteal Elevator PTFE Handle Curved Tip 6mm 180mm

001272 Periosteal Elevator Very Fine 2mm/3mm 180mm Long

Carnivore Elevator

Thin and very sharp. Used to remove tooth root fragments.

012001 Carnivore Elevator No. 1 (2.5mm) 145mm

012002 Carnivore Elevator No. 2 (3.5mm) 150mm

012003 Carnivore Elevator No. 3 (4.0mm) 150mm

012001/4S Set of Carnivore Elevators Nos. 1, 2, 3 & Wedge Elevator

Apical Elevator

Used to remove tooth root fragments.

012006 Heidbrink Apical Elevator 145mm

Couplands Elevators

This is the standard human elevator.

012015 Couplands Chisel No. 1 (3.0mm) 150mm

012016 Couplands Chisel No. 2 (4.0mm) 150mm

 012168 Luxating Elevator Straight 5mm

Periodontal Instruments

Periodontal Hand Instrument Set

Seven periodontal instruments in a stainless autoclave case.

Instruments include: mirror, shepherd hook explorer/measuring probe, straight curette scaler, angled curette scaler, angled Jaquette scaler plus two fine probes.

- 012210 Periodontal Instrument Set In Autoclave Case

Hoe Periotome

- 012105 Hoe Periotome Double Ended

Explorer/Measuring Probe

The Shepherd's Crook Explorer is used to test tooth stability and the condition of the gum margins.

The depth of these sulci are measured using the measuring probe.

- 012100 Shepherd's Crook Explorer/ Measuring Probe 170mm

Subgingival Curette

This scaler is used to remove subgingival tartar and to plane tooth roots. The back surface of the scaler is blunt to minimise damage to the sensitive gingiva. The instrument is double-ended and has a balanced grip for extra comfort in use.

- 012130 Subgingival Curette 170mm

Jaquette Supragingival Scaler

This scaler is used to remove tartar from above the gum margin. The tip and back of the instrument is sharp to scrape between teeth. Do not use below the gum margin. Double-ended with a balanced grip handle for ease of use and comfort.

- 012120 Jaquette Supragingival Scaler 170mm

Hoe Scaler

Useful for removal of large areas of tartar and plaque from flat tooth surfaces.

012110 Hoe Scaler 165mm

Double-Ended Scrapper

The tips of this instrument are of familiar design mounted in a comfortable handle. One end is a fine hook to remove tartar from between teeth, the other is a shallow scoop to break tartar from flatter surfaces.

012020 Double-Ended Scrapper 175mm

Gracey Double Ended Curette

012135 Gracey Double Ended Curette 7/8
 012136 Gracey Double Ended Curette 13/14
 012137 Gracey Root Plane Curette Double Ended 1/2
 012138 Gracey Root Plane Curette Double Ended 13/14

Dental Forceps

Tartar Forceps

Our spring loaded tartar forceps are designed to sit comfortably in the hand to enable the veterinary dentist to remove bulky deposits from teeth.

012050 Tartar Forceps Spring Loaded 180mm
 012051 Tartar Forceps Spring Loaded Cat Size 150mm
 01205SET1 Tartar Forceps Set of 2 (As above)

Tartar Forceps Cupix Point

These tartar forceps are designed specifically for the removal of bulky tartar prior to scaling and polishing.

One jaw is cup shaped to locate onto the tooth tip and act as a fulcrum for the other jaw. The other jaw is a sharp hook to engage the tartar at the gum margin.

The jaws are designed to remove tartar from both flat surfaces and between teeth.

012052 Tartar Forceps Cupix Point Style 180mm
 012053 Tartar Forceps Cupix Point Style 150mm
 01205SET2 Tartar Forceps Set of 2 (As above)

Hawksbill Forceps

The multi-rooted teeth of the dog and cat should be loose before extraction by forceps.

The loosening may be due to dental disease or careful elevation. As well as firmly gripping the tooth to be extracted, appropriate dental forceps should support the tooth structure.

The Hawksbill forceps are designed specifically for the extraction of multi-rooted teeth in the dog and cat.

012030 Large Hawksbill Forceps 170mm
 012040 Small Hawksbill Forceps 140mm
 01204SET Hawksbill Forceps Set of 2 (As above)

Small Incisor Forceps

The tips of these forceps are ideal for the removal of single rooted, usually incisor teeth. Cross-hatched thumb area for extra control. Tips meet.

012070 Small Incisor Forceps 150mm

Narrow Tipped Extraction Tooth Forceps

A narrow tipped extraction forcep which meets at the tip to facilitate holding the tooth. Forceps are only used once the tooth has been loosened correctly, trying to forcibly extract without loosening will usually result in root breakage. Very useful for cats.

012072 Narrow Tipped Extraction Tooth Forceps

Vi Extraction Forceps

Vi extraction forceps are well suited to extraction of medium to large teeth. The jaws have fine serrations for increased grip. As with all extractions it is important that the tooth involved is suitably elevated prior to the use of forceps. The teeth of our patients are much more tightly bound to the jaw than are human teeth.

- 012091 Vi Extraction Forceps Straight
- 012092 Vi Extraction Forceps Curved
- 012093 Vi Extraction Forceps Angled
- 012090 Vi Extraction Forceps Set of 3 (As above)

Root Fragment Set

Removal of fragmented roots can be a challenge particularly if the roots themselves are healthy. A combination of elevation and forcep work is usually required. The set of 3 forceps with differing jaw angles covers all situations. The handles are anatomical and ergonomic.

- 012075 Root Fragment Forceps Set of 3

Lip Retractor

The lip retractor solves the problem of retracting the lip for clear access to the teeth. It has a modified shape to prevent pinching the lip and the tips of the instrument are plastic-coated to minimise trauma. It can be adjusted by lightly bending. Autoclavable.

- 010147 Lip Retractor 160mm

Dental Mirrors

- 012028 Mirror Handle Cone Socket Single Ended
- 012029 Dental Mirror No.3 With Cone Socket
- 012031 Dental Mirror Complete

Mouth Gags & Wedges

Grays Mouth Gag

Simple action with spring to gently hold the jaws open.

- 012158 Hamilton Kirk Cat Gag Maximum Gape 40mm
- 012160 Grays Mouth Gag Small Maximum Gape 65mm
- 012170 Grays Mouth Gag Medium Maximum Gape 100mm
- 012180 Grays Mouth Gag Large Maximum Gape 140mm
- 012159 Grays Mouth Gag Set of 3

Smith Baxter Mouth Gag

Spring action maximises access but is less likely to overstretch the TMJ.

- 012795ES Smith Baxter Mouth Gag Extra Small Max Gape 5.5cm
- 012795S Smith Baxter Mouth Gag Small Max Gape 6.5cm
- 012795M Smith Baxter Mouth Gag Medium Max Gape 10cm
- 012795L Smith Baxter Mouth Gag Large Max Gape 14cm
- 012795EL Smith Baxter Mouth Gag Extra Large Max Gape 15.5cm
- 012795 Smith Baxter Mouth Gags Set of 5 (As above)

Mouth Wedge

The mouth wedge provides a simple effective means of holding the mouth open for routine dental procedures.

- 012790 Mouth Wedge Small
- 012791 Mouth Wedge Large
- 012795SET Mouth Wedge Set of 2 (As above)

Table Top Rabbit Gag

This version of our well known gag has a white PTFE platform which makes the gag warmer for the anaesthetised small patient. It is easy to clean and may be autoclaved.

- 012207 Table Top Rabbit Gag
- 012209 Table Top Rabbit Gag & LED Light
- DENRODKIT Table Top Rabbit Gag LED Light & Full Hand Kit (Rod2)

LED Light For Table Top Gag

Illumination of the inside of the rabbit mouth is difficult without the hands of the surgeon getting in the way.

The rabbit gag LED light simply clips into the retaining mount which screws onto the threaded height-adjustment control. The flexible neck of the light can be adjusted for best effect. The powerful white LED lasts for approximately 100 hours on a set of AAA batteries.

012208 LED Light With Flexible Neck (Inc Clip)

Rabbit Dental Kits

Basic Kit (ROD1) contains:

012185	Rodent Mouth Gag	x1
012189A	Cheek Dilator Large Long Reach	x1
012197CR	Crossley Incisor Luxator	x1
012186	Rodent Molar Cutter	x1
012181	Rodent Rasp Small	x1
BX201040	Stainless Steel Box 200x100x40mm	x1

Full Hand Kit (ROD2) contains:

012185	Rodent Mouth Gag	x1
012188	Rodent Cheek Dilator Small	x1
012189	Rodent Cheek Dilator Large	x1
012189A	Cheek Dilator Large Long Reach	x1
012197CR	Crossley Incisor Luxator	x1
012197M	Crossley Molar Luxator	x1
012199	Molar Extraction Forceps	x1
012186	Rodent Molar Cutter	x1
012184	Rodent Spatula	x1
012181A-A	Molar Rasp Fine - Dlamond - Small	x1
BX201040	Stainless Steel Box 200x100x40mm	x1

Hand & Motor Kit (ROD3) contains:

001789	Diamond Disc (20mm)	x1
001791	Diamond Disc Safety Shield	x1
001792	Rabbit Bur Kit in Block (6 Burs)	x1
001793	Rabbit Bur Soft Tissue Protector	x1
012185	Rodent Mouth Gag	x1
012188	Rodent Cheek Dilator Small	x1
012189	Rodent Cheek Dilator Large	x1
012189A	Cheek Dilator Large Long Reach	x1

012186	Rodent Molar Cutter	x1
012184	Rodent Spatula	x1
012181A-A	Molar Rasp Fine - Diamond - Small	x1
BX201040	Stainless Steel Box 200x100x40mm	x1

This kit also requires a straight nose cone and air or electric drive power unit.

- ROD1 Basic Kit
- ROD2 Full Hand Kit
- ROD3 Hand & Motor Kit

Rodent Mouth Gag

The rodent mouth gag is a must for any practice looking to complete the examination and treatment of rabbit molars.

012185 Rodent Mouth Gag

Lightweight Rodent Mouth Gag

012185LW Rodent Mouth Gag Lightweight
012185LWS Rodent Mouth Gag Lightweight Small

Rodent Cheek Dilators

The small dilator is also useful as a small gag for guinea pigs and chinchillas.

012188 Rodent Cheek Dilator Small Max Gape 40mm Blade Length 15mm, Blade Width 10mm
012189 Rodent Cheek Dilator Large Max Gape 60mm Blade Length 22mm, Blade Width 15mm
012189A Rodent Cheek Dilator Long Reach - Blade Length 36mm, Blade Width 11mm Use With Long Burs Max Gape 35mm

Rodent Spatula

Use to deflect tongue and cheek to examine and treat molars.

012184 Rodent Spatula

Rodent Molar Rasp

The diamond coated rasps are designed to smooth off sharp edges without disturbing the delicate tooth roots. The small diamond rasp is contoured in two directions to enable it to sit nicely on top of the molars. Unsuitable for debulking but good for tidying.

012187 Rodent Tooth Rasp Large 165mm
012181 Rodent Tooth Rasp Small 180mm
012182 Rodent Molar Rasp Fine - Diamond Large 165mm
012181A-A Molar Rasp Fine - Diamond - Small
01218SET Rodent Molar Rasp Set of 4 (As above)

Double Ended Diamond Rasp

One end is concave to sit on and around the molars. The other end is flat. Each blade is 25mm long.

012173 Double Ended Diamond Rasp 205mm

Rodent Molar Cutter

Use to debulk or for trimming spurs and hooks.

012186 Rodent Molar Cutter 180mm
012186/S Rodent Molar Cutter Small 140mm
01218CUTSET Rodent Molar Cutter Set of 2 (As above)

Crossley Incisor Luxator

Designed by David Crossley to extract the very large rabbit incisors. Removal avoids the requirement for repeated cutting of overgrown maloccluded incisors. Shape of luxator matches tooth shape. A smaller version is available for guinea pigs and rats.

012197CR Crossley Incisor Luxator 195mm
012197R Small Crossley For Guinea Pigs & Rats 190mm
012197SET Crossley Incisor Luxator Set of 2 (As above)

Crossley Molar Luxator

Designed to facilitate extraction of molars with a minimum of damage to the alveolus and surrounding soft tissue. One cutting blade is for insertion down buccal or lingual surface. The other end of the instrument is set at right angles to penetrate between molars.

012197M Crossley Molar Luxator 160mm

Molar Extraction Forceps

There is very little space inside a rabbit mouth. These forceps are very slim and angled to fit in the mouth without totally obscuring the teeth.

012199 Rabbit/Guinea Pig Molar Forceps 160mm

Root Tip Extraction Forceps

Most chronic abscesses around the head of a rabbit are related to infected tooth roots. Removal of the offending root is a prerequisite for successful treatment. Designed by Frances Harcourt-Brown these modified needleholders are used to locate and lock onto the root tip via the abscess.

012206 Root Tip Extraction Forceps 160mm

Rabbit Bur Kit

Components of the kit are available separately.

Three burs have been selected by David Crossley as being suitable for the reduction of rabbit and chinchilla molar teeth. Our rabbit bur kit includes two of each bur in a stainless steel autoclavable block. All are HP fitting to fit into a 1:1 Straight Nose Cone (not included). When using the long bur (HL563) use the soft tissue protector to shield tongue and cheek.

The Rabbit Bur Kit in Block contains:

001792BLOCK.ONLY	Rabbit Burr Kit Block Only	x1
HL563	Very Long Cross Cut Flat Fiss (60mm)	x2
HP704	Taper Side Cut Bar 2.3mm	x2
HP8	Round Plain Cut 2.3mm Diameter	x2

001792 Rabbit Bur Kit In Block (6 Burs)
001793 Soft Tissue Protector For Above Fits Straight Nose Cone

Cylindrical Sharpening Stone

To work effectively, both scalers and elevators need to be sharp. Regular sharpening will keep your instruments working correctly.

012146 Luxator Cylindrical Sharpening Stone

Diamond Card - Fine

Diamond covered plate is ideal for sharpening dental elevators and luxators. To work efficiently these instruments must be sharp. An additional advantage is that the lubricant used is water rather than the oil used with sharpening stones.

012144 Flat Diamond Sharpening Card (Fine)

Diamond Cone

Subgingival curettes must be kept sharp to work efficiently. They should be checked and sharpened at least weekly. The diamond cone is indestructible compared with stones which break very easily and uses water rather than oil as a lubricant.

012148 Diamond Cone 205mm

Diamond Disc

001789 Diamond Disc 20mm
001791 Diamond Disc Safety Shield

Premium Boxes

Premium Boxes With No Filters

Vi's range of premium instrument boxes are made from lightweight anodised aluminium. Both lid and base are perforated, but protected by replaceable filters which allow steam penetration but not micro-organisms. The clip on lid incorporates a silicone seal which is impervious to micro-organisms.

- BX301440P** Premium Instrument Box 300x140x40mm
- BX301470P** Premium Instrument Box 300x140x70mm
- BX301410P** Premium Instrument Box 300x140x100mm

Premium Boxes With Reusable Filters

Premium Box supplied with reusable filter JK091.

- BX301440P-F** Premium Instrument Box 300x140x40mm With Filters
- BX301470P-F** Premium Instrument Box 300x140x70mm With Filters
- BX301410P-F** Premium Instrument Box 300x140x100mm With Filters

Instrument Baskets for Premium Boxes

- PBBX26512045** Instrument Basket Without Lid For BX301470P 265x120x45mm
- PBBX26011570** Instrument Basket Without Lid For BX301410P 256x120x70mm
- PBBXINNERI** Perforated Tray with Lid For BX301410P 270x123x65mm

Premium Box with Insert for Locking Kits

- LS20BOX** Premium Box With Insert For 2mm Locking Kit
- LS24BOX** Premium Box With Insert For 2.4mm Locking Kit
- LS27BOX** Premium Box With Insert For 2.7mm Locking Kit
- LS35BOX** Premium Box With Insert For 3.5mm Locking Kit

Premium Box with Insert for Cortical Kits

- BXP01** Premium Box With Insert For 1mm Cortical Kit
- BXP152024** Premium Box With Insert For 1.5/2.0/2.4mm Cortical Kit
- BXP2735** Premium Box With Insert For 2.7/3.5mm Cortical Kit

Premium Box with Insert for TTA Kit

- TTABOX** Premium Box With Insert For TTA Kit

Filters and Labels for Premium Boxes

- BXPFILTER** Paper Filter Indicators For BX3014 Series Pack of 100
- JK091** Sterile Container Reusable Filter Pack of 2
- BXPFIND** Paper Labels With Indicators Pack of 100

Disposable Padlocks with Indicator

Anti-tamper security padlock with steam sterilisation indicator spot. Single use only. Padlock has to be broken to be removed.

- PSL20** Disposable Padlock With Sterilisation Pack of 20
- PSL100** Disposable Padlock With Sterilisation Pack of 100

Disposable Padlocks - Instrument Repair

Useful for marking instruments which should be sent for repair. Single use only. Padlock has to be broken to be removed.

- PSTR10** Disposable Padlocks - Instrument Repair Pack of 10

Stainless Steel Instrument Boxes with Filters

Stainless Steel in construction with a bacterial filter in the base. The Filter allows steam to enter and water vapour to leave but excludes bacteria. Available in a range of sizes to suit most instrument sets and autoclaves.

- BX201040** Instrument Box 200x100x40mm
- BX221250** Instrument Box 220x120x50mm
- BX281450** Instrument Box 280x140x50mm
- BX341650** Instrument Box 340x165x50mm
- BX341670** Instrument Box 340x165x70mm

Filters for Stainless Steel Instrument Boxes

- FILBX201040** Filter For Box BX201040
- FILBX221250** Filter For Box BX221250
- FILBX221550** Filter For Box BX221550
- FILBX281450** Filter For Box BX281450
- FILBX341650** Filter For Box BX341650

Stainless Steel Instrument Boxes without Filters

Stainless steel solid box no filter

- BX201040NF** Instrument Box No Filter 200x100x40mm
- BX221250NF** Instrument Box No Filter 220x120x50mm
- BX281410NF** Instrument Box No Filter 280x140x100mm

- BX221550** Instrument Box No Filter 220x150x50mm

Silicone Inserts

Autoclavable silicone insert fits the base of the stainless box to prevent instruments contacting and damaging each other. There is an insert to fit each of our standard boxes. Colour may vary.

- BXSIL201040** Silicone Insert For Box 200x100mm
- BXSIL2540** Silicone Insert For Box 250x150mm
- BXSIL2212** Silicone Insert For Box 220x120mm
- BXSIL2215** Silicone Insert For Box 220x150mm
- PBXS270125** Silicone Insert For Box 270x125mm
- BXSIL2814** Silicone Insert For Box 280x140mm
- BXSIL3416** Silicone Insert For Box 340x160mm

Stainless Steel Box with Insert for Cortical Kits

- BX1520CS** Box Fitted For 1.5 & 2.0mm Cortical Screws & Equipment
- BX20CS** Box Fitted For 2.0mm Cortical Screws & Equipment
- BX24CS** Box Fitted For 2.4mm Cortical Screws & Equipment
- BX2735CS** Box Fitted For 2.7 & 3.5mm Cortical Screws & Equipment

Stainless Steel Box with Insert for External Fixation

001578 ESF Box With Partitions

- SHTTA242735** Screw Box For TTA Screws 2.4/2.7/3.5mm

Autoclavable Needle Boxes

- 091149** Polypropylene Needle Box 50x40x8mm
- 091149L** Polypropylene Needle Box 95x70x17mm

Power Tool Storage

Black Series Aluminium Sterilisation Cases

Designed specifically for the Vi Black Series Drill and Saw and suitable for use in larger autoclaves. Cases outer dimensions are 300x205x70mm.

- BLACKDRILL-SC** Sterilisation Case For Black Series Drill
- BLACKSAW-SC** Sterilisation Case For Black Series Saw

Vi TPLO Saw Sterilisation Case

VITPLOSAW-SC Vi TPLO Sterilisation Case

For Pin and Wire Storage See Page 125

Instrument Cleaning Brushes & Pipe Cleaners

Stainless Steel Instruments are protected from corrosion by a very thin layer of chromium oxide. This layer can be damaged by the use of brushes not designed for the purpose of cleaning surgical instruments, resulting in abrasions, surface marking and staining.

Instrument cleaning brushes are available with nylon and stainless bristles.

- CB1** Cleaning Brush Nylon For Gross Contamination
- CB2** Cleaning Brush Stainless For Large Burs & Reamers
- CB3** Cleaning Brush Nylon For General Instrumentation
- CB4** Cleaning Brush Stainless Steel For Orthopaedic Instruments
- CBPIPE** Pipe Cleaners 1/8" 12" Long Pack of 100

Cylindrical Sharpening Stone

To work effectively, both scalers and elevators need to be sharp. Regular sharpening will keep your instruments working correctly.

- 012146** Luxator Cylindrical Sharpening Stone

Diamond Card - Fine

Diamond covered plate is ideal for sharpening dental elevators and luxators. To work efficiently these instruments must be sharp. An additional advantage is that the lubricant used is water rather than the oil used with sharpening stones.

- 012144** Flat Diamond Sharpening Card (Fine)

Diamond Cone

Subgingival curettes must be kept sharp to work efficiently. They should be checked and sharpened at least weekly. The diamond cone is indestructible compared with stones which break very easily and uses water rather than oil as a lubricant.

- 012148** Diamond Cone 205mm

Instrument Marking Tape

Instrument marking tape is designed to help identify and organise instruments as they move between theatre and re-processing. Available as a pack of 8 or in individual rolls 3000mm long.

- I00001** Instrument Marking Tape Box of 8 colours
- I00001Y** Instrument Marking Tape Single Yellow
- I00001R** Instrument Marking Tape Single Red
- I00001BR** Instrument Marking Tape Single Brown
- I00001OR** Instrument Marking Tape Single Orange
- I00001BLU** Instrument Marking Tape Single Blue
- I00001G** Instrument Marking Tape Single Green
- I00001W** Instrument Marking Tape Single White
- I00001GRY** Instrument Marking Tape Single Grey
- I00001P** Instrument Marking Tape Single Purple

Protective Autoclavable Tips

Autoclavable protective tips for pins and delicate or sharp instruments

- I00011-W** Protective Tip White Up To 1.6-2mm Diameter Pack 20
- I00011-BL** Protective Tip Blue 2.5-3mm Diameter Pack 20
- I00011-G** Protective Tip Green Up To 3.2-4mm Diameter Pack 20
- I00011-R** Protective Tip Red Up To 4.8mm Diameter Pack 20
- I00011-Y** Protective Tip Yellow Up To 6.0-6.5mm Diameter Pack 20
- I00011-O** Protective Tip Flat Orange Up To 10mm Wide Pack 20
- I00011-BR** Protective Tip Flat Brown Up To 16mm Diameter Pack 20
- I00011-BLK** Protective Tip Flat Black Up To 25mm Diameter Pack 20
- I00020** Protective Tips Silicone Multi Pack One Pack of Each Colour 160 (8x20)

Instrument Oil

- I00003** Instrument Oil Autoclavable

Skin Stapler

- STAP35W** Skin Stapler 35W Sterile Single
- STAP35W5** Skin Stapler 35W Sterile Pack of 5

Staple Remover

- STAPREM** Skin Staple Remover Single

Reusable Cotton Drapes

- BDS3624** Plain Drape Balloon Cloth 910x600mm
- BDS3624DBL** Plain Drape Balloon Cloth Double 910x600mm
- BDS3636** Plain Drape Balloon Cloth 910x910mm

Disposable Drapes

Each pack is supplied sterile and contains high quality disposable drape, hand towel, swabs, wrap and tape. Full details available upon request

- DPGENSURG** Sterile General Drape Pack
- DPORTHO** Sterile Orthopaedic Drape Pack
- DRAPE180** TRI Laminate Drape with Adhesive Edge 180x180
- DPSPAYSM** Sterile Spay Drape Pack Small
- DPSPAYMED** Sterile Spay Drape Pack Medium
- DPSPAYLEG** Sterile Spay Drape Pack Large

Disposable Iodine Drapes

- ID6650** Ioban Drape 560x450mm - Single
- 44040** Drape, Incise, 40x40cm Iodine ADH 34x40cm - Single
- 44040/10** Drape, Incise, 40x40cm Iodine ADH 34x40cm Pack of 10
- 42020** Drape, Incise, 20x20cm Iodine ADH 15x20cm -Pack of 20

Disposable Gowns

Supplied as a single sterile high quality disposable gown with hand towel

- GPSSMALL** Sterile Surgical Gown Size S
- GPXLARGE** Sterile Surgical Gown Size XL
- GPXXLARGE** Sterile Surgical Gown Size XXL

Electrosurgery GIMA Bipolar Electrosurgery Unit 120 Watt

HF 122 is a high frequency electrosurgery unit suitable for micro coagulation, small and medium Monopolar surgery and bipolar coagulation.

The following Monopolar modes of operation are available via the control panel: pure cutting (Cut), coagulated cutting (Coag), Monopolar coagulation and micro coagulation (Blend). Additionally with bipolar forceps, bipolar coagulation and micro coagulation are available.

Kit Includes:

- Two button Monopolar handle (autoclavable)
- Two button Monopolar handle (disposable)
- Bipolar cable and forceps
- Foot control
- Flat neutral plate
- 6 short Monopolar electrodes, as pictured below.

- HF122** 120 Watt Monopolar/ Bipolar Electrosurgery Unit
- HF30547** Spare Monopolar Handle Screw Grip For HF122
- HF123** 1mm Bipolar Dissecting Forceps 180mm Str F/HF122
- HF124** Spare Bipolar Cable For HF122 (A Type)
- HF30568** Spare Foot Pedal For HF122

GIMA Bipolar Electrosurgery Unit 160 Watt

This unit is a higher-powered version of our popular HF 122 Unit.

The additional power availability comes into its own when working with mixed tissue densities such as in orthopaedics, and in more moist situations such as mucous membranes.

Modes of operation are pure cut, coagulated cut, forced coagulation, soft coagulation, and with bipolar forceps, bipolar coagulation.

HF160 has the same set of alarms as the 120, including open circuit which warns of a disconnected cable or poor patient plate contact and interrupts the HF emission for cut and coagulation.

All the standard accessories shown for the HF120 fit this unit. We can also supply an adaptor which allows standard 2 x 4mm banana plug (Valley Lab type) bipolar cables to be used with HF 160.

- HF160** 160 Watt Monopolar/Bipolar Electrosurgery Unit
- HF30642** Bipolar Cable Adaptor For Gima Unit HF160 to 2x4mm Banana Plugs

Bipolar Dissecting Forceps

- HF190-100** Bipolar Forceps Adson 1mm Tip 121mm Long
- HF120-100** Bipolar Forceps Straight 0.5mm Tip 150mm Long
- HF122-100** Bipolar Forceps Straight/Angled 0.5mm Tip 150mm Long
- HF132-100** Bipolar Forceps Straight/Angled 1mm Tip 180mm Long

Bipolar Cable Generator Terminations

A

GIMA HF122

D

4mm Banana Plugs
Valley Lab
Eschman
Arthrex OPES

These are the most common types of termination for the generator or machine end of the cable.

Our bipolar cables and forceps all have an EU fitting square end.

- HF124** Spare Bipolar Cable A Type EU Fitting Forceps Connector
- HF30** Spare Bipolar Cable D Type EU Fitting Forceps Connector
- HF30642** Bipolar Cable Adaptor

GIMA Smoke Evacuation Unit

The surgical smoke consists of water vapour, organic gas, visible or invisible solid particles and viral particles. The aspiration and filtration system eliminates bad smells, reduces the bacteriological and viral risks, whilst improving vision in the surgical field.

The Smoke Evacuation Starter Kit contains:

- HF30450** Electrosurgery Smoke Evacuation Unit x1
- HF30451** Smoke Evacuation ULPA Red Filter 20 hours x1
- HF30453** Aspiration Kit Pack of 6 x1
- HF30454** Handle Aspiration Kit Sterile Pack of 12 x1
- HF30578** GIMA Waterproof Foot Pedal 3m Cable x1

Kit components are available separately.

HF30540START Smoke Evacuation Starter Kit

Monopolar Spares and Accessories

- HF1** Electrode
- HF2** Electrode
- HF3** Electrode
- HF4** Electrode
- HF5** Electrode
- HF6** Electrode
- HF7** Electrode
- HF9** Electrode
- HF10** Electrode
- HF1-10** Electrodes Mixed Set of 10
- HF12** 7cm Blade - Autoclavable

HF30537 Scratch Pad (Supplied Sterile) Pack of 10

- HF30547** Spare Monopolar Handle Screw/Grip For HF122
- HF30563** Spare Cable For Gima Plate
- HF126** Spare Metal Plate For HF122 and HF106
- HF107** Autoclavable Monopolar Handle for HF106

Portable Cordless Cautery Kit

This handy set comprises a handpiece using two AA batteries (included) and four interchangeable and replaceable Cautery Tips

- 1/2"(12mm) Fine general purpose electrode for haemostasis
- 1/2"(12mm) Loop electrode for small skin tumours
- 4"(130mm) Fine electrode for deep areas
- 4"(130mm) Loop electrode

Tip temperature 2200°F/1200°C

- 02313** Portable Cordless Cautery Kit
- 02313W** Replacement Cautery Tip 1/2" Fine
- 02313X** Replacement Cautery Tip 1/2" Loop
- 02313Y** Replacement Cautery Tip 4" Fine
- 02313Z** Replacement Cautery Tip 4" Loop

Askir Suction Machine

A simple suction unit with a 1 litre capacity bottle, which is adequate for virtually all small animal procedures. The in-line filtration system minimises biohazards.

- 185000** ASKIR 30 Suction Device
- 185002** Tube Set and Filter for Suction Machine
- 185003** Filter Only
- 185004** Spare Suction Bottle and Lid
- 185005** Spare Lid for Suction Bottle

Suction Tubing

- 185009** Autoclavable Suction Tubing Per Metre

Suction Tubing Connector

- 185006** Suction Tubing Connector

Hospivac Spares

- 185H210351** Spare 2L Bottle With Lid For Hospivac 350
- 185H210353** Spare 2L Bottle Without Lid For Hospivac 350
- 185HSP0032** Spare Tubes and Filter For Hospivac 350
- 185HSP0121** Spare Filter For Hospivac 350
- 185HSP033** Spare Tubes For Hospivac 350

Suction Tips

We stock the four most useful styles of tip. Each comes complete with a 2 metre length of autoclavable silicone tubing to connect to the suction unit.

Yankauer

General purpose suction tip for removal of large volumes e.g. from abdomen.

- 1854327** Yankauer Suction Tip

Poole

As Yankauer but more holes for greater volume uptake. With perforated outer sheath removed the Poole functions as a small bore straight suction tip.

- 1854330** Poole Suction Tip

Adson 4mm

Focal suction tip removes fluid from specific locations e.g. in spinal procedures. Very controllable at the handpiece by single finger over air bypass hole.

- 1852121** Adson Suction Tip 4.0mm

Frazier 2.6mm

As the Adson but finer still.

- 1854328** Frazier Suction Tip 2.6mm

Patient Warming & Monitoring

AAS Darvall Warm Air System

The benefits of preventing hypothermia both during and after surgery are well documented, both in terms of improved patient care and more efficient use of resources.

Use of warm air blankets to pre-warm patients, heated anaesthetic circuits for all procedures plus blankets under anaesthetised animals during longer procedures, over 60 minutes, followed by post-op cage blanket use will help optimise patient recovery from anaesthesia.

AAS Darvall Cozy Warm Air Heater

The Darvall Cozy™ Warm Air Heater is easy and straightforward to use. Running quietly, it is suitable for use both in theatres and recovery areas. The Darvall Cozy™ Warm Air Heater comes with a 24 month warranty.

The Darvall Cozy™ Starter Kit contains:

- Darvall Cozy™ Warm Air Heater Unit
- Wheel Kit - 4 Push Fit Wheels
- Sample Pack of 8 Blankets
- Kennel Door Adaptor Cwik

AAS9084 AAS Darvall Cozy™ Warm Air Heater System

AAS Darvall Kennel Door Adapter

The KDA Kennel Door Adapter Cwik:

- Connects Darvall Cozy Warm Air Heater to Darvall's Kennel Blankets
- Fits to most warm air heaters using Cozy KDA Heater Hose Adapter
- Cozy Cwik™ locking system - no nuts or screws
- Twist-Connect system for easy installation
- Allows fast access to patients in kennels
- Rapidly moved between kennel doors
- Fits to most kennel door systems
- Safe warming for patients

The KDA Kennel Door Adapter Cwik Kit contains:

- 1x Cozy Cwik KDA Adapter
- 2x Cozy Cwik KDA Gaskets (1 spare)
- 1x Cozy KDA Extension Hose 25cm
- 1x Cozy KDA Universal Heater Hose Adapter
- 1x Cozy Blanket x 8 Sample Pack

AAS9842 Darvall KDA Kennel Door Adapter Kit - Cwik

AAS Darvall Warm Air Blankets - New Range

Innovative Warm Air Blankets for surgery, dentistry, exotics and kennels. Use for pre-warming, during anaesthesia and in recovery.

What makes them different from the rest?

The Darvall series of warm air blankets are specifically designed for veterinary use. The unique blanket surface design is porous polyester which provides low uniformly-distributed air flow, providing efficient warming, reducing the 'wind chill' factor and minimising hair contamination. Traditional warm air blankets have a punched out surface allowing a higher rate of air flow out of the blanket, much less suitable for veterinary patients.

The blankets are colour coded, the white side always is in contact with the patient.

AAS Darvall Warm Air System Blankets

- AAS02979** Darvall Warm Air Surgery Under Blanket for Cats and Small Dogs - Pack of 10
- AAS02275** Darvall Warm Air Surgery Under Blanket For Medium and Large Dogs - Pack of 10
- AAS05310** Darvall Warm Air Dentistry Under Blanket/Surgery Over Blanket For Medium and Large Dogs - Pack of 10
- AAS02827** Darvall Warm Air Surgery/Cage Blanket For Exotics and Small Animals - Pack of 10
- AAS05360** Darvall Warm Air Single Kennel Blanket For Cats and Small Dogs - Pack of 10
- AAS05359** Darvall Warm Air Double Kennel Blanket For Medium and Large Dogs - Pack of 10
- AAS8460** Darvall Warm Air Sample Assorted Blankets - Pack of 10 (2 x 2979, 2 x 2275, 2 x 5360, 2 x 5359, 1 x 5310, 1 x 2827)

- AAS9742** AAS Darvall Warm Air Heater Hose Clamp

The Darvall Cozy™ Warm Air Heater Hose comes with a 12 month warranty.

Darvall Heated Anaesthetic Starter Kit and Accessories

- AAS9855** Heated Circuits Starter Kit Complete With Lack Adapter
- AAS8347** Heated Smooth Wall Breathing Circuit 12mm Cats and Small Dogs 2-20kg
- AAS8348** Heated Smooth-Wall Breathing Circuit 16mm For Dogs 30-80kg
- AAS8617** Heat Controller Temperature Probe Outside Diameter 2.5mm for Exotics and Birds
- AAS8618** Heat Controller Temperature Probe Outside Diameter 3.6mm For Cats, Dogs and Rabbits
- AAS8615** Heated Circuit Connection Cable (Spare Part)
- AAS10104** Protective Cover for Breathing Circuits and ETCO₂ Sensor

Darvall Express Monitor

Rugged monitor designed to automatically commence operation by simply pushing the power button and connecting two sensors. Comes complete with Nellcor SpO₂, Suntech NIBP hose temperature probe and DOC-10 extension cable.

Features:

- Nellcor™ pulse oximetry
- Darvall minimal dead space capnography
- Darvall body temperature probe
- Suntech veterinary non-invasive blood pressure (NIBP)
- Single one touch quick set button
- Default system set-up for cats and small dogs
- Darvall's innovative conforming NIBP cuffs covering seven sizes, for all small animals
- Easy to see colour-coded display
- Red – Heart rate and O₂. Blue – blood pressure. Green – body temperature
- Long battery life

- AAS9624** Darvall Express Monitor
- AAS9969** Pole Mount Bracket for Darvall Express

Replacement parts for Darvall Express:

- AAS9857** NIBP Hose 2.5m Long for Darvall Express
- AAS9204** Oesophageal/Rectal Temp Probe for Darvall Express
- AAS8811** Nellcor Extension Cable DOC-10 for Darvall Express
- AAS10016** 1 GB Storage Card for IRIS use for Darvall Express
- AAS10104** Protective Cover for Breathing Circuits and ETCO₂ Sensor

Darvall Capnograph

The Darvall Capnograph continuously measures the EtCO₂ and respiratory rate, and features EtCO₂ waveform Cardiac Oscillation artifact detection for correct respiratory rate determination. It is a reliable and accurate way of monitoring depth of anaesthesia. Only suitable for Darvall Express.

Features:

- Rugged, low-cost sensor
- Fast, sensitive sensor, for better performance in small animals
- Mainstream capnography avoids waste gasses
- Ideal for low-flow low-emission environmentally friendly anaesthesia
- Waveform Cardiac Oscillation artifact detection for correct respiratory rate determination

- AAS9627** Mainstream ETCO₂ Sensor for Darvall Express
- AAS2120** Paediatric Mainstream Airway Adapter - (Purple)
- AAS2121** Adult Mainstream Airway Adapter - (Clear)

Sidestream is also available and only suitable for Darvall Express

- AAS9965** Sidestream ETCO₂ Sensor for Darvall Express
- AAS10112** Sampling Line for Sidestream CO₂

Darvall Veterinary Blood Pressure Cuffs

NIBP small animal cuffs are designed for accurate pressure detection in exotics, cats and all sizes of dog. The wide Velcro tabs provide secure conformation to the limb, with resilient but tactile silicon for reliable accurate signal transduction and validated pressure detection, including in conscious animals. Seven sizes for all small animals.

- AAS9890** Darvall NIBP Cuff Size 0. Limb Circumference 3.5cm - 6.5cm
- AAS9891** Darvall NIBP Cuff Size 1. Limb Circumference 5cm - 7.5cm
- AAS9892** Darvall NIBP Cuff Size 2. Limb Circumference 6cm - 8.5cm
- AAS9898** Darvall NIBP Cuff Size C. Limb Circumference 7cm - 10cm (Cat Size)
- AAS9893** Darvall NIBP Cuff Size 3. Limb Circumference 8.5cm - 11cm
- AAS9894** Darvall NIBP Cuff Size 4. Limb Circumference 10cm - 14cm
- AAS9896** Darvall NIBP Cuff Size 5. Limb Circumference 12cm - 16cm
- AAS9898** Darvall NIBP Cuff Size 8. Limb Circumference 14cm - 22cm
- AAS10042** Darvall NIBP Cuff Size 10. Limb Circumference 20cm - 29cm
- AAS10043** Darvall NIBP Cuff Size 13. Limb Circumference 27cm - 37cm
- AAS9895** Darvall NIBP Cuff Set. Sizes 0-5 and C (7 Cuffs)
- AAS10012** Darvall NIBP Vet-Cuff Range Circumference Measuring Strip

Replacement parts for Darvall H100N and Darvall Express:

- AAS9897** NIBP Adapter Hose Bayonet to Luer for Darvall Cuffs
- AAS8062** Darvall O₂-SAT Nellcor Vet Sensor for H100N and Darvall Express Monitor
- AAS8208** Darvall Nellcor Sensor Clip for Small Animal

Darvall HI00N Pulse Oximeter and Temperature Monitor

Convenient and reliable handheld pulse oximetry and temperature monitor; embedded with world leading Nellcor OxiMax™ pulse oximetry technology.

Features:

- Nellcor OxiMax™ pulse detection
- Temperature channel for rapid check
- LCD display with backlight control
- Automatic power-off function for power saving
- Comes complete with SpO₂ sensor, temperature sensor and protective rubber boot.

AAS539I Darvall HI00N Pulse Oximeter and Temperature Monitor

The monitor can be used with either 4 x AA batteries for up to 48 hours of work or a rechargeable battery for up to 30 hours of work.

AAS8049 Charger Dock and 1 x Ni-MH Battery for HI00N Pulse Oximeter

AAS8175 Ni-MH Battery for HI00N Pulse Oximeter

Levels of leg injury treatment

		GRADE 1	GRADE 2	GRADE 2.5	GRADE 3	GRADE 4
Tendons/ligaments	Light	●	●●	●●●		
	Medium		●●● + ●	●●●	●●●	
	Severe				●●●	●●●●
Fracture					●●●	●●●●
Pareses	Light		●●	●●●		
	Severe					●●●●
Postoperative		●	●●	●●●	●●●	●●●●
Arthrosis	Light	●	●●			
	Medium			●●●	●●●	
	Severe					●●●●

GRADE 1 ●
Light and flexible support to reduce pain and inflammation. Prevents re-injury. Classic neoprene orthosis for light injuries.

GRADE 2 ●●
Provides light to medium support and pain reduction while allowing some movement. Uses adjustable Velcro stabilising straps.

GRADE 2.5 ●●●
Semi-rigid support that stabilises the joint. Ideal for medium tendon/ligament injury and medium arthrosis. Uses thermoplastic.

GRADE 3 ●●●●
Rigid support with thermoplastics that immobilises the injured area. Re-shapeable. For medium to severe injuries.

GRADE 4 ●●●●●
Rigid external support that allows desired movement. Adjustable mobility and support. Made from 3D-scan.

● As complement after plaster treatment.

NOTE! Phalanges with osteoarthritis always require Grade 3 with Paw or Grade 4 with Paw included, since stabilisation of the paw is required.

Scandi Orthopedic Cold Compression Therapy Bandage

Cooling bandage for pets and provides cold relief for up to three hours.

Does not need to pre-cooled before use.

Cold Compression Therapy (CCT) is scientifically proven to be effective.

- No need for pre-cooling
- Self adhesive
- Reduces swelling and pain
- Non-sterile
- Can be used postoperative

SCA-81163-3260 Cold Compression Therapy- CCT Large (8 Pcs/Box)

SCA-81162-3250 Cold Compression Therapy- CCT Medium (8 Pcs/Box)

Scandi Orthopedic Helping Hand Pet Lift Sling

From standard to comfort and offload, there is a variety of options available.

SCA-81174-3150 Helping Hand Standard Medium 86cm

ScandiTex® – our durable fabric

After years of research we can now proudly present our new fabric. ScandiTex® is a fabric that combines durability and water resistance with stretchy and breathable properties. This makes it perfect for animals that need to visit the outdoors but still need protection from the weather and also serves the purpose of preventing the animal from licking the wound.

The ScandiTex® fabric is utilised in our new Medical Protection Cover product range, where it is sewn without seams on the inside to maximise comfort. We also use ScandiTex® in the weather covers that comes with our Grade 3 leg orthoses.

Dressing and Support

Thera-Paw

Thera-Paw acts as a reusable bandage with a protective base.

Key Thera-Paw Features:

- Ultra-cushioned sole alleviates pain, reducing lameness and promoting more even weight distribution
- Use of perforated top-sole material and cut-out design allow the paw to breathe and keeps the injured site free from moisture build-up
- Rubberised, non-skid base and toe-cap are waterproof, protect the site from further injury, and provide better traction
- Vertical closure design runs parallel to the carpal/tarsal bones, dispersing pressure over a wide area
- Thera-Paw is easily cleaned by rinsing it under warm water. Mild detergent may be used. It air dries in under 1 hour, and is ready for immediate reapplication
- Front opening and closing mechanism makes it easy to slip Thera-paw into place
- Outer safety strap provides additional security, to ensure that Thera-paw stays on even the most active dogs
- Dual closing mechanism reduces the risk that a dog can remove the garment

200002	Thera-Paw Small (T/B)
200003	Thera-Paw Small/ Medium (T/C)
200003#2	Thera-Paw Small/ Medium#2 (T/D)
200004	Thera-Paw Medium (T/E)
200005	Thera-Paw Medium/ Large (T/F)
200006	Thera-Paw Large (T/G)
2000SET	Thera-Paw Set of 6 (As above)

Medipaw® Protective Boot

A professional waterproof but breathable cover for dressings and casts. Available in colour coded sizes, they have a durable non-skid base, and elasticised straps with Velcro closures as well as an upper cord lock.

Hard Sole Medipaw

200015	Medipaw Boot Hard Sole Extra Small Wide (XSW) - Orange
200020	Medipaw Boot Hard Sole Extra Small - Yellow
200031	Medipaw Boot Hard Sole Extra Small #2 - Pink

200064L	Carp Flex Splint Kit XL Left
200064R	Carp Flex Splint Kit XL Right

Tarso-Flex X

Tarso-Flex X offers moderate tarsal support.

200100XSL	Tarso Flex X - XS Left
200100XSR	Tarso Flex X - XS Right
200100SR	Tarso Flex X - Small Right
200100SL	Tarso Flex X - Small Left
200100MR	Tarso Flex X - Medium Right
200100ML	Tarso Flex X - Medium Left
200100LR	Tarso Flex X - Large Right
200100LL	Tarso Flex X - Large Left
200100XLL	Tarso Flex X - XL Left
200100XLR	Tarso Flex X - XL Right

Dorsi-Flex Assist

Dorsi-Flex Assist is used to aid the normal placement of the hind limb.

200018	Dorsi Flex Assist Therapaw and Tibial Wrap TB XXS
200019	Dorsi Flex Assist Therapaw and Tibial Wrap TC XS
200022	Dorsi Flex Assist Therapaw and Tibial Wrap TE M
200023	Dorsi Flex Assist Therapaw and Tibial Wrap TF L
200024	Dorsi Flex Assist Therapaw and Tibial Wrap TG XL

Padded Splints

Made from green foam lined plastic.

090120	Padded Splint Small 210mm
090121	Padded Splint Medium 310mm
090122	Padded Splint Large 410mm

Thermoplastic Splinting

The white sheet of Thermoplastic splint is heated in hot water and moulded to a specific custom shape for the patient.

940A	Marq Easy Thermoplastic Splinting Sheet 100x220mm
940B	Marq Easy Thermoplastic Splinting Sheet 152x300mm
940C	Marq Easy Thermoplastic Splinting Sheet 300x600mm
940V	Velcro Strap Hook For Thermoplastic Splints
940X	Compact Blue Foam Sheet For Thermoplastic Splints 400x600mm
940KIT	Thermoplastic Splinting Starter Kit. Contains 940A, 940B, 940X & 940V
